

CONTENTS

Preface / ix

1 THE NATURE OF ORGANOPHOSPHORUS CHEMISTRY / 1

2 SOME GENERAL CONSIDERATIONS OF ORGANOPHOSPHORUS COMPOUNDS / 8

- 2.A. Organization of Compounds by the Bonding to Phosphorus / 8
- 2.B. Oxidation State Relationships / 10
- 2.C. Stability of the Carbon-Phosphorus Bond / 11
- 2.D. Importance and Characteristics of the Phosphoryl ($\text{P}=\text{O}$) Group / 12
- 2.E. 1,2-Dipoles (Ylides) Containing Phosphorus / 15
- 2.F. The 5-Coordinate State of Phosphorus / 17
- 2.G. The POH to P(O)H Rearrangement with 3-Coordinate Phosphorus / 20
- 2.H. Phosphorus Bonds to Heteroatoms (X , S , OR , NR_2) / 21
- 2.I. Analogies between the Chemistry of Phosphorus Compounds and that of Related Elements (N , S , C) / 23
- 2.J. Incorporation of Phosphorus in Rings / 25
- 2.K. Reactive Intermediates and Reaction Mechanisms / 27
- 2.L. Safety in the Handling of Organophosphorus Compounds / 34

- 2.M. Important Literature Resources in Phosphorus Chemistry / 35
References / 37
Appendix 2.1. Some Notes on IUPAC Nomenclature / 41

3 THE COMMON 3-COORDINATE FUNCTIONS (σ^3 , λ^3) / 44

- 3.A. Halophosphines / 44
3.B. Alkoxy and Amino Derivatives of Phosphines / 57
3.C. Phosphines / 68
3.D. Biphosphines / 86
References / 88
Appendix 3.1. Syntheses of Pertinent Compounds in *Organic Syntheses*
and *Inorganic Syntheses* / 93

4 THE 4-COORDINATE PHOSPHINE OXIDES, OTHER CHALCOGENIDES, AND PHOSPHONIUM SALTS / 95

- 4.A. Phosphine Oxides / 95
4 B. Phosphine Sulfides, Selenides, and Tellurides / 113
4.C. Quaternary Phosphonium Salts / 117
4.D. Heterophosphonium (Quasiphosphonium) Salts / 123
References / 129
Appendix 4.1. Syntheses of Pertinent Compounds in *Organic Syntheses*
and *Inorganic Syntheses* / 132

5 THE ACIDS OF ORGANOPHOSPHORUS CHEMISTRY AND THEIR DERIVATIVES / 133

- 5.A. Structures and General Characteristics / 133
5.B. Derivatives of Phosphorus Acids / 138
5.C. The Formation of Phosphorus Acids with C–P Bonds / 141
5.D. Synthesis of Phosphoric Acid Derivatives / 153
5.E. Sulfur Derivatives of Phosphorus Acids / 153
5.F. Carbanion Formation and Reactivity at the α -Carbon of
Phosphonates / 158
References / 162
Appendix 5.1. Syntheses of Pertinent Compounds in *Organic Syntheses*
and *Inorganic Syntheses* / 166

6 PHOSPHORUS-31 NMR SPECTROSCOPY / 169

- 6.A. Some General Considerations / 169

- 6.B. The Literature of ^{31}P NMR Spectroscopy / 172
- 6.C. General Trends and Structural Influences on ^{31}P NMR Shifts / 173
- 6.D. ^{31}P NMR Shifts of Phosphines / 180
- 6.E. ^{31}P NMR Shifts of Halophosphines / 188
- 6.F. ^{31}P NMR Shifts of 3-Coordinate Oxy, Thioxy, and Amino Compounds / 189
- 6.G. ^{31}P NMR Shifts of Tertiary Phosphine Oxides and Sulfides / 191
- 6.H. ^{31}P NMR Shifts of Quaternary Phosphonium Salts / 192
- 6.I. ^{31}P NMR Shifts of Heterophosphonium Ions and Reaction Intermediates / 193
- 6.J. ^{31}P NMR Spectra of Phosphorus Acids with P–C Bonds and Some Derivatives / 196
- 6.K. ^{31}P NMR Shifts of Phosphoric Acid Derivatives / 198
- References / 201

7 OTHER SPECTROSCOPIC TECHNIQUES IN ORGANOPHOSPHORUS CHEMISTRY / 204

- 7.A. ^1H NMR Spectroscopy / 204
- 7.B. ^{13}C NMR Spectroscopy in Organophosphorus Chemistry / 212
- 7.C. Infrared Spectroscopy / 217
- 7.D. Mass Spectrometry of Organophosphorus Compounds / 219
- 7.E. Specialized Spectroscopic Methods Useful in Organophosphorus Chemistry / 223
- References / 229

8 HETEROCYCLIC PHOSPHORUS COMPOUNDS / 233

- 8.A. General / 233
- 8.B. The Fundamental Ring Systems / 234
- 8.C. Multicyclic Phosphorus Ring Systems / 265
- References / 268

9 OPTICALLY ACTIVE ORGANOPHOSPHORUS COMPOUNDS / 272

- 9.A. General / 272
- 9.B. Racemic Mixture Separation Techniques / 274
- 9.C. Optically Active Phosphorus Compounds from Transformations of Other P-Chiral Precursors and from Asymmetric Synthesis Methods / 282
- 9.D. Kinetic Resolution of Phosphorus Compounds by Enzymes / 298

- 9.E. Summary of Some Stereospecific Reactions Occurring at Phosphorus Functions / 299

References / 303

10 THE LOW- AND HIGH-COORDINATION STATES OF PHOSPHORUS / 307

- 10.A. General / 307

- 10.B. The 1-Coordinate States (σ^1 , λ^3 and σ^1 , λ^1) / 308

- 10.C. The 2-Coordinate States with Double Bonds to Phosphorus (σ^2 , λ^3) / 317

- 10.D. The 3-Coordinate State (σ^3 , λ^5) / 333

- 10.E. Compounds with 5- and 6-Coordinate Phosphorus / 339

References / 345

11 ORGANOPHOSPHORUS CHEMISTRY IN BIOLOGY, AGRICULTURE, AND TECHNOLOGY / 351

- 11.A. Biological Phosphates / 351

- 11.B. The Natural Products Chemistry of the C—P Bond / 357

- 11.C. Organophosphorus Compounds in Medicine / 362

- 11.D. Agricultural Applications of Organophosphorus Compounds / 367

- 11.E. The Importance of Organophosphorus Compounds in Technology / 374

- 11.F. Some Major Uses of Organophosphorus Compounds as Reagents in Organic Synthesis / 379

References / 384

Index / 387
