

CONTENTS

Isothermal Measurement of Salt Sorption in Porous Building Materials Hannah Benešová, Milena Pavlíková.....	6
Long-term Behaviour of GFRP Tendon Jindřich Fornůsek, Petr Konvalinka.....	13
Typical and Critical Details of Building Envelopes with Thermal Insulation Systems Jan Kočí, Jiří Maděra, Robert Černý.....	22
Hygric and Thermal Properties of Building Materials as Necessary Input Data for Computational Modelling of Coupled Heat and Moisture Transport Václav Kočí, Jan Kočí, Jiří Maděra, Robert Černý.....	34
Salt Scaling Resistance of Concrete with Added Metakaolin Petr Máca, Michal Hlobil, Petr Konvalinka.....	46
Vliv Prostředí na Alumosilikátové Polymerní Malty na Bázi Alkalicky Aktivovaného Úletového Popílku Nguyen Anh Duong, František Škvára.....	55
Mechanical Principle of Phases Separation in Modified Lime Plaster Radka Pernicová, Milena Pavlíková.....	71
Sledování Trvanlivosti Pohledových Betonů Pavel Reiterman, Karel Kolář.....	80
Flexural Capacity of the CFRP Prestressed Concrete Slabs Radoslav Sovják, Riikka Heikkilä, Jan Vitek, Petr Konvalinka.....	89

Experimental Investigation of ECC Mechanical Properties Exposed to Aggressive Environment

Jaroslav Pekař, Petr Kabele.....107

Selection of Fixing Nodes in FETI-DP Method Using Graph Theory

Jaroslav Brož, Jaroslav Kruis.....119

Newton Method for Elasto-Plasticity Problems

Martin Čermák.....136

Modeling of Concrete Creep Based on Microprestress-Solidification Theory

Petr Havlásek, Milan Jirásek.....147

Parallel SVD computation and application to color texture retrieval

Petr Kotas.....162

On the efficient triangulation of random point sets

David Krybus, Bořek Patzák.....175

The Inexact Solution of the Primal Part in the Domain Decomposition Method

Martin Menšík.....188

Selective aggregation technique and Schwarz-type parallel preconditioners for heterogeneous problems

Vojtěch Sokol.....196

Multi-objective parameters estimation for affinity model of cement paste hydration

Zuzana Vitingerová, Matěj Lepš, Vít Šmilauer.....204
