Foreword v
List of Phonetic Symbols and Signs viii

Part I Speech and Language

1	Communication	3
	Speech	3
	Writing	3
	Language	4
	Redundancy	5
	Phonetics and Linguistics	6
2	The Production of Speech	9
	The Speech Chain	9
	The Speech Mechanism	10
	Sources of Energy—the Lungs	10
	The Larynx and Vocal Cords	10
	The Resonating Cavities	13
	The Mouth	15
	The Lips	15
	The Tongue	16
	Articulatory Description	18
3	The Sounds of Speech	21
	Quality, Pitch, Loudness, Length	21
	The Speech Wave	22
	The Acoustic Spectrum—Vowels, Consonants	23
	Pitch—The Fundamental Frequency	26
	Loudness—Intensity	27
	Duration—Length	28
	Hearing	29
4	The Description and Classification of Speech Sounds	31
	Phonetic Description	31

Vowel and Consonant	31
The Consonantal Type	33
Egressive Pulmonic Sounds	33
Place of Articulation	33
Manner of Articulation	34
Semi-vowels and Frictionless Continuants	35
Fortis-Lenis	35
Classification of Consonants	36
Egressive Glottalized Consonants	36
Ingressive Articulations	38
The Vowel Type	38
Difficulties of Description	39
The Cardinal Vowel Scale	40
Nasality	42
Pure and Gliding Vowels	43
Classification of Vowels	44
5 Sounds in Language	47
Speech Sounds and Linguistic Units	47
The Linguistic Hierarchy	48
The Phoneme	49
Diversity of Phonemic Solutions	50
Relevant Features of Phonemes	51
Allophonic Variants	51
Neutralization of Phonemes	53
Conditions of Phonemic Analysis	54
The Word as a Basis for Phonemic Analysis	55
The Syllable	55
The Phonetic Approach	56
The Linguistic Approach	57
Vowel and Consonant	57
Notation	58
Prosodic Features	60
Paralinguistic Features	61

Part II The Sounds of English

6 The Historical Background	65
Phonetic Studies in England	65
Palsgrave, Salesbury	65
Spelling Reformers—Smith, Hart, Gil	66
Phoneticians—Wallis, Wilkins, Cooper	67
Eighteenth Century—Johnson, Sheridan, Walker, Steele	70
Nineteenth Century—Pitman, Ellis, Bell, Sweet	71

Sound Change	72
Types of Change	73
Rate and Route of Change	75
Sound Change and the Linguistic System	76
Evidence for Reconstruction	78
OE Sound System	84
ME Sound System	84
eModE Sound System	85
PresE Sound System	86
Modifications in the English Sound System	86
Standards of Pronunciation	87
Emergence of a Standard	88
Present-day Situation	89
7 The English Vowels	93
The Distinctive Vowels	93
Vowel Glides	95
Vowel Length	96
Phonemic Interpretation of the Vowels	98
Description of Vowels	100
Acoustic Features	101
Pure Vowels	101
/i:/	101
/ɪ/	103
/e/	106
/æ/	108
/ʌ/	110
/ɑ:/	112
/ɒ/	114
/ɔ:/	116
/ʊ/	119
/u:/	120
/ɜ:/	123
/ə/	125
Diphthongal Glides	128
/eɪ/	128
/aɪ/	131
/ɪə/	132
/əʊ/	134
/aʊ/	137
Diphthongs + [ə]	139
Centring Diphthongs	142
/ɪə/	142
/ɛə/	144
/ʊə/	145
Weakly Accented Vowels	146

Frequency of Occurrence of RP Vowels	149
8 The English Consonants	151
The Distinctive Consonants	151
Class A—Consonants Involving Closure or Stricture	152
Plosives	152
Phonetic and Phonemic Features	153
Acoustic Features	156
The Release Stage	157
/p, b/	161
/t, d/	163
/k, g/	166
[ʔ]	168
Affricates	172
Phonemic Status	172
Acoustic Features	174
/tʃ, dʒ/	175
/tr, dr/	177
Fricatives	178
Phonetic and Phonemic Features	178
Acoustic Features	180
/f, v/	181
/θ, ð/	183
/s, z/	185
/ʃ, ʒ/	188
/h/	190
Class B—Non-fricative or Glides	193
Nasals	193
/m/	194
/n/	196
/ŋ/	197
Laterals—/l/	199
Post-alveolar Frictionless Continuant—/r/	204
Semi-vowels	211
/j/	212
/w/	214
Frequency of Occurrence of RP Consonants	217

