

# Contents

- 1 Introduction to Human Development 1**
  - Importance of and Advances in Embryology 1
  - Descriptive Terms 2
  - Clinically Oriented Questions 5
- 2 Human Reproduction 7**
  - Reproductive Organs 7
    - Female Reproductive Organs 7
    - Male Reproductive Organs 10
  - Gametogenesis 10
    - Meiosis 10
    - Spermatogenesis 11
    - Oogenesis 14
    - Comparison of Male and Female Gametes 14
  - Female Reproductive Cycles 14
    - Ovarian Cycle 14
    - Menstrual Cycle 18
  - Transportation of Gametes 19
    - Oocyte Transport 19
    - Sperm Transport 19
  - Maturation of Sperms 20
  - Viability of Oocytes and Sperms 20
  - Clinically Oriented Questions 20
- 3 First Week of Human Development 21**
  - Fertilization 21
    - Phases of Fertilization 21
    - Results of Fertilization 23
  - Cleavage of Zygote 23
  - Formation of Blastocyst 23
  - Clinically Oriented Questions 27
- 4 Second Week of Human Development 29**
  - Formation of Amniotic Cavity, Embryonic Disc, and Umbilical Vesicle 30
  - Development of Chorionic Sac 32
  - Implantation Sites of Blastocysts 33
  - Clinically Oriented Questions 34
- 5 Third Week of Human Development 35**
  - Gastrulation: Formation of Germ Layers 35
    - Primitive Streak 36
    - Notochordal Process and Notochord 36
  - Neurulation: Formation of the Neural Tube 38
    - Neural Plate and Neural Tube 38
    - Neural Crest Formation 39
  - Development of Somites 39
  - Development of Intraembryonic Coelom 40
  - Early Development of Cardiovascular System 40
    - Vasculogenesis and Angiogenesis 43
  - Development of Chorionic Villi 45
  - Clinically Oriented Questions 47
- 6 Fourth to Eighth Weeks of Human Development 49**
  - Folding of Embryo 49
    - Head and Tail Folds 51
    - Lateral Folds 51
  - Germ Layer Derivatives 51
  - Control of Embryonic Development 51
  - Estimation of Embryonic Age 54

