

# Contents

Preface . . . . .	vii
-------------------	-----

## Keynote lectures

*J. Chleboun*

Modeling Uncertainty with Emphasis on Non-Stochastic Approaches .	1
---	---

*D. Straub*

Optimal Decision Making with Incomplete Information or What's the Point of Modeling Uncertainty in Engineering? . . . . .	5
---	---

*H.G. Matthies*

Parametric Problems, Uncertainty Quantification, and Model Reduction	7
--	---

*G. Cottone*

Recent Developments of Fractional Calculus Based Models in Engineering . . . . .	9
--	---

## Extended abstracts

*J. Šejnoha*

Pragmatic Probabilistic Models for Quantification of Tunnel Excavation Risk . . . . .	11
---	----

*D. Jarušková*

Statistical Modelling of the Thickness of Tunnel Primary Lining Using Random Functions and Principal Component Analysis . . . . .	15
---	----

*O. Špačková, J. Šejnoha, D. Straub*

Dynamic Bayesian Network Model for Assessment of Tunnel Excavation Risk . . . . .	17
---	----

<i>M. Krejsa, P. Janas, V. Tomica, V. Krejsa</i> Direct Optimized Probabilistic Calculation - DOProC Method . . . . .	21
<i>J. Fischer, D. Straub</i> Spatial Reliability Assessment of Deteriorating Reinforced Concrete Slabs with Monitoring and Inspection Data . . . . .	25
<i>S. Miraglia, P. Dietsch, D. Straub</i> A Risk Based Approach for the Robustness Assessment of Timber Roofs	29
<i>C.M.W. Mok</i> Coping With Uncertainty in Water Resources Problems Using Relia- bility Approach . . . . .	33
<i>O.G. Ruíz Santamaría</i> Delays in Construction Tasks . . . . .	35
<i>D. Lehký, D. Novák</i> Inverse Reliability Analysis in Structural Design . . . . .	37
<i>M. Holický</i> Optimization of the Target Reliability Level in Engineering . . . . .	41
<i>M. Holický, M. Sýkora</i> Conventional Probabilistic Models for Uncertainty Modelling in Civil Engineering . . . . .	43
<i>A. Kučerová, J. Sýkora, H.G. Matthies, B.V. Rosić</i> Uncertainty Updating in Description of Coupled Transport Processes in Heterogeneous Materials . . . . .	45
<i>B.V. Rosić, T. El-Moselhy, A. Litvinenko, O. Pajonk, H.G. Matthies</i> Bayesian Identification for Non-Gaussian Parameters . . . . .	47
<i>O. Pajonk, B.V. Rosić, A. Litvinenko, H.G. Matthies</i> A Deterministic Filter for non-Gaussian Bayesian Estimation . . . . .	49

<i>K. Runtemund, G. Müller</i> Parameter Identification Using the Skewed Kalman Filter . . . . .	51
---	----

<i>A. Litvinenko, H.G. Matthies</i> Low-rank Response Surface with Application in Numerical Aerodynamic . . . . .	57
--	----

<i>M. Sýkora, M. Holický</i> Competitive Comparison of Load Combination Models . . . . .	59
---	----

<i>M. Sýkora, M. Holický</i> Global Resistance Factors for non-Linear Analysis of Reinforced Concrete Structures . . . . .	61
---	----

<i>D. Novák, M. Vořechovský, R. Rusina</i> Uncertainty Modelling Using Software FReET . . . . .	63
--	----

<i>M. Vořechovský</i> Correlation Control in Monte Carlo Type Sampling: Theoretical Analysis and Performance Bounds . . . . .	67
--	----

<i>D. Jürgens, R. Niekamp, M. Krosche</i> A Multi-Scale Framework for Stochastic Analysis of Multi-Phase Material . . . . .	71
--	----

<i>J. Zeman, T. Lombardo, M. Šejnoha</i> Microstructurally-Informed Random Field Description: Case Study on Chaotic Masonry . . . . .	73
--	----

Index of Authors . . . . .	75
----------------------------	----