Part III The Word and Connected Speech

9 The Word	221
Accent	221
Prominence	222

Word Accentual Patterns	226
Word Pattern Instability	230
Distinctive Word Accentual Patterns	232
Elision	234
Advice to Foreign Learners	236
Phonotactic Possibilities	237
Tables of Word Initial and Final Phoneme Sequences	239
Variability in the Phonemic Structure of Words	253
10 Connected Speech	255
Accent	255
Manifestation of Accent	257
Stress and Rhythm	258
Quantity and Quality	260
Intonation	264
Accentual Function	265
Realization of Primary Accent	265
Types of Nucleus	266
Realization of Secondary Accent	269
Realization of Unaccented Syllables	272
Attitudinal Function	274
Falling Nuclei	275
Rising Nuclei	277
Falling-Rising Nuclei	278
Multi-nuclear patterns	279
Other Signals of Attitude	281
Advice to Foreign Learners	282
11 The Word in Connected Speech	283
Neutralization of Weak Forms	284
Variation Word Accentual Patterns	285
Phonetic Variations at Word or Morpheme Boundaries	286
Allophonic Variations	286
Phonemic Variations	288
Fortis-Lenis Variations	289
Variations of Place	290
Nasality and Labialization	292
Elision	292
Liaison	294
Juncture	295
Frequency of Occurrence of Monosyllabic and Polysyllabic Words	296
Advice to Foreign Learners	297
Styles of Connected Speech	297

Appendix

12 Teaching the Pronunciation of English	299
The Place of Pronunciation	299
The Choice of Models of Pronunciation	300
The Native Speaker	300
The Foreign Learner	301
Choice of Basic Model	301
A Wider-based RP	302
Performance Targets	303
Priorities	305
Accentuation	305
Segmental Systems	305
Sounds in Context	307
Intonation	307
RP High Acceptability	307
Vowels	308
Consonants	311
Sounds in Context	312
Accentuation	313
Intonation	314
Minimum General Intelligibility	315
Vowels	316
Consonants	318
Intonation	320
Sounds in Context	320
Teaching Methods	321
Production: Vowels	322
Production: Consonants	323
Production: Accentuation	323
Production: Intonation	324
Reception	325
Assessment	326
The International Phonetic Alphabet	328-9
Bibliography	331
Subject Index	341

Index

Except where otherwise stated, references are to page numbers. Phonetic symbols are placed at the end of the appropriate letter section. Only those authors' names mentioned in the main text, and usually of historical interest, are included. For authors whose current work has been referred to, see Bibliography.

- Accent, and vowel quality, 78, 87, 146–9; in word, 222–36; in connected speech, 255–74; variation of accentual pattern, 75, 232–4, 285; distinctive word patterns, 232–4; influence of word endings, 237; and intonation, 264–74
- Accentuation, teaching, Chap. 12; priority, 305; in high acceptability RP, 313; teaching method, 323
- Acoustic, aspect of speech, Chap. 3; spectrum, 23; features of RP vowels, 101; plosives, 156–7; affricates, 174; fricatives, 180–81; nasals, 193–4; laterals, 200; /r/, 206–7; /j, w/, 211–12
- Advanced RP, 91
- Affricate, 34; phonemic status, acoustic features, 172–4; detail, 175–8; affrication of plosives, 160, 164
- Air-stream, 10 *et seq.*; ingressive, egressive, 33, 36–8
- Allophones, 48; allophonic variants, 51–3, 286–8; in complementary distribution, 52; allophonic (narrow) notation, 59
- Alphabet, OE, 80
- Alveolar (teeth) ridge, 15; articulations, 15–17, 33, 152; plosive, 163–5; fricative, 185–8; nasal, 196–7; lateral, 199–204; tap, roll, 35, 207; instability, 236, 290–91, 293–4
- Amplitude, 13, 27, 222
- Anglo-Norman, AN, 72n.
- Apex, of tongue, 17
- Approximant, 35
- Aspiration, in plosives, 152–4; voice onset time, 153
- Assessment, methods, 326
- Assimilation, 286–92; allophonic, 286–8; of place of articulation, 286, 290–91; of voice, 287, 289; of lip position, 287; phonemic, 288–92; fortis-lenis, 289; nasality, 285, 292; labialization, 287, 292; in high acceptability RP, 312
- Attitudinal function, of intonation, 274–82; importance in teaching, 307, 314, 320
- Auditory, aspect of speech, Chap. 3; judgments, 39; skills, 321; feedback, 26, 323
- [æ], OE letter, 80; /æ/-/ɑ:/, 54, 91, 108–10; [æ] for [ɛr], 74; /æ/, length of, 94, 97, 108; detail, 108–10

