

CONTENTS

- 257 Editor's Choice
M. H. Laughlin and M. Vornanen

CARDIOVASCULAR

- 259 Gene expression profiling of exercise-induced cardiac hypertrophy in rats
M. Iemitsu, S. Maeda, T. Miyauchi, M. Matsuda and H. Tanaka

CELL BIOLOGY

- 271 Ion channel regulation of the dynamical instability of the resting membrane potential in saccular hair cells of the green frog (*Rana esculenta*)
F. Jørgensen and A. B. A. Kroese
- 291 Novel Brugada syndrome-causing mutation in ion-conducting pore of cardiac Na⁺ channel does not affect ion selectivity properties
A. S. Amin, A. O. Verkerk, Z. A. Bhuiyan, A. A. M. Wilde and H. L. Tan

ENDOCRINOLOGY AND METABOLISM

- 303 *Escherichia coli* derived factors modulate human granulosa cell steroidogenesis
J. Reinsberg, S. Christoffel, A. Kumar and H. van der Ven
- 313 A single bout of exercise is followed by a prolonged decrease in the interstitial glucose concentration in skeletal muscle
J. Henriksson and M. Knol

EXERCISE

- 321 Neuromuscular function during prolonged pedalling exercise at different cadences
G. Sarre and R. Lepers

MUSCLE

- 329 Protein kinases A and C stimulate the Na⁺ active transport in frog skeletal muscle without an appreciable change in the number of sarcolemmal Na⁺ pumps
R. A. Venosa

MISCELLANEOUS

- 335 Comparison on plasma caesium kinetics in goats and horses with special emphasis on exercising horses
M. Kaikkonen and S. Hyypä
- 341 Acknowledgement to Referees
- 345 Author index
- 347 Subject index
