

## CONTENTS

The institute and its scientific board .....	V
The staff and the field of work .....	VI
1. INTRODUCTION .....	1
2. STUDIES OF COMPONENTS OF ECOSYSTEMS OF RESERVOIRS AND THEIR INFLOWS .....	5
2.1. Substances dissolved and dispersed in water of reservoirs .....	5
2.1.1 Substances dissolved and dispersed in water of the Římov, Slapy and Orlík Reservoirs ..	5
2.1.2 Phosphorus epilimnion loading and wind-induced flow as the key factors for phytoplankton growth and distribution in the Římov Reservoir .....	9
2.2. Bacteria and BOD .....	10
2.2.1 BOD in the Římov Reservoir and its tributaries .....	10
2.2.2 Year-round ciliate assemblage development in the Římov Reservoir .....	10
2.3. Phytoplankton .....	14
2.3.1 Long-term study of phytoplankton in the Slapy Reservoir .....	14
2.3.2 Importance of the river inflow for the spring development of phytoplankton in the Římov Reservoir .....	19
2.4. Zooplankton .....	20
2.4.1 Net zooplankton in the Slapy and Římov Reservoirs .....	20
2.4.2 Long term observations on the relations of the biomass of phytoplankton, Cladocera and Copepoda .....	20
2.5. Fish .....	22
2.5.1 The development of fish populations of the Římov Reservoir .....	22

2.5.2	Ichtyoplankton of the Římov Reservoir .....	23
3.	SPECIAL INVESTIGATIONS .....	25
3.1.	Dynamics of N-acetylglucosamine in fresh water ...	25
3.2.	Nutrients concentration and microbial activities in acidified lakes (Bohemian Forest) .....	27
3.3.	Microbial selection in anaerobic-oxic systems ....	31
3.4.	Size-selective grazing by freshwater ciliates and impact of protozoan grazing on structure, production, and ectoenzyme activity of bacterial assemblage .....	33
3.5.	Diurnal periodicity in Daphnia reproduction .....	35
3.6.	Daphnia and Cyclops in experimental mesocosms ....	37
3.7.	Investigations of the pools in the inundation area of the River Lužnice in Southern Bohemia .....	38
	PUBLICATIONS .....	40
