

Content

Full papers

Recent U.S. Army Corps of Engineers Dam Case Histories of Internal Erosion (<i>Jeffrey A. Schaefer, Charles G. Redlinger, Timothy M. O'Leary</i>).....	1
Bureau of Reclamation experiences with internal erosion incidents (<i>William O. Engemoen</i>)	11
Internal Erosion Data Base IEDB An international web based data base on dam failure cases (<i>Alexius Vogel, Jean-Robert Courivaud, Katarzyna Jarecka</i>).....	19
Recent examples of backward erosion piping, internal erosion along a conduit, and embankment cracking at Bureau of Reclamation dams (<i>Dennis L. Hanneman</i>).....	25
Failures on small dams due to internal erosion (<i>Jiří Hodák, Stanislav Žatecký, Ondřej Švarc</i>).....	34
Recent examples of internal erosion remediation works in the (northern) French Alps (<i>Jean-Pierre Blais, Olivier Chulliat</i>)	42
Assessment of Seepage Strength of Earth Dams (<i>Irina N. Belkova, Vyacheslav B. Glagovsky, Vadim G. Radchenko</i>).....	50
Impact of turbulent groundwater flow in granular filters on erosion of bed material (<i>Gijs Hoffmans, Henk Verheij</i>).....	58
Some Results from Laboratory Verification of Filtration Soil Stability (<i>Roman Ravinger, Peter Turček</i>).....	66
Numerical model of suffusion and soil parameters changes in terms of finite element method (<i>Paweł Popielski, Agnieszka Dąbska</i>).....	74
Experimental study of the suffusion of non cohesive heterogeneous soils (<i>Tarek Karoui, Ahmed Benamar, Abdelkrim Bennabi, H. Wang</i>)	82
Comments on Istomina's research on external suffusion / fluidisation (<i>Tomáš Julínek, Ahmed Khaddour, Jaromír Říha</i>).....	90
Erodibility characterization for suffusion and interface erosion by energy approach (<i>Didier Marot</i>).....	99
UK progress in risk management of dams (<i>Alan Brown</i>)	107
Reliability assessment of internal erosion initiation (<i>Marek Čejda, Jaromír Říha</i>).....	115
Current Methodology and Research at the Corps of Engineers for Assessing Internal Erosion Risks at Dams (<i>Charles G. Redlinger, Timothy M. O'Leary, Kenneth E. Henn, Gregg A. Scott</i>).....	123
Development of Risk Assessment Methods with Regard to Internal Erosion for Corps of Engineers Levees (<i>Michael P. Navin, Noah D. Vroman, Neil T. Schwanz, Brian M. Farmer</i>).....	131
Calibration of an inverse method to compute the Constriction Size Distribution for granular filters (<i>Jessica Sjah, Eric Vincens</i>).....	139
Seepage detection methods, a dam owner's perspective (<i>Marc Smith, Alain Côté</i>).....	147
The Geomechameter, a new in-situ apparatus (<i>Jacques Monnet</i>).....	157
Investigation of shallow leakage zones in a small embankment dam using repeated resistivity measurements (<i>Pontus Sjö Dahl, Sam Johansson, Torleif Dahlin</i>).....	165

Monitoring of the Earthen Dike of Small Water Reservoir Using Electrical Impedance Spectrometry Method (<i>Jana Pařílková, Zuzana Gardavská, Marie Fejfarová, Maria Clementina Caputo, Rita Masciale</i>).....	173
DC-electrical resistivity tomography on earthen embankment dike survey: improvement strategies in between 2D and 3D approaches (<i>Yannick Fargier, Sérgio Palma Lopes, Daniel Francois, Cyrille Fauchard, Anaëlle Luczak, Philippe Cote</i>).....	181
The advantages of multicriteria analysis for diagnostics of internal erosion phenomena (<i>Laurence Duchesne, Aurélie Garandet, Pierre Frappin</i>).....	188
The Cross Erosion Test, Preliminary Results (<i>Jacques Monnet, Olivier Plé, Duc Manh Nguyen, Pierre Plotto</i>).....	196
Proposals on the text content for a new ICOLD bulletin «Internal erosion of dams and their foundations» (<i>V. N. Zhilenkov, V. G. Radchenko, O. A. Rumyantsev</i>).....	204

Extended abstracts

Quantitative Risk Analysis of Internal Erosion of Dams and their Foundations - Some Practical Experience and Limitations (<i>Robin Fell</i>).....	210
Piping flow erosion in water retaining structures (<i>Stéphane Bonelli, Nadia Benahmed</i>).....	211
Increasing erosional strength against piping and internal erosion by use of lime treatment (<i>Gontran Herrier, Didier Lesueur, Daniel Puiatti, Jean-Claude Auriol, Olivier Cuisinier, Christophe Chevalier, Iman Haghighi, Stéphane Bonelli</i>).....	213
Particle scale numerical modelling to develop insight into suffusion in granular filters (<i>Thomas Shire, Catherine O'Sullivan</i>).....	215
Experimental study of the suffusion of non cohesive heterogeneous soils (<i>Ahmed Benamar, Tarek Karoui, Abdelkrim Bennabi, Hwan Wang</i>).....	217
Large scale tests on contact erosion along the interface of different soil layers (<i>Rémi Beguin, Yves-Henri Faure, Sylvain Reynaud, C. Picault, C. Curzi, Laurence Duchesne, Jean-Jacques Fry, Jean-Robert Courivaud</i>).....	218
Proposed Development of a Fully Coupled Internal Erosion Model (<i>Stephen Garner</i>).....	219
Simulation of Fluid Flow Through and Deformation of Porous Media (<i>J. Gunnar I. Hellström, T. Staffan Lundström</i>).....	221
Geotextile filters: ICOLD Bulletin 55 (<i>Jonathan R. Fannin</i>).....	223
Internal instability: empirical and theoretical criteria for soils evaluation (<i>J. R. Fannin, R. M. Moffat, M. Li</i>).....	226
Contact erosion: observations on the Hole Erosion Test (<i>Jonathan Fannin, M. Luthi, Robert G. Millar</i>).....	228
Case study of piping incidents at Coursier Dam, Canada (<i>Jonathan Fannin, Stephen Garner, Kaley Crawford-Flett</i>).....	230
Influence of vertical loading on underseepage piping in uniform sand (<i>V.M. van Beek, J. Rietdijk, M.S. Luijendijk, F.B.J. Barends</i>)	233
Author index	235