- [a], Cardinal, 40; [a:] > [eɪ], 74, 82, 86, 130
 /aɪ/, detail, 131–2; /aɪə/, 139–42
 [ɑ], Cardinal, 40; /ɑ:/, detail, 112–14; /ɑ:/ and /æ/, 54, 91, 113–14; OE [ɑ:] > [əʊ], 79, 86, 136
 /aʊ/, detail, 137–9; /aʊə/, 139–42
- Back, of tongue, 17
 Back vowels, 44
 Bell, Alexander M., 71
 Bilabial articulations, 33; plosives, 161–3; nasals, 194–5
 Blade, of tongue, 17
 Body, in intonation, 269; step up in, 270
 Broad, notation, 58–9, 66
 /b/, detail, 161–2
 [β], 38
 [β], 16; for /b/, 160; for /w/, 183, 217
- Cardinal vowel, scale, diagram, 40–42, 65; values in minimum general intelligibility model, 317
 Central vowels, 45
 Centre, of tongue, 17
 Centring diphthongs, 142–6
 Chart, chief English consonantal articulations, 37
 Chronemes, 99
 Clear [l], 52, 54, 201–4
 Cleft palate speech, 15, 195, 196, 198
 Clicks, 38
 Close, vowels, 45
 Closing, stage of plosives, 152
 Coalescence, of phonemes, 86, 176, 190, 291
 Communication, Chap. 1
 Commutation, for consonants, 49; for vowels, 93–4
 Complementary distribution, 52
 Compound words, accentual patterns, 228–30
 Compression, stage of plosives, 152
 Connected speech, Chap. 10; accent in, 255–74; word in, Chap. 11; priority, 307; in high acceptability RP, 312; in minimum general intelligibility, 320–21
 Conservative RP, 91
 Consonants, acoustic features, 24; and vowels, 31–2, 57–8; types of, 33–8; classification and chart, 36, 37; in RP, 50, Chap. 8; chart, 37, 151; plosives, 152–72; affricates, 172–9; fricatives, 179–93; nasals, 193–9; laterals, 199–204; /r/, 204–11; semi-vowels, 211–17; examples of change, 74–5, 87; loss of, 87; frequency of occurrence, 217–18; elision of, 236, 293–4; priority in teaching, 305; in high acceptability RP, 311; in minimum general intelligibility, 318; teaching method, 323; assessment, 326
 Content words, 256, 259
 Continuant frictionless consonants, 35, 193–212
 Continuous nature of utterance, 21, 47, 283
 Contoid, 32
 Cooper, Christopher, 69
 Creaky voice, 13, 168
 [c], 167; > [tʃ], 75, 81, 174, 176
 [ç], 75, 192; loss of, 83, 87; for /j/, 212
- Dark [ɪ], 52, 54, 200–204; = [o], 52, 204
 Dental articulations, 33; plosives, 164; fricatives, 183–5; nasals, 196
 Dependent, sound change, 74
 Description, of articulations, 18–19, 31; and classification of speech sounds, Chap. 4
 Development, theoretical paths of, 79
 Devoicing, of consonants: plosives, 154; fricatives, 179; /r/, 153, 205, 206, 210; /l/, 153, 201, 202, 204; /j/, 153, 212–14; /w/, 153, 214–17
 Diachronic studies, 7, 70

