

<b>Foreword</b>	<b>9</b>
<b>Abstracts</b>	<b>13</b>
Structure of the European Variscan belt derived from Gravimetric, Magnetic and Seismic data - Edel . . . . .	15
Crustal melting triggered by plume subduction: Insights from the Kon Tum massif (Central Vietnam) - Faure, Nguyen, Hoai, Lepvrier, Lin . . . . .	16
Geological map on the contact of the Lake, Gobi-Altai and Trans-Altai Zones at a scale 1:500,000 - Hanžl, Battushig, Guy, Buriánek, Lexa, Schulmann, Kuncová, Hrdličková, Janoušek, Krejčí, Yiang . . . . .	17
The gabbro-diorite intrusion of Ceret, Eastern Pyrenees, France. Hydrous intermediate melts from a metasomatized mantle source? - Liesa, Aguilar, Castro, Navidad . . . . .	18
Thermal regime of subduction orogeny, recorded by mineral-textures in metamorphic rocks - Faryad . . . . .	19
High-Pressure nappes and multiple subductions in the Variscan French Massif Central: What do we really know? - Lardeaux, Ledru . . . . .	20
Pre-Alpine contrasting tectono-metamorphic evolutions within the Southern Steep Belt, Central Alps - Roda, Zucali, Li, Spalla, Yao . . . . .	21
Relics of Neoproterozoic sedimentary structures under High Temperature conditions in southern Kenya: a key to understand the metamorphic growth of green-vanadium bearing grossular. - Martelat, Jacob, Giuliani, Goncalves, Feneyrol, Devidal, Omato Edward, Ichang'I Daniel . . . . .	22
Tectonic mixing of continental and oceanic crustal slices at the boundary of southern Sesia-Lanzo Zone: a reinterpretation of tectonic units in the Piemonte Zone. - Spalla, Gosso, Gusmeo, Rebay, Roda, Zanoni, Zucali . . . . .	23
Petrological evolution of a high-P migmatitic orthogneiss in Orlica-Śnieżnik Dome (NE Bohemian Massif) - Aguilar, Chopin, Štípská, Schulmann, Martelat, Pitra . . . . .	24
An east-west transect across the central Southalpine: insights into Variscan geodynamics - Zanoni, Roda, Spalla . . . . .	25
Magmatic and metamorphic history of mafic dykes from the Argentera-Mercantour Massif, southwestern Alps: implications for Variscan and Alpine tectonics - Filippi, Cinquegrani, Gosso, Lardeaux, Spalla, Verati, Zanoni . . . . .	26
3D reconstruction of fabric domains in the eclogitized continental crust of the Mt. Muone area, Sesia-Lanzo Zone, Western Alps - Corti, Zucali, Delleani, Zanoni, Spalla . . . . .	27
New finding of UHP relics in the Zermatt-Saas Zone (Italian Western Alps): insights into a new geodynamic scenario - Luoni, Rebay, Roda, Spalla, Zanoni . . . . .	28
Are Unconformity-Related Uranium deposits of Athabasca paleo Enhanced Geothermal Systems? - Ledru, Lardeaux . . . . .	29
Emplacement mechanisms of the Kunene Anorthosite Complex, Angola, in the frame of the Kibaran orogenic system - Lehmann, Bybee, Hayes, Owen-Smith . . . . .	30

