1	Introduction	10
2	Binding point models.....	12
2.1	Analytical methods of modelling	12
2.2	Using binding point models in modelling of dynamic processes	18
3	Advanced binding point models.....	21
3.1	Relations between the individual components of the yarn stiffness.....	21
3.2	Transverse yarn deformation	23
3.3	Modelling of the binding point using variational methods	26
4	Beat-up mechanism, beat-up force and weaving resistance.....	35
4.1	Means for weft beat-up	35
4.2	Reed displacement and beat-up pulse.....	39
4.3	Model of beat-up force.....	41
5	Beat-up process modelling.....	46
5.1	Linearized model of relation of warp extension and weft slippage.....	46
5.2	Static model of beat-up process	48
5.3	Dynamic effects of beat-up process.....	52
6	Shed forming mechanisms.....	63
6.1	Analysis of single lift and double lift shedding mechanisms	63
6.2	Exciting of elastic forces through heald motion.....	67
7	Compensation of warp forces through back rest.....	71
7.1	Back rest function	71
7.2	Exciting signals for changing back rest position	71
7.3	Textile-technological properties of back rest	73
7.4	Mechanical properties of back rest.....	74
7.5	Force compensation using active back rest	78
7.6	Advancement of back rest function	79

8	Means of external control of weaving process	81
8.1	External control	82
8.2	Substitutive scheme of controlled system.....	83
8.3	Relations for description of controlled system	85
8.4	Solution of controlled system.....	87
9	Weft insertion systems	89
9.1	Shuttle weft insertion	94
9.2	Projectile weft insertion	105
9.3	Rapier weft insertion	112
9.4	Water-jet weft insertion	119
9.5	Air-jet weft insertion	128
10	Impact forces in weft insertion	138
10.1	Comparison of impact effects of air-jet and rapier weft insertion systems.....	138
10.2	Means for reduction of impact force.....	145
11	Multi-shed weaving machines.....	151
11.1	Weaving cycle and continuous process.....	151
11.2	Basic conflict of weaving and multi-shed weaving machine.....	153
11.3	Circular, planar serial and parallel multi-shed weaving machines	154
11.4	Axiom of dependency of technical parameters on environment.....	159
	Bibliography.....	163
