CONTENTS

The Author xiii

Preface xv

Part 1 PREPARATION FOR TEACHING 1

1 Understanding Your Students and How They Learn 3
- Your Student Body Profile
- How People Learn
- How Structure Increases Learning
- The Cognitive Development of Undergraduates
- Encouraging Cognitive Growth
- Teaching Today's Young Students
- The Challenge

2 Outcomes-Centered Course Design 17
- Why Outcomes-Centered Course Design?
- Writing Outcomes
- Types of Outcomes
- Types of Cognitive Outcomes
- Sequencing Outcomes into a Learning Process
- Helpful Frameworks for Designing a Course
- Showing Students Their Learning Process
- Outcomes-Centered Course Development
- The Big Picture

3 Building Critical Thinking into a Course Design 33
- The Many Faces of Critical Thinking
- Common Ground
- Critical Thinking Outcomes for Your Students
- Giving Students Practice in Critical Thinking
- The Goal: Critical Thinking in Everyday Life

4 Deciding What Technology to Use 45
- Choosing Technologies Intelligently
- How Faculty and Students View Technology
- Lecture-Related Software
- The Learning Management System
- The Flipped Classroom
- Social Media
- Mobile Learning in Class
- Laptops in Class
- Web Resources
- Miscellaneous Technologies
- The Future of Educational Technology

5 The Complete Syllabus 61
- How Long? How Extensive?
- The Case for Trimming the Syllabus
- Essential Syllabus Items
- The Graphic Syllabus
- The Online "Living Syllabus"

Ensuring Your Students Read Your Syllabus
Adding a Creative Element

6 **Copyright Guidelines for Instructors** 71
Where Copyright Does and Does Not Apply
Common Copyright Misconceptions
Free Use: Fair Use, Facts, and Public Domain
Printed Text
Images
In-Class Performances
Recording Broadcast Programming
Online Materials
Obtaining Permission or a License
How Copyright Violations Are Actually Handled
For Further and Future Reference

Part 2
HUMAN FACTORS 79

7 **Creating a Welcoming Classroom Environment for All Your Students** 81
Planning a Welcoming Classroom
A Welcoming First Day of Class
Learning Students' Names
The Inclusive, Equitable Classroom
Maintaining a Welcoming Environment

8 **Enhancing Student Motivation** 93
Intrinsic and Extrinsic Motivation
Students' Perceptions of Motivators in Their Courses
Students' Values about College and Their Impact on Motivation
Credible Theories of Motivation
Fifty-Five Strategies for Motivating Students
No Magic Bullets

9 **Preventing and Responding to Classroom Incivility** 105
What Is Incivility?
Why Do Students Behave This Way?
Preventing Incivility: Your Classroom Persona
Responding Wisely to Incivility
Seeking Assistance

10 **Preserving Academic Integrity** 119
How Prevalent Is Cheating?
Who Cheats and Why?
Detecting Cheating
Forty-Two Ways to Prevent Cheating
Honor Codes
Changing Student Values

Part 3
TRIED-AND-TRUE TEACHING METHODS 127

11 **Matching Teaching Methods with Learning Outcomes** 129
Types of Tools
A Tool for Organizing Your Course
Has Our Knowledge Changed Our Teaching?

12 **Lecturing for Student Learning** 141
When and How Much to Lecture
Making the Lecture Homework
Preparing an Effective Lecture
Delivering an Effective Lecture
Incorporating Student-Active Breaks: The Interactive Lecture
Inducing and Teaching Students to Take Good Notes
Making the Lecture Effective

13 **Leading Effective Discussions** 155
When to Choose Discussion
Setting the Stage for Discussion at the Start of Your Course
Policies to Encourage Participation
Skillful Discussion Management
Questioning Techniques
Organizing Discussion Questions
Turning the Tables

14 **Coordinating Experiential Learning** 167
Student Presentation Formats
Role Playing
Simulations and Games
Service-Learning and Civic Engagement: The Real Thing
Maximizing the Value of Experiential Learning

15 Managing Productive Groups 179
A Group by Any Other Name . . .
The Case for Group Learning
Cautions about Group Learning
Managing and Troubleshooting In-Class Ad Hoc Groups
Setting Up, Managing, and Troubleshooting Formal, Project-Based Groups
Team-Based Learning
Preparing Students for Life

Part 4
INQUIRY-BASED METHODS FOR SOLVING REAL-WORLD PROBLEMS 191

16 Inquiry-Guided Learning 193
Definitions of Inquiry-Guided Learning
The Effectiveness of Inquiry-Guided Learning
The Need for Student Guidance
Objects of Inquiry
Modes of Inquiry
Variations of Inquiry-Based Learning
Upcoming Inquiry-Guided Methods

17 The Case Method 199
The Effectiveness of the Case Method
The Subject Matter and Websites for Cases
What Makes a Good Case, and How to Write Your Own
Types of Cases
Debriefing Cases
A Postscript for Pioneers

18 Problem-Based Learning 205
How PBL Works
Good PBL Problems and Where to Find Them
PBL's Effectiveness
What Students Think
Creating Your Own PBL Problems

19 Problem Solving in the STEM Fields 211
Where STEM Education Falls Short
Improving Student Learning in STEM Courses: General Advice
Improving Student Learning in STEM Courses: Specific Strategies
Getting Real in the Lab
Online Resources for STEM Education
Why STEM Education Is So Important

Part 5
TOOLS AND TECHNIQUES TO FACILITATE LEARNING 223

20 Helping Students Learn How They Learn 225
Learning as an "Inside Job"
The Learner's Questions
The Evidence for Self-Regulated Learning
Activities and Assignments for Every Occasion
Self-Regulated and Self-Directed Learning
Sources for Teaching Your Students How to Learn

21 Ensuring Students Prepare for Class 237
Why Students Don't Prepare
How We Can Equip and Induce Students to Come Prepared
Specific Tools for Holding Students Accountable
Managing Your Workload

22 Teaching in Multiple Modes 249
Kolb's Learning Cycle
Felder and Silverman's Learning Styles Model
Multimodal Learning
Combining Modes

23 Making the Most of the Visual Mode 257
How Visuals Enhance Learning
Types of Visuals for Learning
The Future of Visuals in Learning

24 Improving Student Performance with Feedback 271
Why Feedback Fails
Student Peer Feedback
Self-Assessment
Student Portfolios

Instructor Feedback: Helping Students Improve with It
Classroom Assessment Techniques
During-the-Term Student Feedback
The Power of Feedback

Part 6 ASSESSMENT AND GRADING 281

25 Preparing Students for Exams 283
Test Preparation Measures
Measures to Ensure Students Understand Our Language
Anxiety-Reduction Measures
What the Effort Is Worth

26 Constructing Student Assessments for Grading 289
General Testing Guidelines
Objective Test Items
Constructed-Response Test Items and Assignments
Student Assessments as Teaching Assessments

27 Grading Student Assessments 303
Grading Systems
Grading Constructed Responses
Grading Lab Reports
How to Grade and Teach Mechanics at the Same Time
Specifications (Specs) Grading
Returning Students' Work
The Real Purpose of Grades

28 Defining and Documenting Teaching Effectiveness 317
What Is Teaching Effectiveness?
What Student Ratings Do and Do Not Measure
How to Improve Your Student Ratings
Documenting Your Effectiveness
A Comprehensive Faculty Evaluation System
Complex beyond Measure

Appendix: Instructional Support and Resources at Your Institution 333
