

Table of Contents

Preface	vii
List of contributors	ix
Chapter 1. History of the use of AVHRR data for land applications. C.J. Tucker	1
Chapter 2. Basic Radiometric calibration of NOAA-AVHRR data. G. D'Souza	21
Chapter 3. Radiative transfer modelling for calibration and atmospheric correction. E. Vermote and J.C. Roger	49
Chapter 4. Absolute calibration of AVHRR channels 1 and 2. E. Vermote and N. El Saleous	73
Chapter 5. Aerosol retrieval and atmospheric correction. E. Vermote, N. El Saleous and B.N. Holben	93
Chapter 6. Land surface temperature retrieval from NOAA AVHRR data. J.V. Vogt	125
Chapter 7. Techniques for geometric correction of NOAA AVHRR imagery. G. D'Souza and T.D.G. Sandford	153
Chapter 8. Cloud detection using AVHRR data. K.T. Kriebel	195
Chapter 9. Recent advances in algorithm development to extract information from AVHRR data. M.M. Verstraete and S. Flasse	211
Chapter 10. Derivation of geophysical parameters from AVHRR data. G. Dedieu	231
Chapter 11. Land cover mapping for global change research. G. Saint	265
Chapter 12. NOAA AVHRR based tropical forest mapping for south-east Asia, validated and calibrated with higher spatial resolution imagery. J.P. Malingreau, F. Achard, C. Estreguil, H.J. Stibig, and G. D'Souza	279
Chapter 13. Use of AVHRR data for the study of vegetation fires in Africa: Fire management perspectives. J-M. Grégoire	311

Chapter 14.	Crop production assessment for the European Union: The MARS-STAT Project including the use of NOAA-AVHRR data. P. Vossen	337
Chapter 15.	The use of AVHRR-derived land surface temperature estimates for agricultural monitoring. B. Seguin	357
Chapter 16.	Integration of AVHRR and fine spatial resolution imagery for tropical forest monitoring. R.M. Lucas	377
Chapter 17.	AVHRR data acquisition, processing and distribution at the European Space Agency (ESA). O. Arino	395
Chapter 18.	AVHRR data acquisition, processing and distribution at NOAA. K.B. Kidwell	433
Chapter 19.	AVHRR data sets for global terrestrial ecosystem monitoring. A.S. Belward	455
Subject Index		471