**Highlights of the Fourth to Eighth****Weeks 54**

Fourth Week 55

Fifth Week 56

Sixth Week 58

Seventh Week 58

Eighth Week 58

**Clinically Oriented Questions 61****7 Fetal Period: The Ninth Week to Birth 63****Highlights of Fetal Period 64**

Nine to Twelve Weeks 64

Thirteen to Sixteen Weeks 65

Seventeen to Twenty Weeks 65

Twenty-One to Twenty-Five Weeks 65

Twenty-Six to Twenty-Nine Weeks 66

Thirty to Thirty-Eight Weeks 67

Expected Date of Delivery 67

**Factors Influencing Fetal Growth 67****Procedures for Assessing Fetal Status 68**

Ultrasonography 68

Diagnostic Amniocentesis 68

Chorionic Villus Sampling 69

Cell Cultures 69

Percutaneous Umbilical Cord Blood Sampling 69

Magnetic Resonance Imaging 69

Fetal Monitoring 70

Alpha-Fetoprotein Assay 70

Noninvasive Prenatal Diagnosis 70

**Neonatal Period 70****Clinically Oriented Questions 70****8 Placenta and Fetal Membranes 71****Placenta 71**

Decidua 72

Development of Placenta 72

Fetomaternal Junction 72

Intervillous Space 72

Amniochorionic Membrane 74

Placental Circulation 74

**Parturition 79**

Stages of Labor 79

Placenta and Fetal Membranes after Birth 80

Umbilical Cord 82

**Amnion and Amniotic Fluid 82**

Significance of Amniotic Fluid 84

**Umbilical Vesicle 84**

Significance of Umbilical Vesicle 84

**Allantois 84****Multiple Pregnancies 85**

Twins and Fetal Membranes 85

Other Types of Multiple Births 88

**Clinically Oriented Questions 89****9 Body Cavities, Mesenteries, and Diaphragm 91****Embryonic Body Cavity 91**

Mesenteries 92

Division of Embryonic Body Cavity 92

**Development of Diaphragm 95**

Septum Transversum 95

Pleuroperitoneal Membranes 95

Dorsal Mesentery of Esophagus 95

Muscular Ingrowth from Lateral Body Walls 96

Positional Changes and Innervation of the Diaphragm 96

**Clinically Oriented Questions 99****10 Pharyngeal Apparatus, Face, and Neck 101****Pharyngeal Arches 101**

Pharyngeal Arch Components 102

**Pharyngeal Pouches 106**

Derivatives of Pharyngeal Pouches 106

**Pharyngeal Grooves 108****Pharyngeal Membranes 110****Development of Thyroid Gland 111****Development of Tongue 111**

Lingual Papillae and Taste Buds 114

Nerve Supply of Tongue 114

**Development of Salivary Glands 115****Development of Face 115****Development of Nasal Cavities 119**

Paranasal Sinuses 120

**Development of Palate 121**

Primary Palate 121

Secondary Palate 121

**Clinically Oriented Questions 126****11 Respiratory System 127****Development of Larynx 129****Development of Trachea 129****Development of Bronchi and Lungs 130**

Maturation of Lungs 133

**Clinically Oriented Questions 135**

**12 Alimentary System 137****Foregut 137**

Development of Esophagus 138

Development of Stomach 138

Development of Duodenum 141

Development of Liver and Biliary  
Apparatus 141

Development of Pancreas 143

**Development of Spleen 143****Midgut 144**

Rotation of Midgut Loop 145

Cecum and Appendix 145

**Hindgut 153**

Cloaca 153

Anal Canal 155

**Clinically Oriented Questions 160****13 Urogenital System 161****Development of Urinary System 161**Development of Kidneys and  
Ureters 161

Positional Changes of Kidneys 165

Changes in Blood Supply of  
Kidneys 166

Development of Urinary Bladder 170

Development of Urethra 172

**Development of Suprarenal Glands 172****Development of Genital System 174**

Development of Gonads 174

Development of Genital Ducts 179

Development of External Genitalia 180

**Development of Inguinal Canals 184****Relocation of Testes and Ovaries 187**

Descent of Testes 187

Descent of Ovaries 187

**Clinically Oriented Questions 188****14 Cardiovascular System 189****Early Development of Heart and Blood****Vessels 190**Development of Veins Associated with  
Embryonic Heart 190Pharyngeal Arch Arteries and Other  
Branches of the Dorsal Aorta 193Fate of Vitelline and Umbilical  
Arteries 193**Later Development of Heart 193**Circulation through Primordial  
Heart 197

Partitioning of Primordial Heart 197

Changes in Sinus Venosus 199

Primordial Pulmonary Vein and Formation  
of Left Atrium 199

Partitioning of Primordial Ventricle 199

Partitioning of Bulbus Cordis and Truncus  
Arteriosus 201

Development of Cardiac Valves 203

Conducting System of Heart 203

**Birth Defects of Heart and Great****Vessels 204****Derivatives of Pharyngeal Arch****Arteries 213**Derivatives of First Pair of Pharyngeal Arch  
Arteries 214Derivatives of Second Pair of Pharyngeal  
Arch Arteries 214Derivatives of Third Pair of Pharyngeal  
Arch Arteries 214Derivatives of Fourth Pair of Pharyngeal  
Arch Arteries 214Fate of Fifth Pair of Pharyngeal Arch  
Arteries 214Derivatives of Sixth Pair of Pharyngeal  
Arch Arteries 214**Pharyngeal Arch Arterial Birth Defects 216****Fetal and Neonatal Circulation 216**

Fetal Circulation 219

Transitional Neonatal Circulation 221

Derivatives of Fetal Vessels and  
Structures 221**Development of the Lymphatic System 222**

Development of Lymph Nodes 222

Development of Spleen and Tonsils 223

**Clinically Oriented Questions 223****15 Musculoskeletal System 225****Skeletal System 225****Development of Cartilage and Bone 227**

Histogenesis of Cartilage 227

Histogenesis of Bone 227

**Development of Joints 229**

Fibrous Joints 229

Cartilaginous Joints 229

Synovial Joints 229

**Development of Axial Skeleton 229**

Development of Vertebral Column 230

Cartilaginous Stage of Vertebral  
Development 231Bony Stage of Vertebral  
Development 231

