CONTENTS

Series Editor's Introduction v

1. Introduction 1
A Review of Multiple Regression 4

2. Creating Dummy Variables 7
Choosing a Reference Group 9
Descriptive Statistics 12
Distributional Statistics 12
Correlation 13
Partial Correlations 16

3. Using Dummy Variables as Regressors 18
Regression With One Dummy Variable 19
Regression With Multiple Dummy Variables 21
Assessing Differences Between Specified Categories 22
Adding a Second Qualitative Measure 23
Predicted Values 25
Adding Quantitative Variables to the Specification 26

4. Assessing Group Differences in Effects 29
Specifying Interaction Effects 33
Separate Subgroup Regressions 48
Dealing With Heteroscedasticity 53
Interpreting Dummy Variables in Semilogarithmic Equations 56
Testing for Heteroscedasticity With More Than Two Groups 60
Methods for Making Multiple Comparisons With Nonindependent Tests 61

5. Alternative Coding Schemes for Dummy Variables 64
Effects-Coded Dummy Variables 64
Regression Results 67

Contrast-Coded Dummy Variables 71
Regression Results 73

6. Special Topics in the Use of Dummy Variables **75**
Dummy Variables in Logit Models 76
Testing for Curvilinearity 78
Piecewise Linear Regression 80
Dummy Variables in Time-Series Data 82
Dummy Variables and Autocorrelation 83

7. Conclusions **84**

Notes **85**