- Dialectology, 7
 Dictionaries, early, 70
 Diphthongization, in sound changes, 86
 Diphthongs, 43; RP, 93–101; 128–46; + [ə], 139–42; falling, 128; centring, 142–6; rising, 95–6, 143, 145
 Discriminatory skills, 322
 Distinctive features, 51n.
 Distinctive word accentual patterns, 232–4
 Duration, 28–9, 60; of fricative noise, 181; of plosive closure, 156; of semi-vowels, 211–12
 /d/, detail, 163–5; instability of medial, 236, 297–8; of final, 290–91, 293–4
 /dʒ/, phonemic status, 172–4; detail, 175–7; < [d + j], 176, 213, 291; < [j], 75, 174, 176; for /ʒ/, 70, 190
 /dr/, phonemic status, 172–4; detail, 177–8
 [ð], OE allophone of /θ/, 75; OE letter, 80; /ð/, detail, 183–5
 [d], 38
 Early grammarians, evidence for reconstruction, 65–71, 83
 Early Modern English, eModE, 72n.; reconstruction of, 82–3; sound system and text, 85
 Ejective consonants, 36
 Electromyography, 10
 Elision, in word, 78, 234–6; in connected speech, 292–4; in high acceptability RP, 312
 Ellis, Alexander J., 71–2
 Elocution, 71
 Evidence for reconstruction, 78–83
 Explosion, stage of plosives, 152
 External sound change, 74
 [e], Cardinal, 40; [e:] > [i:], 76, 82, 86, 103; /e/, detail, 106–8
 /ei/, detail, 128–31; /eiə/, 139–42
 [ɛ], Cardinal, 40; [ɛ:] > [i:], 76, 86, 103
 /εə/, detail, 144–5
 [ə], spelling in OE, 80–81; result of weak accent, 78, 87; glides to, 94; /ə/, detail, 125–8; diphthongs +, 139–42; /ə/-/ɜ:/, 97, 123–4; /ə/, associated with weak accent, 95, 126–7, 147, 224–5, 261
 [əi], < [i:], 76, 86, 132
 [əʊ], 54, 76, 79, 86; [əʊ] > /aʊ/, 138; /əʊ/, detail, 134–6; /əʊə/, 139–42
 /ɜ:/, 74; detail, 123–5; /ɜ:/-/ə/, 97, 123–5; /ɜ:/-/əʊ/, 134–5; /ə/-/əʊ/, 134
 Falling diphthongs, 128
 Falling nucleus, 266–7; rising reinforcement, 268; and attitude, 275–7
 Falling-rising nucleus, 268; and attitude, 278–9
 Fashion, and change, 74
 Feedback, auditory, 30
 Flap articulation, 35, 207
Fonetik Jurnal, 71
 Foreign borrowings, and system, 74
 Formants, 23–4
 Form words, 256–7, 261–4
 Fortis articulation, 35–6, 151; plosives, 153; fricatives, 179; in assimilation, 287, 289
 Free variants, 52
 French words, distinctive accentual patterns, 232–4
 Frequency of occurrence, vowels, 149; consonants, 217–18; words, 296–7
 Frequency of vibration, fundamental, harmonics, 13, 22–7, 60
 Fricative articulations, 35; in RP, 178–81; detail, 181–93; acoustic features, 180; for plosives, 160
 Frictionless continuants, 35; in RP, 151, 193–211
 Front, of tongue, 16

- Front vowel, 44
 /f/, in OE with allophone [v], 77, 84, 87; detail, 181–3; < [x], 182
 Fundamental frequency, 22–7; laryngograph, 27
- General RP, 91
 Gil, Alexander, 67
 Gliding vowels, 44, 94–6, 128
 Glossic, 71
 Glottal articulations, stop [ʔ], 12–13, 34, 152; detail, 168–72; reinforcement of stops, 159; glottalized consonants, 36; fricative, /h/, 151–2, 190–93
 Glottis, 12–13
 Grammar, 6
 Grammatical words, 256–7, 261–4
 Graphology, 6
 Great Vowel Shift, 74, 78; summary, 86
 /g/, detail, 166–8
 [g], 38
 [j], > [dʒ], 75, 174, 176; 167; for /j/, 214
- Half-close, -open, vowels, 45
 Harmonics, 22
 Hart, John, 66–7, 88
 Head, intonation, 269
 Hearing mechanism, 29–30
 High acceptability RP, 303, 307
 Historical background, Chap. 6
 Hold, stage of plosives, 152
 /h/, detail, 190–93; restricted occurrence, 50; and /ŋ/, 52–3; insertion, 75, 87; OE /hn, hl, hr, hw/, 84, 192; loss of, in clusters, 87, in form words, 262; in analysis of long vowels and glides to [ə], 99–100
- i*-mutation, [u:] > [i:], 74
 Idiolect, 54
 Implosive articulations, 38
 Incomplete plosives, 158
- Independent sound change, 73
 Ingressive air-stream, 38
 Instability of final alveolar articulations, 290–91, 293–4; of medials, 236, 293–4
 Intelligibility, of spoken English in the world, 92; minimum general, 303, 315; restricted, 304
 Intensity, 27–8, 60, 181, 222
 Internal combinative sound change, 74; isolative change, 73
 International Phonetic Alphabet, chart, 328–9
 Intonation, Joshua Steele, 70; accentual and non-accentual functions, 264–5; accentual function, 265; realization, primary accent, 265; types of nucleus, tail, frequency of occurrence, 266–9; realization, secondary accent, 269–72; head, body, 269; realization, unaccented syllables, 272–4; attitudinal and grammatical functions, 277–83; multi-nuclear patterns, 274–82; priority in teaching, 307; in high acceptability RP, 314; in minimum general intelligibility, 320; teaching method, 324
 Intrusive /r/, 100, 208–9, 294
 Isochrony, 259
 [i], [i̯], Cardinal, 40–41; [i:] > [ai], 74, 76, 86, 132; /i:/, gliding, 94; /i:/-/ɪ/, 97–8; /i:/, detail, 101–3
 /ɪ/, detail, 103–6; and weak accent, 105, 147, 225, 261
 /ɪə/, detail, 142–4
- Johnson, Samuel, 70
 Jones, Daniel, Cardinal vowel system, 40–42, 72, 99, 143; 226
 Juncture, 295–6
 /j/, phonemic status, 95–6, 99–100, 212; detail, 212–14; = [ç], 212; coalescence with alveolars, 176, 190, 291

