

Contents

	Preface	xiii
	Introduction	1
PART I	foundations	
1	What We Talk About When We Talk About Visualization	27
	To Learn More	40
2	The Five Qualities of Great Visualizations	41
	The Hockey Stick Chart	43
	Truthful	45
	Functional	50
	Beautiful	53
	Insightful	59
	Enlightening	60
	To Learn More	65
PART II	truthful	
3	The Truth Continuum	69
	Dubious Models	71
	The Mind, That Clumsy Modeler	76
	Why Are We So Often Mistaken?	79
	Mind Bug 1: Patternicity	81
	Mind Bug 2: Storytelling	82
	Mind Bug 3: Confirmation	84
	Truth Is Neither Absolute, Nor Relative	86
	The Skills of the Educated Person	97
	To Learn More	97
4	Of Conjectures and Uncertainty	99
	The Scientific Stance	100
	From Curiosity to Conjectures	101
	Hypothesizing	105
	An Aside on Variables	105

On Studies	107
Doing Experiments	110
About Uncertainty	112
To Learn More	116

PART III functional

5 Basic Principles of Visualization	121
Visually Encoding Data	123
Choosing Graphic Forms	125
A Grain of Salt	129
Practical Tips About those Tricky Scales	135
Organizing the Display	138
Put Your Work to the Test	141
To Learn More	148
6 Exploring Data with Simple Charts	151
The Norm and the Exceptions	152
The Mode, the Median, and the Mean	153
Weighting Means	155
Range	157
Some Fun with Ranges	160
To Learn More	166
7 Visualizing Distributions	167
The Variance and the Standard Deviation	171
Standard Deviation and Standard Scores	173
Presenting Stories with Frequency Charts	178
How Standardized Scores Mislead Us	183
Peculiarities of the Normal Distribution	188
Percentiles, Quartiles, and the Box Plot	191
Manipulating Data	194
Frequency Over Time	195
To Learn More	197
8 Revealing Change	199
Trend, Seasonality, and Noise	201
Decomposing a Time Series	201
Visualizing Indexes	210

From Ratios to Logs	214
How Time Series Charts Mislead	217
Communicating Change	220
To Learn More	231
9 Seeing Relationships	233
From Association to Correlation	236
Smoothers	240
Matrices and Parallel Coordinate Plots	242
Correlation for Communication	248
Regression	257
From Correlation to Causation	259
Data Transformation	261
To Learn More	262
10 Mapping Data	263
Projection	265
Data on Maps	271
Point Data Maps	271
Line Maps	277
The Basics of Choropleth Maps	280
Classifying Data	282
Using Choropleth Maps	287
Other Kinds of Data Maps	293
To Learn More	296
11 Uncertainty and Significance	299
Back to Distributions	302
The Standard Error	305
Building Confidence Intervals	308
Disclosing Uncertainty	312
The Best Advice You'll Ever Get: Ask	316
How Has Stuff Been Measured?	317
Dispatches from the Data Jungle	318
Significance, Size, and Power	321
To Learn More	325

PART IV practice

12 On Creativity and Innovation	329
The Popularizers	334
News Applications	338
Those Enchanting Europeans	356
Making Science Visual	360
Culture Data	364
The Artistic Fringes	367
Epilogue	375
Index	376
