| INTRODUCTION | 6 |
| 1 CURRENT STATE OF CBR IN THE RESEARCH AREA..... | 7 |
| 1.1 HUNT'S MODEL | 8 |
| 1.2 4R MODEL | 8 |
| 2 CLASSIFICATION MODEL OF AIR QUALITY | 9 |
| 2.1 Air quality model..... | 9 |
| 2.1 Modelling using Rough sets | 11 |
| 2.2 Modelling using CBR and a combination of rough-fuzzy sets | 12 |
| 2.3 Summary of Achieved Results for Air Quality Assessment Models | 15 |
| 3 CLASSIFICATION MODELS IN NONBANK FINANCIAL INSTITUTION... | 16 |
| 3.1 Model of CBR | 17 |
| 3.2 Standard CBR, time view, and base cleaning..... | 18 |
| 3.2 Methods of k-Nearest Neighbours..... | 20 |
| 3.3 Experimental methods of investigation the surroundings of the case | 20 |
| 3.4 Rough distance | 22 |
| 3.5 Hybrid dynamic model with use of CBR | 23 |
| 3.6 Summary of achieved results of client classification models..... | 24 |
| 4 THESIS OBJECTIVES..... | 25 |
| 5 CONCLUSIONS | 27 |
| REFERENCES | 29 |