- [k'], 36
 /k/, allophones, 52; detail, 166–8
- Labialization, 34, 215; of /r/, 207; in assimilation, 288, 292
- Labio-dental articulations, 33; of /p/, 51, 162; fricatives, 181–3; of nasals, 53, 195, 196; frictionless continuant for /r/, 207
- Labio-velar semi-vowel, 214–17
- Language, 4–5
- Larynx, laryngoscope, 11–13; laryngograph, 27
- Lateral articulations, 35; in RP, with acoustic features, 199–200; /l/, detail, 200–204; release of plosives, 159–60
- Length, 21, 28–9, 60; of vowels, 96–8; of diphthongs, 128; before plosives, 154–5; before fricatives, 180; in word, 225; in connected speech, 260–64
- Lenis articulation, 36, 150; plosives, 153; fricatives, 179; in assimilation, 287, 289
- Lexical, words, 256
- Lexicon, Lexis, 6
- Liaison, in connected speech, 294–5
- Lingual roll [r], 35, 207
- Linguistic approach, to syllable, 57
- Linguistic hierarchy, 48–9
- Linguistic units, 47–8
- Linking /r/, 114, 118, 125, 127, 141, 144, 145, 146, 206, 208–9, 294; in teaching, 311
- Lips, 16; positions, 16; in assimilation, 287, 292
- Lisping, 179
- Locus, 157
- Loudness, 21, 27–8, 60, 222, 226, 259
- Lungs, 10–11
- [ɪ], [i], 52, 54; [ɪ], 58, 200–204; [i], 200–204, realized as vowel, 52, 202; [ɪ], 154, 201, 204; OE /hl/, 84, 203; /l/, detail, 200–204
- [ʌ], 214
- Manner of articulation, 34–5, 157
- Middle English, ME, 72n.; reconstruction of, 81–2; sound system and text, 84–5
- Minimal pairs, 49
- Minimum general intelligibility, 303, 315
- Minus transition, 157
- Models of pronunciation, 300; the native speaker, 300; the foreign learner, 301; choice of basic model, 301; performance targets, 303; high acceptability RP, 303, 307; minimum general intelligibility, 303, 315; restricted intelligibility, 304; assessment, 326
- Modified, regional pronunciation, 91–2
- Morpheme, 49; variations at boundaries, 286, 295–6
- Morphemics, morphophonemics, 6–7
- Mouth cavity, 13–19
- Multi-nuclear intonation patterns, 279–80
- /m/, detail, 196–7
- [m], neutralization of /m/–/n/, 53, 195, 196, 287
- Narrow, notation, 58, 70
- Nasal articulations, 14–15, 34; neutralization, 53; in RP, 193–4; acoustic features, 193–4; detail RP nasals, 194–9; nasal release of plosives, 159
- Nasal cavity, 14–15
- Nasalization, 14; in assimilation, 288, 292
- Nasalized vowels, 42, 288, 292
- Neutralization, of phonemes, 53, 195, 196; of weak forms, 284–5; through assimilation, 291
- Newton, Isaac, 67
- Noise component, in consonants, 22,

