Introduction	12
About Art within This Book	14
1. Introduction to Spalting Fungi.....	16
Definition.....	17
White Rot Fungi	
<i>Trametes versicolor</i>	18
<i>Bjerkandera adusta</i>	19
<i>Polyporus brumalis</i>	19
<i>Xylaria polymorpha</i>	19
<i>Inonotus hispidus</i>	20
Pigmenting Fungi.....	20
<i>Scytalidium cuboideum</i>	20
<i>Scytalidium ganodermophthorum</i>	21
<i>Chlorociboria</i> species.....	21
Blue stains	22
<i>Monascus</i> species.....	22
<i>Fistulina hepatica</i>	22
<i>Fusarium</i> species.....	23
Comparative Guide to Spalting	24
Wood Species Guide with Known Fungi by Region	24
Wood Species Guide with Unknown Fungi by Region	34
Popular Woods with Color That Is Not Spalting.....	40
2. Identifying Spalted Wood Microscopically	42
Definition.....	43
Basic Wood Anatomy.....	43
Methods of Identification.....	43
Known Spalting Fungi	44
<i>Scytalidium cuboideum</i>	44
<i>Chlorociboria</i> species.....	45
Zone Lines	46
Unknown Spalting Fungi	47
Green Zone Lines.....	47
Orange Zone Lines.....	48
Purple Stain	50
3. Spalting Origins in the Fifteenth Century.....	52
Historical Developments	53
Early Appearance of Inlay Techniques.....	53
Use of Wood Species and Dyes	57
Discovery of Blue-Green Wood	57
Historical Applications	58
Brown Oak as Intarsia Veneer	65
Historical Applications	66

4. Natural Wood Colors in the Sixteenth Century 68

 Historical Developments 69

 Intarsia Techniques 69

 Local Wood Species and First Coloring Attempts 69

 The Spread of Green-Stained Wood 71

 Switzerland, Tyrol, and Innsbruck 71

 Augsburg and Southern Germany 78

 Central and Northern Germany, Sweden 83

 Use of *Chlorociboria* Wood 86

 Occurrence and Production 86

 Manufacture of Veneer 87

 Color Palette 89

 Surface Treatment 91

Miraculum Green-Spalted Wood 92

 White Rot to Imitate Materials 94

 Examples of Use 95

5. Precious Materials in the Seventeenth Century 96

 Historical Developments 97

 Combining Materials in Marquetry 97

 Staining and Dyeing Techniques 101

 Green-Spalted Wood for Color Accents 102

 Northern Germany, Augsburg, Franconia 102

 Bohemia 106

 Blue-Gray Fungal Staining 111

 Historical Use 112

6. Colorful Marquetry in the Eighteenth Century 114

 Historical Developments 115

 New Wood Species and Marquetry Techniques 115

 Inventions in Staining and Dyeing 119

 Decline of Green-Spalted Wood 121

 Southern German Masters 121

 Green-Spalted Wood: A Natural Phenomenon 127

 Scientific Treatises 128

 Zone Lines as a Design Element 130

 White Rot in Walnut Veneer 130

 East-Asian Export Furniture with Spalted Veneers 131

7. Science in the Nineteenth Century 134

 Historical and Stylistic Developments 135

 Veneer and Marquetry Techniques 136

 Staining and Dyeing Methods 139

 Green Oak in Tunbridge Ware 141

 Elf's Cup Research 145

 Further Classification of the Fungus 145

 Xylindein Research 146

 Culturing *Chlorociboria* 147

 Brown Oak, Zone Lines, Blue and Red Stained Wood 147

8. Divergent Paths of the Twentieth Century	150
Historical Developments	151
Blue and Green Stain Research in the Early 1900s	151
Early Attempts at Characterizing Fungal Pigments	152
Blue and Pink Stains	153
Brown Oak and Golden Oak	153
Evolution of the Zone Line	154
Melvin and Mark Lindquist	155
The Lindquists in the 1960s	156
Brown Oak as a Designer Veneer	156
Reintroduction of Spalted Wood in the 1970s	157
David Ellsworth	158
Science in the 1970s	159
Exponential Growth in the 1980s	160
James Krenov	160
Extractions and Zone Lines	161
Stabilizing Spalted Wood	162
First Attempts at Inducing Spalting	164
A Better Understanding of Zone Lines and <i>Chlorociboria</i> Species	165
9. Blend of Art and Science in the Twenty-First Century	168
Growing Popularity	169
International Interest	169
North American Scholarly Work	170
Robinson Laboratory	171
The US Forest Service and Canada Begin Spalting	172
10. Modern Spalting	176
Canada	177
University of Toronto	177
Haliburton Forest & Wildlife Reserve	179
Forintek—FPInnovations	179
Chile	179
France	180
Germany	182
Ireland	184
Netherlands	184
Peru	185
Sweden	185
USA	185
Art and Craft	186
White Rot	186
Extracted and Reapplied Fungal Pigments	188
Brown Oak	189
Zone Lines	190
Pigments—Blues, Greens, and Blue-greens	196
Pigments—Yellow and Brown	198
Combinations	199

11. DIY Guide to Controlled Spalting	210
Setup	211
Method 1—Quick and Dirty.	212
Method 2—The Warehouse.	212
Method 3—The Scientific Warehouse	212
Method 4—The Science.	213
Important Tips for Any Form of DIY Spalting	214
Pairing Fungi	215
Appendix I: Oregon State University Research	216
Appendix II: Modern Uses of Blue Stain	222
Appendix III: Color Variations in	
<i>Chlorociboria</i> Wood	228
Appendix IV: Spalted Jewelry	234
Appendix V: List of Spalted Wood	
Suppliers by Country.	242
Notes	244
Glossary	262
Bibliography.	266
Index	280
