

<b>Preface.....</b>	<b>1</b>
<b>1 Fundamentals of Drilling Engineering.....</b>	<b>3</b>
1.1.The principle of rotary drilling.....	3
1.2. The major operations.....	5
1.2.1 Drilling .....	5
1.2.2 Adding drillpipe.....	6
1.2.3 The round trip .....	8
1.2.4 Casing.....	10
1.2.5 Installing the wellhead.....	10
1.2.6 Completion.....	11
<b>2 The Drilling Rig.....</b>	<b>12</b>
2.1. Introduction.....	12
2.2. Hoisting Equipment.....	15
2.2.1 The hoisting tower structure.....	15
2.2.1.2 The mast.....	18
2.2.1.3 The guyed trailerized mast.....	20
2.2.1.4 Substructures.....	22
2.2.2 Hoisting mechanism.....	22
2.2.2.1 The drilling line reeving system.....	22
2.2.2.2 The Drawworks.....	25
2.2.2.3 Auxiliary brakes.....	28
2.2.2.4 Rig floor tools and equipment.....	30
2.3 Rotation System Rotating Equipment.....	34
2.3.1 The rotary table.....	38
2.3.2 The Kelly.....	39
2.3.2.1 The kelly saver sub.....	41
2.3.2.2 The swivel.....	41
2.3.3 The power swivel.....	41
2.3.4 Circulation system. Pumping equipment.....	43

2.3.4.1 Conventional requirements.....	45
2.3.4.2 Circulating pumps.....	46
2.3.5 Power and power transmission.....	47
2.3.5.1 Prime movers.....	47
2.3.5.2 Power transmission systems.....	48
2.3.6 The control panel.....	49
<b>3 Drilling Fluids.....</b>	<b>51</b>
3.1 Functions and characteristics of drilling fluids.....	51
3.1.1 Transporting cuttings to the surface.....	51
3.1.1.1 Annular velocity of the fluid.....	51
3.1.1.2 Density.....	51
3.1.1.3 Viscosity.....	51
3.1.2 Suspending the cuttings when circulation is stopped.....	53
3.1.3 Cooling the bit and lessening drill string friction.....	53
3.1.4 Consolidating the walls of the hole.....	53
3.1.5 Preventing inflows of formation fluids into the well.....	53
3.1.6 Acting as a drilling parameter.....	53
3.1.7 Transmitting power to a downhole motor.....	53
3.1.8 Providing geological information.....	54
3.1.9 Conclusion.....	54
3.2 Mud measurement.....	54
3.2.1 Density.....	54
3.2.1.1 Definition.....	54
3.2.1.2 Measurement apparatus.....	54
3.2.2 Viscosity.....	55
3.2.2.1 Marsh viscosity.....	55
3.2.2.2 Fann viscosity.....	56
3.2.3 Filtrate.....	59
3.2.3.1 Description.....	59
3.2.4 Solids content.....	59

3.2.4.1 Definition.....	59
3.2.4.2 Measurement.....	59
3.3 Different types of drilling mud and main components.....	59
3.3.1 The main mud products.....	60
3.3.1.1 Viscosifiers.....	60
3.3.1.2 Filtrate reducers.....	60
3.3.1.3 Dispersants.....	60
3.3.1.4 pH control.....	61
3.3.1.5 Calcium precipitation.....	61
3.3.1.6 Weighting materials.....	61
3.3.1.7 Lost circulation materials.....	61
3.3.2 Types of drilling fluids.....	61
3.3.2.1 Water-base muds.....	61
3.3.2.2 Oil-base muds.....	63
3.3.3 Drilling with air, foam or aerated mud.....	66
3.3.3.1 Drilling with air.....	66
3.3.3.2 Drilling with foam.....	66
3.3.3.3 Drilling with aerated mud.....	66
3.3.4 Completion and workover fluids.....	66
3.3.4.1 Pay zone drilling fluid.....	67
3.3.4.2 Completion fluid.....	67
3.3.4.3 Packer fluid.....	68
<b>4 Blowout Preventers.....</b>	<b>70</b>
4.1 General introduction.....	70
4.2 Different types of BOPs.....	71
4.2.1 Ram-type preventers.....	71
4.2.2 Bag-type preventers.....	73
4.2.3 Rotating preventers.....	74
4.2.4 Inside preventers.....	75
4.3 Different BOP stack combinations.....	76

4.4 BOP hydraulic control systems.....	79
4.4.1 Control principles.....	79
4.4.2 Hydraulic unit operation.....	80
4.5 The well control circuit.....	81
4.6 Safety equipment.....	83
<b>5 Casing and Cementing Operations.....</b>	<b>86</b>
5.1 The casing operation .....	86
5.1.1 Preparing the borehole .....	86
5.1.2 Preparing the casing string.....	88
5.1.2.1 Shoes.....	91
5.1.2.2 Landing Collars.....	91
5.1.2.3 Centralizers.....	91
5.1.2.4 Scratchers.....	92
5.1.2.5 Hydrobonders.....	92
5.1.2.6 Cementing baskets.....	92
5.1.2.7 Cementing heads.....	93
5.1.2.8 Cementing plug.....	93
5.1.2.9 Specific equipment for two-stage cementing.....	93
5.1.2.10 Liner cementing equipment.....	94
5.1.3 Lowering the casing.....	94
5.2 The cementing operation.....	95
5.2.1 Principles of cementing methods.....	96
5.2.1.1 Primary cementing.....	96
5.2.1.2 Stage cementing.....	97
5.2.1.3 Cementing liners.....	98
5.2.1.4 Squeeze cementing.....	100
5.2.1.5 Positioning plugs of cement.....	101
5.2.2 Choosing the cement slurry.....	102
5.2.2.1 Cement characteristics.....	104
5.2.2.2 Cement hydrating mechanisms.....	104

5.2.2.3 Cement additives.....	106
5.2.2.4 Miscellaneous agents.....	107
5.2.2.5 Spacers.....	107
5.2.2.6 Choosing the type of flow.....	108
5.2.3 Implementation.....	109
<b>6 Drill String.....</b>	<b>111</b>
6.1 The Kelly .....	112
6.2 Drill Pipe.....	112
6.3 The Tool Joints.....	113
6.4 The heavy weight drill pipe .....	114
6.5 Drill Collars .....	117
6.6 The stabilizers .....	118
6.7 The drill string subs .....	124
6.8 The jars .....	126
6.9 Specific problems encountered in directional boreholes while conducting shale gas exploration.....	131
6.9.1 Effect of a simple lever.....	132
6.9.2 Drill string stabilization.....	133
6.9.3 Pendulum effect.....	134
<b>Conclusion.....</b>	<b>136</b>
<b>References.....</b>	<b>138</b>
