

Contents

List of Figures	ix
List of Tables	xi
Preface	xv
1. Introduction	1
2. Review of Linear Regression Models	11
3. Models for Binary Data	31
4. Loglinear Models for Contingency Tables	67
5. Multilevel Models for Binary Data	115
6. Statistical Models for Event Occurrence	167
7. Models for Ordinal Dependent Variables	221
8. Models for Nominal Dependent Variables	243
Appendix A: The Matrix Approach to Regression	269
Appendix B: Maximum Likelihood Estimation	277
References	297
Index	307
