

Contents

Contents	iv
Introduction	vi
Preface	vi
Book Outline	vi
Acknowledgements	vi
List of Notation	vii
1. Historical Perspective	1
2. Maxwell's Equations	13
2.1 Maxwell's Equations in Anisotropic Medium	13
2.2 Matrix Formulation in Gyrotropic Media	14
2.3 Solution in Electrically Anisotropic Medium	14
2.4 Medium with Both Electric and Magnetic Anisotropy	15
2.5 Polarization States and Dynamical Matrix	17
3. Optical Waves in Multilayers	19
3.1 Multilayer Matrix Construction	19
3.2 Polarization States in Isotropic Regions	20
3.3 Anisotropic Multilayers	21
4. Characteristic Matrix	25
4.1 The Role of the Characteristic Matrix	25
4.2 The Basic Magneto-Optical Configurations	25
4.3 Characteristic Matrix of Isotropic Layer	30
4.4 Characteristic Matrix of Anisotropic Layer	33
5. Prism Coupling	37
5.1 Prism Coupling to a Thin Layer with Transversal Magnetization	37
5.2 Reflection and Transmission Coefficients	40
5.3 Transversal Geometry	42
5.4 Prism Coupling to a Thin Layer with Longitudinal Magnetization	44

6. Gap Characteristic Matrix	47
6.1 Characteristic Matrix of Isotropic Gap	47
6.2 Coupling Gap in Transversal Magnetization	49
7. Waveguiding	51
7.1 Transversal Magnetization	51
7.2 Longitudinal Magnetization	55
7.3 General Magnetization	59
8. Structures with Absorbing Layer	64
8.1 Absorbing Film on a Transparent Substrate	64
8.2 Transparent Film on an Absorbing Substrate	68
9. Periodic Nanostructures	70
9.1 Lamellar Periodic Structures	70
9.2 Two-Dimensional Periodic Structures	73
9.3 Generalized Gratings	76
10. Plasmon Waves	78
10.1 Plasmon Wave Generation	78
10.2 Sensitivity Factors	80
10.3 SPR Structures with MO Response	84
11. Plasmonic Nanostructures with Waveguiding Effect	97
11.1 Optical Fano Resonance	97
11.2 Properties of SPP–WG System – Numerical Results	99
12. Diagnostics by Total Reflection	103
12.1 Planar Problems	103
12.2 TIRE on Periodical Structures	106
13. Inverse Problems	117
13.1 General Principles	117
13.2 Application Problem Examples	119
13.3 Optimization of SPR Systems	123
14. Effective Medium	128
14.1 Isotropic Materials	128
14.2 Anisotropic Media	129
List of Figures	134
