<b>Preface</b>	ix
Author's preface	xi
<b>SECTION I</b>	
<b>Survey</b>	<b>I</b>
<b>1 Testing, testing . . . What is a language test?</b>	<b>3</b>
Understanding language testing	4
Types of test	5
Test purpose	6
The criterion	7
The test-criterion relationship	10
Conclusion	11
<b>2 Communication and the design of language tests</b>	<b>13</b>
Discrete point tests	13
Integrative and pragmatic tests	14
Communicative language tests	16
Models of communicative ability	17
Conclusion	21
<b>3 The testing cycle</b>	<b>23</b>
Understanding the constraints	24
Test content	25
Test method	26
Authenticity of response	27
Fixed and constructed response formats	29
Test specifications	31
Test trials	32
Conclusion	33

<b>4 The rating process</b>	35
Establishing a rating procedure	36
The problem with raters	37
Establishing a framework for making judgements	38
Rating scales	40
Holistic and analytic ratings	43
Rater training	44
Conclusion	44
<b>5 Validity: testing the test</b>	47
Threats to test validity	50
Test content	50
Test method and test construct	52
The impact of tests	53
Conclusion	54
<b>6 Measurement</b>	55
Introduction	55
Measurement	56
Quality control for raters	56
Investigating the properties of individual test items	59
Norm-referenced and criterion-referenced measurement	62
New approaches to measurement	64
Conclusion	65
<b>7 The social character of language tests</b>	67
Introduction	67
The institutional character of assessment	68
Assessment and social policy	68
Assessment and educational policy	69
The social responsibility of the language tester	70
Ethical language testing	72
Accountability	72
Washback	73
Test impact	74
Codes of professional ethics for language testers	75
Critical language testing	76
Conclusion	77

<b>8 New directions—and dilemmas?</b>	79
Computers and language testing	79
Technology and the testing of speaking	81
Dilemmas: whose performance?	83

## Purpose

What justification might there be for a series of introductions to language study? After all, linguistics is already well served with introductory texts: expositions and explanations which are comprehensive, authoritative, and excellent in their way. Generally speaking, however, their way is the essentially academic one of providing a detailed initiation into the discipline of linguistics, and they tend to be lengthy and technical: appropriately so, given their purpose. But they can be quite daunting to the novice. There is also a need for a more general and gradual introduction to language: transitional texts which will ease people into an understanding of complex ideas. This series of introductions is designed to serve this need.

Their purpose, therefore, is not to supplant but to support the more academically oriented introductions to linguistics: to prepare the conceptual ground. They are based on the belief that it is an advantage to have a broad map of the terrain sketched out before one considers its more specific features on a smaller scale, a general context in reference to which the detail makes sense. It is sometimes the case that students are introduced to detail without it being made clear what it is a detail of. Clearly, a general understanding of ideas is not sufficient: there needs to be closer scrutiny. But equally, close scrutiny can be myopic and meaningless unless it is related to the larger view. Indeed it can be said that the precondition of more particular enquiry is an awareness of what, in general, the particulars are about. This series is designed to provide this large-scale view of different areas of language
