Introduction	1
<b>PART ONE: BASIC LANGUAGE TEACHING SKILLS</b>	
<b>1 Presenting and practising vocabulary</b>	<b>5</b>
The importance of vocabulary teaching; modes of presentation (ostensive means, verbal definition, audio presentation, running context); choosing which vocabulary to present (developing guesswork strategies); a step by step presentation procedure (sound and the meaning, repetition, written form, illustrative sentence, practice, the illustrative context); the importance of review; student exercise books; dictionaries	
<b>2 Presenting and practising structures</b>	<b>16</b>
Teaching useful structures (the presentation of a structure, a step by step procedure, making practice meaningful); functions (creating a context or situation, identifying the structure)	
<b>3 Presenting and practising grammar points</b>	<b>26</b>
What is grammar? (the difference between grammar and structure lessons); methods of teaching grammar (the deductive method, the inductive method, the eclectic way); examples of grammar teaching (introducing tenses, practising tenses, examples of grammar practice activities)	
<b>4 Conducting meaningful drills</b>	<b>40</b>
Using drills; the principles of a drill (the repetition drill); chaining (forward chaining, back chaining); other kinds of drill (the substitution drill, the ripple drill, chinese whispers, incremental drill, the transformation drill, variational drills)	
<b>5 Using pair and group work</b>	<b>49</b>
Organising pair work (the teacher's role during pair work, introducing pair work, steps in using pair work, suitable activities for pair work); organising group work (the role of the teacher in group work, suitable group work tasks)	

## 6 Oral work: elicitation techniques 59

Encouraging students to talk; the range of question forms and prompts (short-answer elicits, using short-answer elicits with beginners, longer-answer elicits, getting students to question each other); managing the class during question time (good nomination strategies); coping with mixed abilities (keeping them all involved); errors and mistakes (the nature of errors, the nature of mistakes); dealing with mistakes and errors; mistakes during practice (indicating the mistake, obtaining corrections, avoiding practice mistakes); errors and mistakes during a free expression phase (monitoring errors, correcting mistakes)

## PART TWO: STANDARD LESSON TYPES

### 7 Exploiting the text 77

The need for variety; evaluating a text (linguistic complexity, length, interest level, aims); selecting language for formal presentation (the value of the language, the linguistic context); reading and listening in the foreign language (reading aloud, listening with a purpose); dealing with a text (introduction and task setting, reading and listening, exploiting the text further); demonstration exploitation (text: military life, presentation and guiding questions, listening, exploitation, summary of the three stage lesson); teacher's reading aloud (guidelines to observe)

### 8 Exploiting dialogues 92

The nature of dialogues; determining an approach (possible approaches); demonstration lessons (the comprehension approach, the rote learning approach, the creative approach, expanding dialogues); creating your own dialogues; procedure for directing an improvised dialogue); the audience

### 9 Using the blackboard 101

The importance of blackboard work; using the blackboard properly (some golden rules, laying out grammar structures, evaluating blackboard models, language practice tables); simple blackboard sketches (faces, age and sex, stick figures, actions, buildings, objects); building up pictures (movement, the teacher's talk'n chalk, using composite pictures for review)

### 10 Making and using simple teaching aids 119

Enlivening learning; aids requiring little preparation (flashcards, a clock face, the digital clock, wordcards, letter cards, number cards, magazine pictures, moving pictures, figure puppets, realia); aids

requiring some preparation (the magnet board, the felt board, wall posters, the portable blackboard, the whiteboard, worksheets)

## **11 Planning lessons 138**

The benefits of planning; planning the lesson (decide the aim of the lesson, select the key language, choose your approach); a 3-stage lesson (the three p's, the lesson as a unit); the shape of a lesson plan; some sample lesson plans (the skeleton plan, a completed lesson plan for a listening lesson, a completed plan for a dialogue-based lesson, a completed plan for an oral lesson)

## **PART THREE: INTRODUCING VARIETY INTO TEACHING AND LEARNING**

## **12 Language learning games 153**

The value of play; number and letter games (bingo, secret messages, prices, count again); word games (word sets, word building, card scrabble, my shopping basket, anything to declare?, sound chains, letter chains, word associations, the grammar focus game); speaking games (what's my line?, animal, vegetable or mineral?, chain story)

## **13 Songs and rhymes 164**

The benefits of music and rhyme (pop songs and poems); ways of teaching songs and rhymes (the ostensive way, translation, cloze texts, focus questions, true-false statements, private study, jigsaw listening, disappearing texts, dictation, mixed modes of presentation); demonstration procedures (selected songs and rhymes); the words of other popular songs; the words of other popular rhymes

## **14 Revision and homework 180**

Reactivation processes; the place of revision; revising grammar points (choosing a grammar point for revision, ways of revising grammar points); revising vocabulary (ways of revising vocabulary); setting and marking homework (kinds of assignment, using worksheets)

## **15 Classroom testing 191**

Testing and teaching (testing and learning); testing the four skills (objectively versus subjectively marked tests); testing reading comprehension, testing listening comprehension, speaking tests); marking schemes for speaking and writing tests (marking written tests, marking grids for speech); analysing results (central scores)

## 16 Improving pronunciation: sounds and spellings 210

Phonetics for teachers (the spoken model, phonetics and the classroom); the vowels of English (pure vowels, diphthongs, some specific vowel features); the consonants of English (familiar IPA symbols for consonant sounds, new consonant symbols, consonant clusters); improving the perception and pronunciation of sounds (teaching techniques); diagnosing problems of aural discrimination (the procedure, worked example)

## 17 Improving pronunciation: the music of English 224

The suprasegmentals; stress (vowel reduction, teaching stress and rhythm patterns); pulse and rhythm; intonation (intonation moves, questions with falling intonation, questions with rising intonation, techniques for focusing on intonation)

## PART FOUR: DEVELOPING RECEPTIVE AND COMMUNICATIVE SKILLS

## 18 Encouraging creative language use 235

Genuine speech (features of natural communication, language for socialising, management language, natural language forms); reading aloud in a speech like way (text, teacher's spoken version); the teacher's speech role at different stages of the lesson (presentation and practice, the production stage)

## 19 Developing listening skills 244

Listening and language acquisition; listening activities (listening games, passage length listening activities); external aids (class visitors, types of recorded materials, guidelines for making recordings)

## 20 Developing reading skills 255

Reading and language teaching (attributes of real reading, classroom approximations to real reading); using authentic texts (availability and sources, copying texts economically, contriving semi-authentic texts, using textbook passages); class reading tasks (scanning tasks, skimming tasks, intensive reading tasks, extensive reading tasks); conducting reading lessons with authentic materials (preparing the text, conducting the lesson, possible extension activities)

## 21 Developing writing skills 268

Writing and language teaching (ways of correcting written work, global marking); controlled writing (examples of controlled writing)

tasks); guided writing (examples of guided writing tasks); writing from maps, graphs and statistical data, pen friends

## 22 Developing oral skills

282

Language, communication and meaning; discussions and debate (organising discussion groups, using discussion cues, project presentations, topic talks); drama activities (role adoption, prescribed role play, free role play, free role play from a text); the communicative approach and the information gap (the nature of information gap materials, adapting the communicative approach for large classes, information gap activities)

## Keep reading
