

CONTENTS

Part I The Intuitive Background

- 1 Mathematical Thinking 3
- 2 Number Systems 17

Part II The Beginnings of Formalisation

- 3 Sets 49
- 4 Relations 70
- 5 Functions 94
- 6 Mathematical Logic 121
- 7 Mathematical Proof 146

Part III The Development of Axiomatic Systems

- 8 Natural Numbers and Proof by Induction 159
- 9 Real Numbers 188
- 10 Real Numbers as a Complete Ordered Field 212
- 11 Complex Numbers and Beyond 229

Part IV Using Axiomatic Systems

- 12 Axiomatic Systems, Structure Theorems,
and Flexible Thinking 257
- 13 Permutations and Groups 277
- 14 Cardinal Numbers 314
- 15 Infinitesimals 334

Part V Strengthening the Foundations

16	Axioms for Set Theory	367
	<i>Appendix—How to Read Proofs: The ‘Self-Explanation’ Strategy</i>	377
	<i>References and Further Reading</i>	383
	<i>Index</i>	387
