

Contents

1 Principles of Electrodermal Phenomena	1
1.1 Terminology and History	1
1.1.1 Definitions and Terminology	2
1.1.2 Early History of Electrodermal Research	3
1.1.3 Recent Developments in Electrodermal Research	6
1.2 Anatomy of Skin and Sweat Glands	8
1.2.1 Vertical Structure of the Skin	8
1.2.1.1 The Epidermis	10
1.2.1.2 Dermis and Hypodermis	12
1.2.1.3 Vascular System of the Skin	13
1.2.2 Horizontal Structure of the Skin	14
1.2.3 Distribution and Structure of Sweat Glands	14
1.2.4 Other Effector and Sensor Organs in the Skin	16
1.3 Physiology of the Electrodermal System	17
1.3.1 Efferent Innervation of the Skin	17
1.3.2 Innervation of Sweat Glands	20
1.3.2.1 Peripheral Aspects of Sweat Gland Innervation	21
1.3.2.2 Central Aspects of Sweat Gland Innervation	22
1.3.2.3 Questions of Double Innervation and Resting Activity in Sweat Glands	25
1.3.2.4 Specific Innervations of Sweat Glands in Different Regions of the Skin	26
1.3.3 Functions of Sweat Gland Activity	27
1.3.3.1 Mechanism of Sweat Secretion and Contents of Sweat	27
1.3.3.2 Thermoregulatory Function of Sweating and Skin Blood Flow	29
1.3.3.3 Other Functions and Special Features of Sweating	31

1.3.4	Specific Physiological Mechanisms Underlying Electrodermal Activity	32
1.3.4.1	Central Origins of Electrodermal Activity	32
1.3.4.2	Properties of Skin and Sweat Glands Influencing Electrodermal Activity	42
1.3.5	Suggested Biological Relevance of Electrodermal Phenomena	45
1.4	Biophysics of Electrodermal Measurement	48
1.4.1	Resistor- and Capacitor-Based Systems	48
1.4.1.1	Some Fundamental Electrical Properties	48
1.4.1.2	Application of Direct Current to RC Circuits	50
1.4.1.3	Application of Alternating Current to RC Circuits	55
1.4.1.4	Determining System Properties of Unknown RC Systems	61
1.4.2	Electrophysical Properties of Skin and Sweat Glands	64
1.4.2.1	Resistive Properties of Skin and Sweat Glands ...	65
1.4.2.2	Capacitive Properties of Skin and Sweat Glands ...	67
1.4.2.3	Origins of Active Electrical Properties in the Skin and in Sweat Glands.....	68
1.4.3	Models of the Electrodermal System	71
1.4.3.1	Models Based Exclusively on Resistive Properties.....	72
1.4.3.2	Models Going Beyond Single Resistive Properties.....	73
1.4.3.3	Specific Advantages of AC Methods in Model Building.....	79
1.5	Summary of Electrodermal Phenomena	84
2	Methods of Electrodermal Recording	87
2.1	Introduction to Electrodermal Measurement	88
2.1.1	Measuring Electrodermal Activity with Voltage Dividers.....	88
2.1.2	Measuring Electrodermal Activity with Operational Amplifiers.....	91
2.1.3	Circuitries for Separating Electrodermal Responses from Levels	93
2.1.4	Specific Problems of Electrodermal Measurement	96
2.1.5	Measuring Electrodermal Activity with Alternating Current	98
2.1.6	Summary of Measurement Principles	103

