

CONTENTS

Foreword	4
Akanbi M. A., Okunuga S. A. Analysis of Basic Properties of 2-stage Multiderivative Explicit Runge-Kutta Methods	11
Bányai T., Bákai T. Reengineering of Assembly Cells Based on Simulation Supported Experiment	14
Ben Tahar N. Algerian Condensate Recovery by Production of Clean Fuels	20
Benammar A., Draï R., Guessoum A. Ultrasonic Inspection of Composite Materials Using L^2 Norm Deconvolution	24
Beneš M. Analysis of Heat and Mass Flows in Concrete at High Temperatures	28
Blažíková M., Heřman P., Malínský J. Modeling of Nucleolar Self-assembly.....	34
Broukalová I., Vašková J. Application of Numerical Analysis to Behaviour of Fibre Concrete Elements	38
Bruncvík M., Čajánková P., Štemberk P. Reinforced Concrete Structure Blast Load Resistance	44
Burrascano P., Ricci M. Feature Extraction and Imaging Methods in Electromagnetic Non Destructive Testing of Metallic Materials	53
Cordero-Gracia M., Gómez M., Valero E. Mesh Motion Based on RBF Interpolation	57
Černý P., Štemberk P. Optimization Design of Concrete Shells in the Philips Pavilion	61
Čistý M. Comparison of Various Data Driven Models Application to the Soil Water Content Modeling	67
Čistý M., Bajtek Z. Water Distribution Systems Design by Applying Divide and Conquer Methodology with Stochastic and Deterministic Algorithms	72
Das S. K., Das R. A Mathematical Model to Characterize Erosion Behaviour of Boiler Grade Steels Impacted by Fly Ash in Coal Fired Power Plants	77
Das S. K., Kumari S. A Multi-Input Multi-Output Neural Network Model to Characterize Mechanical Properties of Strip Rolled High Strength Low Alloy (HSLA) Steel	83
Dlouhý L., Novák M. Optimization of Reinforced and Prestressed Concrete Structures	89
Dvorský T. Masonry Arches – Experimental Tests and Material Model	93

Elsharawy G. Middleware Requirements in Service-Oriented Architecture	97
Fajman P., Kruis J. Coupled Analysis of Reactor Vessels	101
Foglar M. Accelerated Construction of Ecological Bridges over Motorways	105
Fošumpaur P., Králík M., Zukał M. Physical and Numerical Modelling in Waterways Research	109
Frantová M., Šípál J. Predictive Control of Heat Consumption in Facility Management	114
Frantová M., Vala V. Analysis of Premature Demolding of Reinforced Concrete Beam	119
Freiberg F. Life Cycle Cost Management	123
Galaj J. A Hybrid Approach to Modelling of Fire in Compartments	127
Garipov E., Puleva T. Modeling and Simulation of Hydraulic Turbine Power Control	133
Hanuš V. Transversal Reinforcement of Concrete Structures Using Welded Reinforcement Grids	138
Hara T. Numerical Analysis and Design of Spherical Dome Structure	143
Havlásek P., Jirásek M. Modeling of Concrete Creep Based on Microprestress-Solidification Theory	147
Horníček L., Lidmila M. Simulation of Long-Term Behaviour of Antivibration Mats from Rubber Recyclate by Means of Cyclic Loading	153
Chan H., Huang Ch., Leu J., Wang Y., Huang Y. Numerical Simulation of Two-Dimensional Flow around Permeable Pile Groins	158
Chanpheng T. Structural Modeling of a Stupa for the Bone Relics of Lord Buddha	163
Chernyshev Y., Sokolov O. Event-Driven Simulation of Join Behavior of Objects with Complex Forms	168
Chernyshev Y., Sokolov O. Multiagent Simulation of Contact Disease Distribution Based on Event Approach	172
Ibatoulline E. A. Use of Consecutive Cluster-Procedure for Solution of Signal (Interference) Classes	176
Ibrahim M. A. New Active – Only Grounded and Floating Frequency Dependent Negative Conductance Simulators	180

