

CONTENT

Introduction	1
Preface	3
1. LASER SOURCES	5
1.1 Origin of Laser Beam.....	5
1.2 Absorption and Emission of Radiation	5
1.3 Properties of Laser Light.....	8
1.4 Principle of Laser	9
1.5 Laser Types	17
1.6 Interaction between the Laser Beam and the Materials	20
2. LASER TECHNOLOGY.....	23
2.1 Laser Beam Welding.....	23
2.2 Laser Drilling	28
2.3 Laser Cutting.....	29
2.4 Laser Marking	31
3. LASER SURFACE HEAT TREATMENT.....	33
3.1 Laser Hardening.....	33
3.2 Laser Cladding, Coating, Metal Deposition.....	35
3.3 Laser Surface Remelting.....	38
4. THE ISSUES OF THE LASER MACHINES DESIGN SOLUTION	41
4.1 Selection of Design Optimization Principles	42
4.2 Basic Variants of Laser Machines Design Solution.....	43
5. DESIGN VARIANTS OF THE LASER MACHINE AXIS ARRANGEMENT	49
5.1 Portal Arrangement.....	49
5.2 Console Arrangement.....	51
5.3 Cross Table.....	54
5.4 Industrial Robot.....	57

6. DESIGN VARIANTS OF THE LASER MACHINE AXIS VERSION AND DRIVE	59
6.1 Ball Screw	59
6.2 Linear Motor	67
6.3 Industrial Robot.....	74
6.4 Manual Operation.....	76
6.5 Axis Accessories	79
7. EFFECT OF THE LASER SOURCE TYPE ON THE LASER MACHINE DESIGN.....	83
7.1 Solid State Laser	83
7.2 Carbon Dioxide Laser	84
8. DESIGN TYPE OF THE LASER STATION FRAME	87
8.1 Welded Frame – Combined with Mineral Cast Frame	88
8.2 Technical Mineral Folded Frame	89
8.3 Technical Mineral Cast Frame	90
Conclusion.....	97
List of used Sources.....	99
List of Figures.....	100
