

Contents

Introduction.....	7
1 Metalworking Fluids and Environmentally Acceptable Machining	9
2 Biodegradability Assessment	
2.1 Biodegradability test methods	10
2.2 Biodegradability test methods for lubricants.....	11
2.3 Comparison of lubricants biodegradability.....	16
2.4 Treatment of spent metalworking fluids	17
2.5 Advanced oxidation processes	19
2.6 Characterization of used metalworking fluids.....	22
3 Basis of the Research – Quality Aspects, Economic Aspects, Safety Aspects and Environmental Aspects of Selection, Use and Disposal of Metalworking Fluids	25
4 Main Aim	27
4.1 Preliminary study of ozone affecting the total organic carbon in the samples of MWFs	27
4.1.1 <i>Material and methods</i>	27
4.1.2 <i>Results and discussion</i>	28
4.1.3 <i>Conclusion</i>	32
4.1.4 <i>Following research, suggestions and improvements in applying ozone to MWFs</i>	33
4.2 Preliminary study of ecotoxicity of selected MWFs according OECD 209/REACH	34
4.2.1 <i>Materials and methods</i>	34
4.2.2 <i>Results and discussion</i>	36
4.2.3 <i>Conclusion</i>	37
4.3 Preliminary study of selected MWFs inherent biodegradability (OECD 302B)	37
4.3.1 <i>Material and methods</i>	37
4.3.2 <i>Results and discussion</i>	38
4.3.3 <i>Conclusion</i>	45

4.3.4	<i>Following research, suggestions and improvements in OECD 302B measurements</i>	47
4.4	Biodegradability measuring by the modified test method/construction of the apparatus	47
4.4.1	<i>Material and methods</i>	52
4.4.2	<i>Results and discussion</i>	54
4.4.3	<i>Conclusion</i>	56
4.4.4	<i>Following research, suggestions and improvements in constructed apparatus</i>	56
4.5	Biodegradability measurement of selected Metalworking fluids	57
4.5.1	<i>Material and Methods</i>	57
4.5.2	<i>Results and Discussion</i>	57
4.5.3	<i>Conclusion</i>	58
4.6	Comparison of biodegradability test methods (OECD 302B/OECD 301B modified method)	58
4.6.1	<i>Material and methods</i>	58
4.6.2	<i>Results and discussion</i>	58
4.6.3	<i>Conclusion</i>	61
4.6.4	<i>Following research, suggestions and improvements in constructed apparatus</i>	61
4.7	Study of the ozone influence on the biodegradability of the treated MWF samples	62
4.7.1	<i>Material and methods</i>	62
4.7.2	<i>Results and discussion</i>	62
4.7.3	<i>Conclusion</i>	65
4.7.4	<i>Following research, suggestions and improvements in constructed apparatus</i>	65
4.8	Preliminary study of the UV/O ₃ influence on the degradability of the treated MWF samples	66
4.8.1	<i>Material and methods</i>	66
4.8.2	<i>Results and discussion</i>	67
4.8.3	<i>Conclusion</i>	70
4.8.4	<i>Following research, suggestions and improvements in enhancing of biodegradability by advanced oxidative methods</i>	70

4.9 Study of the Fenton's like processes (alone and in the combination with ozone) influence on the biodegradability of MWF wastewaters sample.....	70
4.9.1 Material and methods.....	70
4.9.2 Results and discussion	72
4.9.3 Conclusion.....	75
Conclusion.....	76
Summary.....	80
References.....	81
About the Author	86
Subject Index	87
