

CONTENTS

The blue planet (Earth)	4
Portraits of the Earth (Maps)	6
The science of the Earth (Geology)	8
The building blocks of rocks (Minerals)	9
Earth's history books (Rocks)	10
Four and a half billion years (Geological time)	12
Ancient remains (Fossils)	14
Our jigsaw planet (Continents and plates)	15
Rocky peaks (Mountains)	18
When the Earth cracks (Earthquakes)	19
Mountains of fire (Volcanoes)	20
Natural sculptors (Erosion)	22
Underground caverns (Caves)	24
Dry as a bone (Deserts)	25
Fresh water (Rivers and lakes)	26
Rivers of ice (Ice caps and glaciers)	28
Where land meets sea (Coasts)	29
A billion billion tonnes of water (Oceans)	30
Ebb and flood (Tides)	32
A blanket of air (Atmosphere)	33
The atmosphere today (Weather)	35
Rivers of air (Winds)	37
Water's never-ending journey (Water cycle)	38
Water in the sky (Clouds)	39
Raindrops and snowflakes (Rain and snow)	40
A hundred million volts (Thunder and lightning)	41
Patterns in the weather (Climate)	42
The yearly cycle (Seasons)	44
Getting hotter (Global warming)	45
