## 1 Getting Started on Your Literature Review

1

Introduction

1

Systematic reviews versus systematic approaches

2

Chapters overview

2

Working your way through this book

3

Examples of review challenges and how this book can help

4

Getting started

5

## 2 Taking a Systematic Approach to Your Literature Review

9

Introduction

9

Why is the literature review so important?

11

Where does a literature review fit within the context of research?

12

What types of research question are suitable for literature review?

13

Why review the literature?

13

A brief history of research synthesis

14

What is the place of theory in literature review?

17

The traditional narrative review, the systematic review and 'systematic approaches'

17

Why be systematic?

19

Introducing the SALSA framework

23

Systematic approaches

27

Summary

28

## 3 Choosing Your Review Methods

36

Introduction

36

Acknowledging your review constraints

37

Some review choice scenarios

43

Summary

49

## 4 Planning and Conducting Your Literature Review

55

Introduction

55

Project management

57

Updates to existing reviews

58

Conversion of reviews to a different format

60

Skills and resources	62
Polishing skills in writing and presentation	65
Stages of the literature review	68
Problem solving and troubleshooting	74
Summary	78
<b>5 Defining Your Scope</b>	<b>83</b>
Introduction	83
Why is defining the scope important?	84
Defining your scope with an audience in mind	85
Frameworks for defining the scope	86
Complex interventions	88
Further defining your scope	92
Defining the scope: challenges and pitfalls	97
The review protocol	99
Summary	102
<b>6 Searching the Literature</b>	<b>108</b>
Introduction	108
Stages in the literature searching process	110
Stage 1: Scoping search	111
Stage 2: Conduct the search	115
Stage 3: Bibliographic searching	121
Stage 4: Verification	122
Stage 5: Documenting your search	123
Types of literature reviews	125
Translating your search question	129
Summary	135
<b>7 Assessing the Evidence Base</b>	<b>141</b>
Introduction	141
Assessing the relevance of studies to your research question	142
Steps in the selection process	143
Using reference management software for study selection	144
Assessing your included studies – first steps	145
Study designs – is there a hierarchy of evidence?	149
Quality assessment: validity, reliability and applicability	151
Doing quality assessment	155
Existing reviews in your subject area	156
Using checklists	158
Quality assessment of qualitative research	160
Applying quality assessment	162
Issues and challenges in quality assessment	163
Summary	164
<b>8 Synthesising and Analysing Quantitative Studies</b>	<b>171</b>
Introduction	171
Synthesis-analysis, analysis-synthesis?	172
Overview of approaches to synthesis	172

Extracting quantitative data for your review	173
Planning your synthesis strategy	179
Approaches to synthesis	181
Analysis of quantitative research	195
Identifying gaps	197
Revisiting the review question	198
Discussing the limitations of the evidence	199
The risk of bias tool	199
Publication bias	202
Selective outcome reporting bias	205
Summary	207
<b>9 Synthesising and Analysing Qualitative Studies</b>	<b>215</b>
Introduction	215
Synthesis-analysis: an iterative process	216
Overview of approaches to qualitative synthesis	216
Extracting qualitative data for your review	218
A generic approach to qualitative evidence synthesis	222
Planning your synthesis strategy	224
Getting started in qualitative synthesis	226
Progressing to more advanced forms of synthesis	229
Identifying the disconfirming case	234
Methods of qualitative synthesis	235
Integrating quantitative and qualitative data	237
Analysing what you find	239
Matching the analysis to the review purpose	250
Discussing the limitations of the evidence	252
Methods for integrating qualitative and quantitative data	254
Using analysis to examine an integrated synthesis	261
Summary	262
<b>10 Writing, Presenting and Disseminating Your Review</b>	<b>272</b>
Introduction	272
Identifying recommendations for action	273
Highlighting recommendations for future research	273
Considering your audience	274
What is required	279
A sample review structure	282
Standards for the reporting of reviews	286
Use of tables and figures	289
Use of appendices and other supporting features	290
Accurate referencing	290
Other types of review	293
Summary	295
<i>Glossary</i>	301
<i>Index</i>	318
