

CONTENTS

INTRODUCTION	5
THE TEST AND ITS ITEMS.....	9
EMPIRICAL ANALYSIS AND EVALUATION OF ITEMS	13
Psychometric characteristics of items.....	13
Dichotomic tests	14
Items with polynomic scale	19
Items with ordinal scale.....	20
SPSS-command tests	26
Bivariate analysis of the items.....	27
Dichotomic items.....	28
Items with polynomic scale	32
Items with ordinal scale.....	33
SPSS-task commands	36
SCALING AND STANDARDS OF THE TEST.....	37
Normalisation of distribution	37
Stanins.....	38
Stens.....	40
Z-transformation	41
Standards from Gaussian scales.....	42
SPSS-task commands	44
RELIABILITY.....	47
Theory of the test reliability in the framework of classical test theory.....	47
Empire of the test reliability (from the viewpoint of classical test theory).....	49
Parallel tests	49
Test-retest method.....	50
The split-half method.....	50
SPSS-task commands	54
VALIDITY	55
Evidence in favour of validity based on the test content.....	56
Evidence in favour of validity based on the internal structure of the test	57
Evidence in favour of validity based on the relation to the other variables.....	58
RELATIONSHIP OF RELIABILITY AND VALIDITY	61
BIBLIOGRAPHY	63