Entstanden die West-Gondwana Orogene durch eine Inversion von langlebigen Riftstrukturen? (aneb „A co vy pořád tak...německy?“) - Konopásek, Sláma, Janoušek . . . . .	31
Exhumation of subducted continental lower plate in the arc region - Nahodilová, Hasalová, Štípská, Závada, Schulmann, Míková, Kylander-Clark . . . . .	32
Potential field data analysis in understanding the construction of the Central Asian Orogenic Belt - Guy, Schulmann, Holzrichter, Ebbing, Munsch, Xiao . . . . .	33
The North African Variscides at the North West Gondwana margin: from Palaeotethys opening to Pangea final amalgamation. - Chopin, Zielinski, Leprêtre, Schulmann, Frizon de Lamotte, Ghienne, Simon, Chebli, El Houicha, Franců, Laufek, Szczerba, Míková, Štípská, Guy . . . . .	34
KAREL: Key Advances in inferring long-term RhEoLogY data - Tajčmanová . . . . .	35
HP melting of metagranite triggered by hydrous melt percolation - Štípská, Hasalová, Powell, Závada, Racek, Aguilar . . . . .	36
Structural and petrochronological study of eclogite from the Mariánské Lázně Complex (Bohemian Massif): Rapid transition from oceanic HP subduction to HT extensional exhumation in the Late Devonian - Collett, Štípská, Peřestý, Schulmann, Soldner, Anzkiewicz, Lexa, Kylander-Clark . . . . .	37
Overprints of magnetic fabric and their identification - Hrouda . . . . .	38
Is orogeny continuous or episodic? Inferences from the Mesozoic–Paleogene Western Carpathians - Plašienka . . . . .	39
Crustal reamination during continental collision – a numerical model - Maierová, Schulmann, Gerya, Lexa . . . . .	40
Plate Tectonics, one of the most important factors influencing global vegetation - Kvaček . . . . .	41
Role of multiple deformation events on heterogeneous AMS signal in granitoids - Tabaud, Hasalová, Schulmann, Závada, Hrouda, Skrzypek, Edel, Robion, Míková . . . . .	42
Microstructure, deformation mechanisms and the relative strengths of minerals - Ulrich, Hobbs, Ord, Schulmann . . . . .	43
Slab tearing during transition from retreating subduction to arc-passive margin collision: 3D thermomechanical modeling - Gerya, Bercovici, Faccenna . . . . .	44
Peri-Pacific evolution and vertical stratification of the accretionary Altai Orogenic Belt, central Asia - Jiang, Schulmann, Sun, Lexa, Štípská, Guy, Kröner, Janoušek, Yuan, Hanžl . . . . .	45
Potential of the PIV post-processing for the deformation analysis in analogue models of the accretionary orogens using the dynamic parameters derived from the displacement field - Krýza, Závada, Lexa, Schulmann . . . . .	46
The structural investigation of the Bragança and Morais complexes in Central Iberian zone (northern Portugal) - Kusbach, Machek . . . . .	47
Relationships between tectonics and Au-Sb mineralisations in the Variscan belt of Central Brittany (western France) - Pochon, Gapais, Gumiaux, Gloaguen, Cagnard, Branquet, Boulvais, Poujol, Ruffet . . . . .	48
From “ancient” to “modern” tectonics: West African Craton perspective - Baratoux, Block, McFarlane, Koné, Koffi, Ganne, Pitra, Vanderhaeghe, Perrouy, Ndiaye, Bruguier, Miller, Jessell, Thébaud, Metelka . . . . .	49
New constraints on the Variscan structural and metamorphic evolution of the Saxothuringian unit, Bohemian Massif - Jouvent, Lexa, Jeřábek, Peřestý . . . . .	50
Exploring the correlation between the Allochthons of NW Iberia and the Saxothuringian, Teplá-Barrandian and Moldanubian Zones of the Bohemian Massif - Martínez Catalán, Collett, Schulmann . . . . .	51
Pre-Variscan metamorphic structure at the western margin of the Teplá-Barrandian Domain – comparison of the Teplá and Domažlice Crystalline Complex (Bohemian Massif) - Peřestý, Lexa, Štípská, Jeřábek, Racek . . . . .	52

Magnetic fabric of basal carbonatic cataclasite: first attempts to reveal the direction of thin-skinned nappe-stacking by AMS analyses - Kövér, Pomella, Fodor . . . . .	53
Petrological and geochemical aspects related to partial melting of granitic rocks in (U)HP conditions (Eger Crystalline Complex, Bohemian Massif) - Racek, Závada, Jeřábek, Hasalová, Štípská . . . . .	54
Structural and temporal record of reactive porous melt flow driving the weakening and exhumation of subducted high to ultra-high pressure continental crust (Variscan Bohemian Massif) - Závada, Schulmann, Štípská, Hasalová, Racek, Jeřábek, Kylander-Clark, Holder, Hacker . . . . .	55
Deformation bands in clastic sediments: their role in depth-temperature-time determinations and regional structural analysis - Fodor, Beke, Szócs, Petrik, Hips . . . . .	56
Main tectonic features of Poland - Aleksandrowski . . . . .	57
Timescale of Pervasive Melt Migration in the Crust - Hasalová, Schaltegger, Schulmann, Weinberg, Štípská, Kylander-Clark, Sergeev . . . . .	58
A Synthetic Zircon U-Pb and Hf Isotopic Study of the Carboniferous Volcanics in the Chinese Altai and its Tectonic Implications on the Accretionary Process of the Western CAOB - Liu, Zhang, Jiang, Sun, Schulmann, Liu . . . . .	59
Application of two-dimensional gravity models as input parameters to balanced cross-sections - Mazur, Gągała, Kufrasa, Krzywiec . . . . .	60
Mapping the incremental geodynamics in Maritime Alps - Gosso, Lardeaux, Zanoni, Volante Silvia, Corsini, Bersezio, Mascle, Spaggiari, Spalla, Zucali, Giannerini, Caméra . . . . .	61
Orthogonal fabrics – where do they come from? - Ježek . . . . .	62