2.2	Recording Techniques	104
2.2.1	Recording Sites	104
2.2.1.1	Choice of Sites	104
2.2.1.2	Pretreatment of Sites	109
2.2.2	Electrodes and Electrolytes	110
2.2.2.1	Forms of Electrodes and Their Attachment	110
2.2.2.2	Bias Potentials and Polarization of Electrodes	114
2.2.2.3	Choice or Assembling of Electrodes	115
2.2.2.4	Cleaning, Maintenance, and Storage of Electrodes	116
2.2.2.5	Electrolytes and Electrolyte Media	117
2.2.3	Recording Devices	120
2.2.3.1	Endosomatic Recording.....	120
2.2.3.2	Exosomatic Recording with Direct Current	121
2.2.3.3	Exosomatic Recording with Alternating Current ...	126
2.2.3.4	Ambulatory Monitoring of Electrodermal Activity	130
2.2.3.5	Recording of EDA Within a Magnetic Field	133
2.2.4	Methods of Storage and Evaluation of the Electrodermal Signal	136
2.2.4.1	Paper Recording and Evaluation by Hand.....	136
2.2.4.2	Off-Line Computer Analysis	138
2.2.4.3	On-Line Computer Analysis	140
2.2.5	Sources of Artifacts	140
2.2.5.1	Artifacts Stemming from Recording.....	140
2.2.5.2	Physiologically Based Artifacts	141
2.2.6	Techniques of Electrodermal Recording in Specific Contexts.....	143
2.2.6.1	Long-Term Recording	143
2.2.6.2	Recording Simultaneously with Different Techniques	146
2.2.6.3	Recording with Dry Electrodes or Liquid Electrolytes.....	147
2.2.6.4	Other Specific Electrode Arrangements	148
2.2.7	Summary of Recording Techniques	149
2.3	Analytic Procedures.....	150
2.3.1	Parameters of Phasic Electrodermal Activity	151
2.3.1.1	Latency Times and Windows.....	151
2.3.1.2	Amplitudes	152
2.3.1.3	Shape of Electrodermal Responses	158
2.3.1.4	Area Measurements	165
2.3.1.5	Mathematical Solutions for Overlapping EDRs	167
2.3.2	Parameters of Tonic Electrodermal Activity	172
2.3.2.1	Electrodermal Level	173
2.3.2.2	Tonic Parameters Derived from Phasic Changes ...	174

2.3.3	Transformation of Electrodermal Parameters	175
2.3.3.1	Taking the Electrode Area into Account	176
2.3.3.2	Transforming Resistance into Conductance Units.....	177
2.3.3.3	Improving Distributional Characteristics	178
2.3.3.4	Reduction of Interindividual Variance	179
2.3.4	Removing Artifacts and Treatment of Missing Data	183
2.3.4.1	Identification of Artifacts During Recording	183
2.3.4.2	Missing Data Treatment and EDR Magnitude	186
2.3.4.3	Correction for EDL Drift	187
2.3.5	Summary of Analytic Procedures.....	188
2.4	External and Internal Influences on Recordings.....	189
2.4.1	Climatic Conditions.....	189
2.4.1.1	Ambient Temperature.....	190
2.4.1.2	Other Environmental Conditions	192
2.4.2	Physiological Influences	193
2.4.2.1	Skin Temperature and Skin Blood Flow	194
2.4.2.2	Evaporative Water Loss and Skin Moisture.....	196
2.4.3	Demographic Characteristics	198
2.4.3.1	Age Differences.....	198
2.4.3.2	Gender Differences	204
2.4.3.3	Ethnic Differences and Heritability.....	208
2.5	Statistical Properties of Electrodermal Parameters.....	213
2.5.1	Characteristics of Endosomatic Measures	213
2.5.1.1	Skin Potential Responses	213
2.5.1.2	Skin Potential Levels	215
2.5.1.3	Relationships Between Endosomatic and Exosomatic Measures	217
2.5.2	Characteristics of Exosomatic Measures with Direct Current	218
2.5.2.1	Results of Skin Conductance Measures	218
2.5.2.2	Results of Skin Resistance Measures.....	223
2.5.2.3	Latency and Rise Time Parameters.....	225
2.5.2.4	Measures of Recovery	228
2.5.2.5	Relationship Between Measures of Amplitude and Shape	229
2.5.3	Characteristics of Exosomatic Measures with Alternating Current.....	231
2.5.3.1	Recordings with Sinusoidal Current.....	232
2.5.3.2	Recordings with Square Wave Current.....	235
2.5.4	Level Dependence	236
2.5.4.1	Dependence of Treatment Recordings on Baseline Recordings	237
2.5.4.2	Dependence of Phasic on Tonic Electrodermal Measures	240

