# Detailed Contents

<b>1 Patterns in the Marine Environment</b>	1
1.1 Introduction	1
1.2 Biogeography	9
1.3 Biodiversity	15
1.4 Abundance and size	23
Further reading	29
<b>Part 1 PROCESSES</b>	
<b>2 Primary Production Processes</b>	33
2.1 Introduction	33
2.2 Photosynthesis	36
2.3 Respiration	42
2.4 Heterotrophic metabolism	43
2.5 Light in water	44
2.6 Light and photosynthesis	46
2.7 Supply of inorganic nutrients	49
2.8 The main limiting nutrients for growth	53
2.9 Algal growth	64
2.10 Seasonal trends in primary production	69
2.11 Global trend in primary production	69
2.12 Primary production in seaweeds	76
2.13 Measurement of primary production	78
Further reading	87
<b>3 Microbial Ecology: Production and the Decomposition of Organic Material</b>	89
3.1 Introduction	89
3.2 The microbial powerhouse	89
3.3 The ecological context in which the marine microbes are embedded	91
3.4 The decomposition process	93
3.5 Key organism groups in the oceanic microbial food webs	97
3.6 The dynamics of bacterial growth and its measurement	115
3.7 The seasonal cycle of production and consumption	118
3.8 Oceanic microbes in global carbon and nutrient cycles	123
Further reading	125
<b>4 Secondary Production</b>	126
4.1 Introduction	126
4.2 Measuring secondary production	129
4.3 Drivers of secondary production	134
4.4 Size structuring in marine food-webs	136

4.5 Human impacts on secondary production	136
Further reading	140
<b>Part 2 SYSTEMS</b>	
<b>5 Estuaries</b>	143
5.1 Introduction	143
5.2 Estuarine organisms	151
5.3 Productivity and food webs	159
5.4 Diversity patterns in estuaries	165
5.5 Other 'brackish-water' systems	168
Further reading	171
<b>6 Rocky and Sandy Shores</b>	172
6.1 Introduction	172
6.2 What is the shore?	173
6.3 Environmental gradients and the shore	174
6.4 Causes of zonation	179
6.5 The organization of shore communities	181
6.6 The shore network	190
6.7 The future of rocky and sandy shores	192
Further reading	193
<b>7 Pelagic Ecosystems</b>	194
7.1 Introduction	194
7.2 Definitions and environmental features	195
7.3 Pelagic inhabitants: consequences of size	198
7.4 Temporal and spatial variability in pelagic ecosystems	200
7.5 Sampling the open ocean	208
7.6 Pelagic fisheries	212
7.7 Regime shifts in pelagic marine ecosystems	213
7.8 The future for pelagic marine ecosystems	214
Further reading	216
<b>8 Continental Shelf Seabed</b>	217
8.1 Introduction	217
8.2 Definitions and environmental features	218
8.3 The seabed habitat and biota	224
8.4 Functional roles of the biota	231
8.5 Food webs in shelf systems	235
8.6 Characterization of seabed communities	239
8.7 Specific habitats	241
Further reading	250
<b>9 The Deep Sea</b>	251
9.1 Introduction	251
9.2 Definitions and environmental features	252

9.3 Food supply to the deep sea	260
9.4 The organisms of the deep sea	263
9.5 Hydrothermal vents – islands in the deep sea	271
Further reading	275
<b>10 Mangrove Forests and Seagrass Meadows</b>	277
10.1 Introduction	277
10.2 Mangrove forests	278
10.3 Seagrass meadows	290
Further reading	304
<b>11 Coral Reefs</b>	305
11.1 Introduction	305
11.2 Reef development and distribution	305
11.3 Corals and coral communities	309
11.4 Coral reef productivity and food chains	311
11.5 Reef fauna	313
11.6 Threats to coral reefs	314
11.7 Reef growth and bioerosion	318
11.8 Dynamics of reef animals	320
11.9 Reefs and human society	322
Further reading	323
<b>12 Polar Regions</b>	325
12.1 Introduction	325
12.2 What is pack ice?	329
12.3 Arctic vs Antarctic pack ice	331
12.4 Life in a block of ice	332
12.5 Sea-ice edges	337
12.6 Polar benthos	341
12.7 Polar benthoo-pelagic coupling	343
12.8 Endemism in polar benthos	343
12.9 Gigantism in polar waters	344
12.10 Birds and mammals	345
Further reading	352
<b>Part 3 IMPACTS</b>	
<b>13 Fisheries</b>	357
13.1 Introduction	357
13.2 Global fisheries	357
13.3 Fish production	361
13.4 Fished species and their fisheries	361
13.5 Fish population biology	362
13.6 Fishing methods	363
13.7 Fish stock assessment	366
13.8 The management process	368
13.9 Environmental impacts of fishing	370

13.10 Ecosystem-based fishery management	375
13.11 The future of fisheries	376
Further reading	376
<b>14 Aquaculture</b>	377
14.1 Introduction	377
14.2 Aquaculture past and present	378
14.3 How do we produce food from the sea?	381
14.4 What is cultivated and where?	383
14.5 Food requirements and constraints	385
14.6 The role of biotechnology	386
14.7 Negative effects of biotechnology	386
14.8 Cultivation systems	387
14.9 Cultivation of fish in cages	387
14.10 Cage cultivation: a lousy system?	389
14.11 Breaking away from the coastal margin	391
14.12 Shrimp cultivation: the gold rush	393
14.13 Shrimp farming and mangroves	394
14.14 Cultivation of molluscs	395
14.15 Ranching at sea	397
14.16 A conservation role for aquaculture?	398
Further reading	400
<b>15 Disturbance, Pollution, and Climate Change</b>	401
15.1 Introduction	401
15.2 Ecological role of disturbance	402
15.3 Measuring the effects of human activities	406
15.4 Agents of change	413
15.5 Climate change	421
15.6 Interaction of multiple factors	426
Further reading	428
<b>16 Conservation</b>	429
16.1 Introduction	429
16.2 Why conserve?	431
16.3 What to conserve	432
16.4 Economics of conservation	435
16.5 Conservation policy and legislation	439
16.6 Conservation in action	442
16.7 Evidence-based conservation	447
16.8 Life-cycle analysis	448
16.9 The future	448
Further reading	449