- 26, 32, 151, 156–7, 180–81
 Notation, 58–9, 71
 Nuclear accent, in word, 223; and intonation, 265
 Nucleus, intonation, types of, 266–9; multi-nuclear patterns, 279–80; in teaching, 324
 /n/, detail, 196–7; [ŋ], 58, 196; [ɪn] for [ɪŋ], 74, 198–9; OE /hn/, 84, 197; instability of final, 290
 /ŋ/, phonemic status, 52–3, 54, 76, 87; detail, 197–9; restricted occurrence, 50
 [ŋ], 199, 214
 Off-glide, of plosives, 153
 Old English, OE, 72n.; dialects, alphabet, reconstruction of, 79–81; sound system and text, 84
 Old French, OF, 72n.
 On-glide, of plosives, 152
 Open vowels, 45
 One tap [ɾ], 35, 207, 210
 Oral escape, 14
 Organs of speech, diagram, 11
 [o], Cardinal, 41; for [ɪ], 52
 [ɔ], Cardinal, 41; /ɔ:/- /ɒ/, 77, 94–5, 117–18; /ɔ:/, detail, 116–19
 /ɔɪ/, detail, 133–4; /ɔɪə/, 139–42
 [ɒ], Cardinal, 41; /ɒ/- /ɔ:/, 55, 73, 91, 115; /ɒ/, detail, 114–16
 [æ], Cardinal, 41
 [œ], Cardinal, 41
 [ø], Cardinal, 41; in OE, 87; > /i:/, 103
 Palaeotype, 71
 Palatal articulations, 34; semi-vowel, 212–14
 Palatalization, 17
 Palate, hard and soft, 14–15
 Palato-alveolar articulations, 34; affricates, 175–7
 Palatography, 18
 Palsgrave, John, 65
 Paralinguistic features, 61, 281
 Paths of development, 79
 Pharynx, 13–14; constriction of in /æ/, 108
 Phonation, *see* Voice
 Phoneme, 5, 48, 49–50, 219; RP consonantal, 50; diversity of solutions, 50–51; relevant features, 51; neutralization of, 53; conditions of analysis, 54–5; the word as a basis for analysis, 55; notation, 58–9; changes in distribution, 86; RP vowels, 93–5; potentiality of oppositions, 286; coalescence, 286; in assimilation, 288–92
 Phonetic description, 31
 Phoneticians, early, 65–70
 Phonetics and linguistics, 6–7
 Phonetic studies in England, 65–72
 Phonetic symbols, list, viii–x
 Phonographic Society, 71
 Phonology, 6
 Phonotactic possibilities, 237 *et seq.*
Phonotype, 71
 Pitch, 13, 21–2, 27, 60; and prominence in word, 222–3, 225; shift of pitch prominence, 232; in connected speech, 264–82
 Pitman, Isaac, 71
 Place of articulation, 33–4, 153, 179; variation, 286–7, 290–91
 Plosive articulations, 34; neutralization after /s/, 53; RP plosives, stages, significant features, 153–5; acoustic features, 156–7; release stage, 157–61; detail, 161–72
 Post-alveolar articulations, 34; affricates, 177–8; frictionless continuant /r/, 204–12
 Post-nuclear secondary accent, 271
 Pre-nuclear secondary accent, 269–71
 Present English, PresE, 72n.
 Primary accent, in word, 147, 223 *et seq.*; and intonation, 265 *et seq.*
 Production of speech, Chap. 2;

