Preface

xi

1 Introduction: Psychology and climate change

1

Susan Clayton and Christie Manning

1.1 Direct impacts of climate change on human society

2

1.2 The role for psychology

3

1.3 Outline of the volume

5

1.4 Summing up

8

References

9

Part I Perceptions and Communication

11

2 Perceptions of climate change

13

Lorraine Whitmarsh and Stuart Capstick

2.1 What are public perceptions and why do they matter?

13

2.2 How do people perceive climate change?

14

2.3 How have public perceptions of climate change developed over time and across nations?

17

2.4 What influences public perceptions of climate change?

23

2.5 Conclusion

25

References

26

3 Climate change communication: Challenges, insights, and opportunities

35

Ezra M. Markowitz and Meaghan L. Guckian

3.1 Introduction

35

3.2 Why is climate change communication so challenging?

38

3.3 Improving climate change communication efforts

41

3.4 Moving forward: New approaches and future directions

50

3.5 Concluding thoughts

53

References

54

4	Social construction of scientifically grounded climate change discussions	65
	<i>Janet K. Swim, Nathaniel Geiger, Julie Sweetland and John Fraser</i>	
4.1	Social construction of scientifically grounded climate change discussions	65
4.2	The importance of conversations	66
4.3	Barriers to conversations	68
4.4	Improving conversations	70
4.5	Applying research in practice	74
4.6	Effects of training on educators and visitors to informal science learning centers	79
4.7	Conclusion	85
	Appendix A Details about study	86
	Acknowledgements	87
	References	87
5	A diversity science approach to climate change	95
	<i>Adam R. Pearson and Jonathon P. Schuldt</i>	
5.1	A diversity science approach to climate change	95
5.2	Why diversity matters for climate change	96
5.3	Identity influences beyond partisan politics	99
5.4	Motivational barriers across groups	103
5.5	Implications for organizational outreach and policy	112
5.6	Conclusion	115
	Acknowledgements	116
	References	116
Part II	Responding to Climate Change	125
6	Contributions of psychology to limiting climate change: Opportunities through consumer behavior	127
	<i>Kimberly S. Wolske and Paul C. Stern</i>	
6.1	Introduction	127
6.2	Determinants of behavior	132
6.3	Influencing consumer energy behavior: What does psychology know?	135
6.4	Conclusions and research agenda	146
	Acknowledgment	149
	References	149
7	Understanding responses to climate change: Psychological barriers to mitigation and a new theory of behavioral choice	161
	<i>Robert Gifford, Karine Lacroix and Angel Chen</i>	
7.1	Why aren't we taking (more) action?	162

7.2	Psychological barriers: The dragons of inaction	163
7.3	Developing an instrument for measuring psychological barriers	169
7.4	The Dragons of Inaction Psychological Barriers (DIPB) instrument	172
7.5	Practical applications	174
7.6	Future research directions	176
7.7	Incorporating psychological barriers into a new model of behavior choice	176
7.8	Conclusion	178
	References	179
8	Environmental protection through societal change: What psychology knows about collective climate action—and what it needs to find out	185
	<i>Sebastian Bamberg, Jonas H. Rees and Maxie Schulte</i>	
8.1	The social psychology of climate change	187
8.2	Conceptualizing group-based behavior: The social identity model of collective action	188
8.3	Becoming a collective climate protection activist: From normative conflict to social validation and consensualizing	196
8.4	Collective climate action as a source of personality development and well-being	202
8.5	Conclusion: Developing an environmental psychology approach for explaining societal transition processes	206
	References	208
Part III	Wellbeing and Resilience	215
9	Threats to mental health and wellbeing associated with climate change	217
	<i>Christie Manning and Susan Clayton</i>	
9.1	Introduction	217
9.2	Physical health effects of climate change	218
9.3	Mental health impacts from acute climate-related events	219
9.4	Mental health impacts from chronic climate changes	221
9.5	Impacts of climate change on social relationships	227
9.6	Vulnerable populations	228
9.7	Toward resilience	233
9.8	Conclusion	234
	References	235
10	Individual impacts and resilience	245
	<i>Thomas J. Doherty</i>	
10.1	How climate change impacts mental health: Three pathways	246
10.2	Cultural diversity, intersectionality and climate justice	249

10.3	Climate change: Vulnerability and risk factors for mental health impacts	250
10.4	Mental health disorders associated with global climate change	252
10.5	How climate change threatens psychological flourishing	253
10.6	Barriers to psychological coping with climate change: Complexity, disinformation, and powerlessness	255
10.7	Steps toward coping with global climate change as an individual	255
10.8	Therapeutic responses to climate change impacts	259
10.9	A positive message: Thriving in the era of global climate change	261
	References	262
11	Psychological perspectives on community resilience and climate change: Insights, examples, and directions for future research	267
	<i>Daniel A. Chapman, Carlie D. Trott, Linda Silka, Brian Lickel and Susan Clayton</i>	
11.1	What is community resilience?	268
11.2	Why are community resilience perspectives important for advancing climate change psychology?	271
11.3	Research on community resilience	276
11.4	Practical recommendations to foster resilience	278
11.5	Future directions for research	280
11.6	Conclusion	284
	References	284
	Index	289