Development of Ribs 232

Development of Sternum 232

Development of Cranium 232

### **Development of Appendicular Skeleton 236**

#### **Muscular System 238**

Development of Skeletal Muscle 239

Development of Smooth Muscle 241

Development of Cardiac Muscle 241

#### **Development of Limbs 241**

Early Stages of Limb Development 241

Final Stages of Limb Development 243

Cutaneous Innervation of Limbs 244

Blood Supply of Limbs 244

#### **Clinically Oriented Questions 249**

## **16 Nervous System 251**

### **Development of Nervous System 251**

#### **Development of Spinal Cord 254**

Development of Spinal Ganglia 256

Development of Spinal Meninges 257

Positional Changes of Spinal Cord 257

Myelination of Nerve Fibers 257

#### **Birth Defects of Spinal Cord 257**

#### **Development of Brain 259**

Brain Flexures 259

Hindbrain 259

Myelencephalon 260

Metencephalon 261

Choroid Plexuses and Cerebrospinal Fluid 263

Midbrain 264

Forebrain 264

#### **Congenital Anomalies of Brain 268**

#### **Development of Peripheral Nervous System 272**

Spinal Nerves 273

Cranial Nerves 273

#### **Development of Autonomic Nervous System 275**

Sympathetic Nervous System 275

Parasympathetic Nervous System 275

#### **Clinically Oriented Questions 275**

## **17 Development of Eyes and Ears 277**

### **Development of Eyes and Related Structures 277**

Development of Retina 279

Development of Choroid and Sclera 282

Development of Ciliary Body 282

Development of Iris 283

Development of Lens 283

Development of Aqueous Chambers 283

Development of Cornea 284

Development of Eyelids 284

Development of Lacrimal Glands 284

### **Development of Ears 284**

Development of Internal Ears 284

Development of Middle Ears 285

Development of External Ears 286

### **Clinically Oriented Questions 289**

## **18 Integumentary System 291**

### **Development of Skin and**

#### **Appendages 291**

Epidermis 291

Dermis 292

Development of Glands 293

### **Development of Hairs 294**

### **Development of Nails 294**

### **Development of Mammary Glands 295**

### **Development of Teeth 296**

Bud Stage of Tooth Development 296

Cap Stage of Tooth Development 297

Bell Stage of Tooth Development 297

Tooth Eruption 299

### **Clinically Oriented Questions 301**

## **19 Human Birth Defects 303**

### **Teratology: Study of Abnormal Development 303**

### **Birth Defects Caused by Genetic Factors 304**

Numerical Chromosomal Abnormalities 304

Structural Chromosomal Abnormalities 308

Birth Defects Caused by Mutant Genes 310

### **Birth Defects Caused by Environmental Factors 311**

Principles of Teratogenesis 311

Human Teratogens 314

Environmental Chemicals as Teratogens 317

Infectious Agents as Teratogens 317

Radiation as a Teratogen 318

Maternal Factors as Teratogens 318

Mechanical Factors as Teratogens 319

### **Birth Defects Caused by Multifactorial Inheritance 319**

### **Clinically Oriented Questions 319**

## **20 The Cellular and Molecular Basis of Development** 321

### **Intercellular Communication** 322

Gap Junctions 322

Cell Adhesion Molecules 322

### **Morphogens** 323

Retinoic Acid 323

Transforming Growth Factor- $\beta$ /Bone

Morphogenetic Protein 323

Sonic Hedgehog 323

Wnt/ $\beta$ -Catenin Pathway 325

### **Receptor Tyrosine Kinases** 325

Common Features 325

Regulation of Angiogenesis by Receptor

Tyrosine Kinases 326

### **Notch-Delta Pathway** 326

### **Transcription Factors** 326

Hox/Homeobox Proteins 327

Pax Genes 327

Basic Helix-Loop-Helix Transcription

Factors 328

### **Epigenetics** 328

DNA Methylation 328

Histone Modifications 328

### **Stem Cells: Differentiation versus**

Pluripotency 329

### **Summary of Common Signaling Pathways**

Used during Development 329

## **Bibliography and Suggested Reading** 331

## **Answers to Clinically Oriented Questions** 337

## **Index** 347