- productive competence, 301; production, vowels, 322; consonants, 323; accentuation, 323; intonation, 324
- Prominence, 27; and syllable, 56; in word, 221 *et seq.*; shift in word, 232; in connected speech, 255 *et seq.*; relative prominence of sounds, 224
- Prosodic features, 60–61
- Psycholinguistics, 7
- Pulmonic, source of energy, 10
- Pulse theory, and syllable, 56
- Puns, 83
- Pure vowels, 43
- Puttenham, George, 88
- /p/, detail, 161–3
- [p'], 36
- [ϕ], for /p/, 160; 178
- Quality, sound, 22–6; of weakly accented vowels, 78, 80–81, 87, 126–7, 146–9; and prominence in word, 223–5; variation in weak forms, 261–4
- Quantity, 28–9, 60; changes in, 75, 87; in OE, 81; of vowels, 96–8; and prominence in word, 225–6; and rhythm, 260
- r*-coloured vowels, 208
- Range, of intonation, 281
- Rate, of delivery, 28, 281
- Received Pronunciation, RP, 88–92; a wider-based, 302; high acceptability, 303, 307
- Receptive skills, 301, 325
- Reconstruction, evidence for, 78–83
- Redundancy, 5–6, 284, 286, 294; importance in comprehension, 304, 325
- Regional variants, 88, 90–92
- Release stage, of plosives, 152, 157–61
- Relevant features, of phonemes, 51
- Resonators, 13, 23
- Restricted occurrence, of phonemes, 50
- Retroflex articulations, 34; [ɭ], 207
- Retroflexion, 17
- Rhetoric, 71
- Rhymes, as evidence for reconstruction, 81, 83
- Rhythmic accent, in word, 148, 223–6; patterns, in word, 226–30; change of word pattern, 231–3, 285; distinctive patterns, 232–6; in connected speech, 258–60; rhythmic group, 258
- Rims, of tongue, 17
- Rising diphthongs, 95–6, 143, 145
- Rising nucleus, 267; and attitude, 277–8
- Roll articulations, 35, 207
- Rounded vowels, cardinal, 41
- Runic writing, 80
- [ɹ], 35, 205
- [r] (roll), variant for /r/, 207; /r/, detail, acoustic features, 204–11; loss of /r/, 87, 113, 118, 125, 143, 144, 146, 209; OE /hr/, 84, 209; restricted occurrence, 50
- [ʀ], [ʁ], uvular articulations, 34, 207
- Salesbury, William, 66
- Secondary accent, in word, 127, 147–8, 223 *et seq.*; in intonation, 265, 269–72
- Secondary articulation, 34
- Segment, sound, 47–8; teaching, 305, 308–12, 316–20, 322–3
- Semantics, 7
- Semi-vowels, 32, 35; in RP, 211–17; acoustic features, 211
- Shaw, Bernard, 66
- Sheridan, Thomas, 70
- Short vowels, in RP, 93–4
- Simple words, accentual patterns, 226–8
- Simplified Spelling Society, 66
- Smith, Thomas, 66

- Social variants, 88, 89–90
- Sociolinguistics, 7
- Sound changes, 72–3; types of, 73–5;
and linguistic system, 76–8
- Sounds in language, Chap. 5
- Source of energy, in speech, 10
- Special context forms, 283
- Spectrogram, 23–6
- Spectrum, acoustic, 23–6
- Speech, 1; physiological aspect, Chap. 2; speech chain, 9; speech mechanism, 10–19; as a continuum, 21, 47, 219, 283; sounds and linguistic units, 47–8; sounds, acoustic and auditory aspects, Chap. 3; synthesis, 29
- Spelling, as evidence for reconstruction, 80–83; standardization of, 70, 88
- Spelling-reformers, 66, 71
- Standards, of pronunciation, 87; emergence of, 88–9; regional, social variants, 89–92; teaching models, Chap. 12
- Steele, Joshua, 70
- Step up, in intonation body, 270
- Stress, 27, 60; early changes, 75, 82; in word, 221–34; shift in word, 232–4; influence of word endings, 237; shift in connected speech, 285; and rhythm, 258–60; and vowel quality, 78, 87, 126, 146–9, 223–5
- Styles, of connected speech, 297
- Supra-segmental features, 60
- Syllabic sounds, 58 (*see also* /m/, /n/, /l/, /r/)
- Syllable, 55–8; prominence, pulse theory, 56; linguistic approach, 57; unaccented, in intonation, 272–4
- Synchronic studies, 7, 78
- Synthesis, speech, 29
- System, changes in linguistic, 76–8, 86–7
- Sweet, Henry, 72
- /s/, with OE allophone [z], 75; /s/, detail, 185–8; /ns-nts/, 187; instability of final, 290–91
- [s'], 36
- /ʃ/, detail, 188–90; < [s + j], 190, 213, 290–91
- Tail, in intonation, 267
- Teaching, methods, 321 *et seq.*
- Teeth, 15; ridge, 15
- Tip, of tongue, 17
- Tolerances, in high acceptability
RP, vowels, 308–10; consonants, 311–12
- Tone, 22
- Tongue, parts of, 16–18; hollowing, grooving, 17–18
- Tonic accent, in word, 147, 223
- Trachea, 11
- Transcription, broad and narrow, 58–60, 71
- Transition, 26, 152, 157, 181, 194, 200, 206–7, 212, 286
- Types of sound change, 73–5
- /t/, phonetic features, 48; detail, 163–5; instability of medial, 236, 293–4; of final, 290–91, 293
- [t'], [ts'], [tl'], 36
- /tʃ/, phonemic status, 172–4; detail, 175–7; /nʃ-ntʃ/, 176; < [t + j], 176, 213, 291; < [c], 75, 81, 173, 176
- /tr/, phonemic status, 172–4; detail, 177–8
- /θ/, detail, 183–5; OE /θ/ with allophone [ð], 75; < /t/, 165, 185
- Unaccented, vowels in words, 78, 87, 146–9, 224; words in connected speech, 261–5; syllables and intonation, 265, 272–4; importance in teaching, 305, 313–14, 323–4
- Unrounded vowels, cardinal, 41
- Uvula, 15
- Uvular articulations, 17, 34, 35, 207
- [u], Cardinal, 41; /u:/, gliding, 94;

