

# Contents

- Preface 6
- Acknowledgements 7
- Units, symbols and abbreviations 8

## Part 1 General

- 1 Recognizing the unwell patient 12
- 2 Admission and ongoing management of the acutely unwell patient 14
- 3 Monitoring in acute and critical care medicine 16
- 4 Oxygen transport 18
- 5 Cardiopulmonary resuscitation 20
- 6 Shock 22
- 7 Circulatory assessment 24
- 8 Fluid management 26
- 9 Fluid choice: specific situations 28
- 10 Inotropes and vasopressors 29
- 11 Failure of oxygenation and respiratory failure 30
- 12 Oxygenation and oxygen therapy 32
- 13 Airways obstruction and management 34
- 14 Non-invasive ventilation 36
- 15 Endotracheal intubation 38
- 16 Mechanical ventilation 40
- 17 Respiratory management, weaning and tracheostomy 42
- 18 Arterial blood gases and acid–base balance 44
- 19 Analgesia, sedation and paralysis 46
- 20 Enteral and parenteral nutrition 48
- 21 Hypothermia and hyperthermia 50
- 22 SIRS, sepsis, severe sepsis and septic shock 52
- 23 Hospital-acquired (nosocomial) infections 54
- 24 End of life issues 56

## Part 2 Medical

### Cardiac

- 25 Acute coronary syndromes I: clinical pathophysiology 58
- 26 Acute coronary syndromes II: investigations and management 60
- 27 Arrhythmias 62
- 28 Heart failure and pulmonary oedema 64
- 29 Cardiac emergencies 66
- 30 Deep venous thrombosis and pulmonary embolism 68

### Respiratory

- 31 Community-acquired pneumonia 70
- 32 Hospital-acquired (nosocomial) pneumonia 72
- 33 Asthma 74
- 34 Chronic obstructive pulmonary disease 76
- 35 Acute respiratory distress syndrome 78
- 36 Pneumothorax and air leaks 80
- 37 Respiratory emergencies 82

### *Renal and metabolic*

- 38 Acute kidney injury: pathophysiology and clinical aspects 84
- 39 Acute kidney injury: management and renal replacement therapy 86
- 40 Diabetic emergencies 88
- 41 Endocrine emergencies 90

### *Gastrointestinal*

- 42 Gastrointestinal haemorrhage 92
- 43 Acute liver failure 94
- 44 Acute pancreatitis 96

### *Neurological*

- 45 Acute confusional state, coma and status epilepticus 98
- 46 Neurological emergencies: cerebrovascular accidents 100
- 47 Neurological emergencies: infective 101
- 48 Neuromuscular conditions 102

### *Other systems*

- 49 Coagulation disorders and transfusion 104
- 50 Drug overdose and poisoning 106
- 51 The immune compromised patient 108

## Part 3 Surgical

- 52 Trauma 110
- 53 Head injury 112
- 54 Chest trauma 114
- 55 Acute abdominal emergencies 116
- 56 Obstetric emergencies 118
- 57 Burns, toxic inhalation and electrical injuries 120

## Part 4 Self-assessment

- Case studies and questions 122
- Case studies answers 125

## Appendices

- Appendix I: Classification of antiarrhythmic drugs 132
- Appendix II: Acute injury network staging system 2008 for acute kidney injury 132
- Appendix III: Rockall risk-scoring system for GI bleeds 133
- Appendix IV: Child–Pugh grading 133
- Appendix V: Typical criteria for liver transplantation 133

- Index 135