Leu J., Traore S., Wang Y., Kan Ch. The Effect of Organic Matter Amendment on Soil Water Holding Capacity Change for Irrigation Water Saving: Case Study in Sahelian Environment of Africa	184
Leu J., Wang Y., Yang Ch., Deng L., Weng T. The Effect of Sediment Deposition Potential Due to Dredging – A Case Study of Laonong River Upstream	190
Jirkovský J., Houška J., Hofreiter M. Fault Detection and Isolation Based on Markov Chains	195
Juodagalviene B., Bausys R. Building Information Modelling in Civil Engineering Education	199
Kaiser J. Application of Association Rules in Missing Values Imputation in Categorical Datasets	203
Kala Z., Kala J. Variance-Based Sensitivity Analysis of Stability Problems of Steel Structures	207
Kalafutová P., Reiterman P. Modelling of Early Age Concrete Properties	212
Kalivoda J. Simulation and Experimental Implementation of an Active Controlled Two-Axle Railway Bogie ...	217
Karabegović I., Pašić S., Hodžić D. Fuzzy Logic Applications in Control Process of Mobile Robots	222
Kaziolas D. N., Abdalla K., Baniotopoulos C. C. Extended End-Plate Connections in Steel Structures: Numerical and Experimental Testing	225
Kisela J., Frantová M. Determination of Load Bearing Capacity of RC-Elements in Early Age Using Strut-and-Tie Model	230
Konecki M., Gałaj J., Pólka M. Modification and Validation of Chosen Fire Zone Models	238
Konfršt Z. Two Hard Optimization Problems with Parallel Gas	242
Korouš J. The Finite Element Method in Vehicle Development at Škoda Auto a. s.	248
Králík M., Satrapa L., Zúkal M. Hydraulic Model of the Emergency Spillways in the Koryčany Dam	252
Kratochvíl J., Malá D., Štemberk P., Reiterman P. Design and Construction of Concrete Canoe „Blue Lion“	256
Kuandykova D., Štemberk P. Analysis of Support Zones of Reinforced Concrete Beam During Construction Using Strut-and-Tie Model	260
Kučerová A., Lepš M., Vitingerová Z. Review of Methods in Nonlinear Models' Parameters Identification	265
Kučerová A., Mareš T. Artificial Neural Network as Universal Approximation of Nonlinear Relations	271

Kučerová A., Sýkora J. Bayesian Updating of Uncertainty in Description of Material Properties Using Polynomial Chaos Expansion	277
Mankovits T. Compression Tests on Rubber Buffer Using P-Versional FEM	283
Maree I. E. The Effect of Angle of Elevations on the Gyroscopic Stability for a Spin Stabilized Projectiles	288
Maruf D. R. Optimal Economic Load Forecasting for Multy Generators Using Neural Network	292
Marzi S. The Influence of The Adhesive Layer Thickness on the Fracture Behaviour of Structural Bonded Joints	296
Meglouli H., Ikhlef B., Chaib A., Hocine F. A. Fuzzy Control Applied to Industrial Systems (Flexible Manipulator Arm)	302
Mehrez S. Z. M. Traffic Stream Characteristics	307
Minkevičius S. A Mathematical Model of the Message Switching	313
Nagano H., Begg R., Sparrow W. Modelling Foot Trajectory Control During Walking	317
Nagdeve V., Kumar N. S. Fatigue Simulation of Bellows in Expansion Joint by Using Ansys Workbench	322
Náprstek J., Fischer C. Semi-Trivial and Post-Critical Behavior of a Double Degree of Freedom Auto-Parametric System Random Excitation	326
Němec M. Life Cycle Costing – Its Use, Assessment of the Problems of Application, Reconciling Theory and Practice in Construction Industry in the Czech Republic	332