/u:/, detail, 120–23; [u:] > [au], 73, 82, 86; /u:/-/ʊ/, 91, 97, 119, 121
[ü], Cardinal, 41, 121
/ʊ/, detail, 119–20; > /ʌ/, 111; and weak accent, 147, 224, 261; [ʊ], 95
/ʊə/, detail, 145–6
[ui], Cardinal, 41; in /əʊ/, 135; in /au/, 138
[ʌ], Cardinal, 41; > /ʌ/, 111; for /ʊ/, 119; in /əʊ/, 135; in /au/, 138; for /l/, 202
[ɣ], for /g/, 160, 168, 178

Variants, free, 52

Velar articulations, 17, 34; plosives, 166–8; nasals, 197–9

Velarization, 34; of [t], 202; of /w/, 215

Velum, 15

Vibrator, 12–13, 22

Vocal folds, 11–13; frequency of vibration, 13, 22–3

Vocoid, 32

Voice, 12; in RP plosives, 154; fricatives, 179; nasals, 193, 195, 196, 198; /l/, 154, 200–202, 204; /r/, 154, 205–6, 210; /j/, 154, 212–14; /w/, 154, 214–17; in assimilation, 287, 289; voice onset time, 153

Vowels, acoustic structure, 24–6; in RP, 100; and consonants, 31–3, 57–8; type, 32, 38; description, 38–45; classification, 44–5; relatively pure and gliding, 43; vowel harmony, 74; change, rate, and route, 75–6; examples of change, 86–7; RP phonemes, Chap. 7; distinctive units, 93–4, 98–100, length, 96–8; phonemic interpretation, 98–100; detail, relatively pure, 101–28; diphthongal, 128–46; diphthongs + [ə], 139–42; centring diphthongs, 142–6; under weak

accent, 78, 87, 126–7, 146–9, 224; frequency of occurrence, 149; elision of, 235–6, 293; strong, weak, 224; priority in teaching, 305–6; in high acceptability RP, 308–10; in minimum general intelligibility, 316–18; teaching method, 322–3; assessment, 326–7

/v/, detail, 181–3; [v] allophone of OE /f/, 75; for /w/, 217

[v], for /r/, 207; for /w/, 217

[ʌ], Cardinal, 41; /ʌ/, 79, 86, 91; detail, 110–12

Walker, John, 70

Wallis, John, 67–9, 167

Weak form, 255–7, 260–64; neutralization of, 284–5; importance in teaching, 305, 313, 323–4

Wilkins, John, 67–9

Word, 49, Chap. 9; as a basis for phonemic analysis, 55; and connected speech, Part III; and accent, 221–2; and prominence, 222–6; accentual patterns, 226–34; pattern instability, 230–32; distinctive patterns, 232–4; elision in, 234–6; phonotactic possibilities, 237–9; initial and final sequences, Tables, 239–53; variability of phonemic structure, 253–4; quality and quantity in connected speech, 260–64; in connected speech, Chap. 11; variation of accentual patterns, 289–90; variations of boundaries in assimilation, 285; junctural features, 295–6; frequency of occurrence, 296–7

Writing, 3

/w/, phonemic status, 95–6, 99, 211–12; detail, 214–17; /w/-/ʍ/, 54, 214–17; [wa] > [wə, wɔ:], 74, 83, 116, 118, 292; OE /hw/, 84, 216; [wr] > /r/, 209

[ʍ], 54–5, 214–17

X-ray, photography, 10, 13, 18, 40, 47
 [x], 75, 178; loss of, 83, 87; allophone
 of OE /h/, 84; > [f], 182; for /k/,
 160
 [x'], 36
 [y], Cardinal, 41; in OE, 74, 84;

French, 81; > /ju:/, 122

/z/, detail, 185-8; [z] allophone of OE
 /s/, 75; for /d/, 160
 /3/, 74; detail, 188-90; restricted
 occurrence, 50; < [z + j], 190, 213,
 291; replaced by /d3/, 74, 190
