

# CONTENTS

## SECTION I Introduction

1. Introduction to the Immune System 2
2. Basic Concepts and Components of the Immune System 7
  - Innate Immunity, 7*
  - Adaptive Immunity, 8*
  - Components of the Immune System, 9*
  - Active and Passive Immunity, 9*
  - Phases of an Immune Response, 9*
  - Types of Immune Response, 9*

## SECTION II Antigen Recognition Molecules

3. Introduction to Antigen Recognition 15
  - Antigen Recognition Molecules, 15*
  - B-Cell and T-Cell Receptors, 16*
  - Major Histocompatibility Complex Molecules, 16*
4. Antigens and Antibody Structure 18
  - Antigens, 18*
  - Antibodies, 19*
5. Antibody-Antigen Interaction 25
  - Antigen-Binding Sites of Antibodies, 25*
  - Diagnostic Tests for Antibody or Antigen, 26*
6. Antibody Diversity 35
  - Immunoglobulin Genes, 35*
  - Immunoglobulin Classes, 41*
7. The T-Cell Receptor 44
  - Structure of the T-Cell Receptor, 44*
  - Generation of Diversity of the T-Cell Receptor Genes, 45*
  - Recognition of Antigen, 47*
  - Other Accessory Molecules Involved in T-Cell Function, 47*
8. Major Histocompatibility Complex 51
  - Genetic Organization, 51*
  - Regulation of Gene Expression, 51*
  - Structure of the Major Histocompatibility Complex Gene Products, 52*
  - Restriction of Antigen Recognition, 54*
  - Population Advantages of Polymorphism in the Major Histocompatibility Complex, 56*
  - Disease Correlations, 56*
9. Review of Antigen Recognition 59
  - Important Structural Features, 59*
  - Generation of Diversity, 60*

## SECTION III Physiology

10. Antigen Processing and Presentation 63
  - Pathways of Antigen Processing, 64*
  - Mechanisms of Antigen Processing, 64*
  - Evasion of Processing Pathways by Pathogens, 67*

11. Lymphocyte Activation 69
  - Antigen Receptors, 69*
  - Signaling Events, 71*
  - Amplification Through Signaling Pathways, 72*
  - Response, 74*
12. Hematopoiesis 77
  - Three Major Stages of Hematopoiesis, 77*
  - Lymphoid Cells, 78*
  - Myeloid Cells, 79*
13. Organs and Tissues of the Immune System 83
  - Primary and Secondary Lymphoid Organs, 83*
  - Lymphocyte Trafficking, 88*
14. B-Cell Development 94
  - Early B-Lymphocyte Development, 94*
  - The Mature B Cell, 96*
  - Somatic Mutation and Class Switching in Germinal Centers, 97*
  - Thymus-Independent Antigens, 98*
  - BI B Cells and Natural Antibodies, 99*
15. T-Cell Development 101
  - The Thymus, 101*
  - The Periphery: Naive T-Cell Activation by Antigen, 105*
16. T-Cell Interactions and T-Cell Help 111
  - Generation of Stimulated, or Primed, B and T Cells, 111*
  - Generation of Effector Cells, 113*
  - Providing the Most Appropriate Immune Response for a Given Pathogen, 113*
17. Immunologic Memory and Homeostasis 123
  - Long-Term Immunologic Memory, 123*
  - Lymphocyte Homeostasis, 126*
  - Apoptosis, 126*
18. Regulation of the Immune System 128
  - Tolerance, 128*
19. Brief Review of Immune Physiology 134
  - Integrated Immune System: Connections Between Adaptive and Innate Responses, 135*

## SECTION IV Innate Immunity

20. Constitutive Defenses Including Complement 139
  - Barriers to Infection, 139*
  - Extracellular Molecules of the Innate Immune System, 140*
21. Phagocytes 150
  - Phagocytic Cell Types, 150*
  - Phagocyte Production, 152*
  - Phagocyte Recruitment, 152*
  - Receptors on Phagocytes, 153*
  - Molecular Patterns, 153*
  - Actions of Phagocytes, 154*
  - Phagocyte Defects, 156*
  - Molecular Recognition by the Innate and Adaptive Immune Systems, 157*
