

Figures

1.1	From <i>World Climate News</i> , number 16, July 1999. Geneva: World Meteorological Organisation. A similar map is prepared and published each year. Data from Climate Prediction Center, NOAA, USA.	page 3
1.2	Figure 2.7 from Watson, R. <i>et al.</i> (eds.) 2001. <i>Climate Change 2001: Synthesis Report. Contribution of Working Groups I, II and III to the Third Assessment Report of the Intergovernmental Panel on Climate Change</i> . Cambridge: Cambridge University Press.	5
1.3	From The role of the World Meteorological Organization in the International Decade for Natural Disaster Reduction. <i>World Meteorological Organization</i> 1990; 745. Geneva: World Meteorological Organization.	6
1.4	Adapted from: Canby, T. Y. 1984. El Niño's ill wind. <i>National Geographic Magazine</i> , pp. 144–83.	7
1.5	Figure SPM-1 from The summary for policymakers in Watson, <i>Climate Change 2001: Synthesis Report</i> .	11
2.1	The radiation balance of planet Earth.	15
2.2	A greenhouse has a similar effect to the atmosphere on the incoming solar radiation and the emitted thermal radiation.	18
2.3	The distribution of temperature in a convective atmosphere (full line).	19
2.4	Spectrum taken with the infrared interferometer spectrometer flown on the satellite Nimbus 4 in 1971 and described by Hanel, R. A. <i>et al.</i> 1971. <i>Applied Optics</i> , 10: 1376–82.	19
2.5	The blanketing effect of greenhouse gases.	20
2.6	The radiation budget for the atmosphere.	21
2.7	From Houghton, J. T. 2002. <i>The Physics of Atmospheres</i> , third edition. Cambridge: Cambridge University Press.	22
2.8	Illustrating the enhanced greenhouse gas effect.	24
3.1	Figure 1.1 from Bolin, B. and Sukumar, R. 2000. Global perspective. In Watson, R. T., Noble, I. R., Bolin, B., Ravindranath, N. H., Verardo, D. J., Dokken, D. J. (eds.) <i>Land use, Land-use Change, and Forestry</i> , IPCC Special Report. Chapter 1. Cambridge: Cambridge University Press.	30
3.2	Figure 10 from Technical summary. In Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) <i>Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change</i> . Cambridge: Cambridge University Press.	32

- 3.3 Both (a) and (b) are from Schimel, D. *et al.* 1994. CO₂ and the carbon cycle. In *Climate Change 1994*. Cambridge: Cambridge University Press. For more recent data see also House, J. I. *et al.* 2003. Reconciling apparent inconsistencies in estimates of terrestrial CO₂ sources and sinks. *Tellus*, **55B**, pp. 345–63. 33
- 3.4 Figure 3.4 from Prentice, I. C. *et al.* 2001. The carbon cycle and atmospheric carbon dioxide. Chapter 3 in Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) *Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press. 34
- 3.5 From the UK Hadley Centre. See Cox, P. M. *et al.* 2000. Acceleration of global warming due to carbon-cycle feedbacks in a coupled climate model. *Nature*, **408**, pp. 184–7. 41
- 3.6 Figure 4.1 from Prather, M., Ehhalt, D. *et al.* 2001. Atmospheric chemistry and greenhouse gases. Chapter 4 in Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) *Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press. 42
- 3.7 After Kiehl, J. T., Briegleb, B. P. 1995. Summary for policymakers. In *Climate Change 1994*. Cambridge: Cambridge University Press. 49
- 3.8 Figure 6.6 from Ramaswamy, V. *et al.* Chapter 6 in Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) *Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press. This source also gives details of regional variations of forcings. 50
- 4.1 Figure 1(a) from Summary for policymakers. In Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) *Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press. Improved analysis and updated to 2003 by the Hadley Centre, UK Meteorological Office. 57
- 4.2 Figure 4 from Technical summary. In Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) *Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press. 60
- 4.3 Figure 5 from Technical summary. In Houghton, J. T., Ding, Y., Griggs, D. J., Noguer, M., van der Linden, P. J., Dai, X., Maskell, K., Johnson, C. A. (eds.) *Climate Change 2001: The Scientific Basis. Contribution of Working Group I to the Third Assessment Report of the Intergovernmental Panel on Climate Change*. Cambridge: Cambridge University Press. This figure is based on data from Mann, M. E. 1999. *Geophysics Research letters*, **26**, 759–62. 65