2.6	Summary of Conceptual Discussions.....	245
2.6.1	Endosomatic vs. Exosomatic Recording	246
2.6.2	Constant Current vs. Constant Voltage Recording	247
2.6.3	The Use of Direct vs. Alternating Current	251
2.6.4	The Use of DC vs. AC-Coupling	252
2.6.5	Resistance vs. Conductance Units	253
2.6.6	Emerging Methodological Issues	256
3	Applications of Electrodermal Recording	259
3.1	Stimulus-Related Psychophysiological Paradigms	259
3.1.1	Electrodermal Indices of Orienting and Habituation.....	260
3.1.1.1	Differential Influences of Novelty and Significance on the OR.....	265
3.1.1.2	Differentiation Between Orienting, Defensive, and Startle Responses	271
3.1.1.3	Electrodermal Indices of Habituation	275
3.1.2	Conditioning of Electrodermal Responses	283
3.1.2.1	Classical Conditioning of Electrodermal Responses in Humans	283
3.1.2.2	Instrumental or Operant Conditioning of Electrodermal Responses	304
3.1.2.3	Biofeedback of Electrodermal Activity.....	308
3.1.3	Electrodermal Indices of Information Processing	314
3.1.3.1	Neurophysiological Considerations on EDA and Information Processing	314
3.1.3.2	The EDR and Information Processing Capacity... ..	319
3.1.3.3	EDA and Decision Making	325
3.1.3.4	EDR and Memory Storage.....	333
3.1.4	Electrodermal Lateralization and Hemispheric Asymmetry	335
3.1.4.1	Methodological Considerations.....	336
3.1.4.2	The Laterality of CNS Influences on EDA.....	340
3.1.4.3	EDA as a Measure of Hemispheric Asymmetry....	343
3.2	Generalized Psychophysiological States.....	347
3.2.1	Electrodermal Indices of Arousal.....	347
3.2.1.1	EDA as an Indicator of General Arousal	348
3.2.1.2	EDA and Multidimensional Arousal Modeling ...	351
3.2.1.3	Diurnal Variation and EDA in Different Sleep Stages.....	363
3.2.2	Electrodermal Indices of Emotion and Stress	369
3.2.2.1	EDA in Emotional States	370
3.2.2.2	EDA as an Indicator of the Course of Laboratory Stress Responses	381
3.3	Personality and Individual Differences	391
3.3.1	General Personality Traits	391
3.3.1.1	EDA and Extraversion/Introversion	392
3.3.1.2	EDA and Emotional Lability	396

3.3.2	Specific Personality Traits	399
3.3.2.1	Traits Based on Questionnaire Data	400
3.3.2.2	Electrodermal Lability as a Trait	404
3.4	Psychopathology	409
3.4.1	EDA in the Assessment of Anxiety, Psychopathy, and Depression	409
3.4.1.1	EDA of Patients with Generalized Anxiety, Phobias, and Panic Disorders	410
3.4.1.2	EDA in Psychopathic or Antisocial/Conduct Disorders	417
3.4.1.3	EDA in Depressive Patients	427
3.4.2	Electrodermal Indices in Schizophrenia Research	432
3.4.2.1	Electrodermal Recovery and Vulnerability for Schizophrenia	433
3.4.2.2	Electrodermal Nonresponding in Schizophrenics	438
3.4.2.3	Other Issues in Schizophrenia Research Related to EDA	447
3.4.3	EDA as an Indicator in the Psychopharmacological Treatment of Anxiety Disorders	450
3.4.3.1	Studies with Benzodiazepines	453
3.4.3.2	Studies with Beta-Blockers and Neuroleptics	456
3.5	The Use of EDA in Applied Psychology and in Medicine.....	459
3.5.1	EDA in Engineering Psychophysiology	459
3.5.1.1	EDA in Human-Computer Interaction.....	463
3.5.1.2	EDA in Traffic and Automation	467
3.5.1.3	EDA in Marketing and Product Evaluation	473
3.5.2	EDA in the Detection of Deception	478
3.5.3	EDA in Dermatology	491
3.5.4	EDA in Neurology	497
3.5.4.1	Brain Lesions.....	498
3.5.4.2	Degenerative Diseases	503
3.5.4.3	Disorders with Primary Psychological Relevance	508
3.5.5	EDA in Other Medical and Psychological Applications	513
3.6	Summary and Outlook	520
Appendix	EDR_PARA: A Computer Program for Interactive Evaluation of Electrodermal Recordings (Version 3.7) by Florian Schaefer.....	525
