<i>Preface</i>	9
----------------	---

Invited lectures	11
-------------------------	-----------

From Tsirelson Space to the solution of the "scalar plus compact" problem. (<i>Spiros A. Argyros</i>)	12
Bishop-Phelps-Bollobás theorem and Asplund operators (<i>B. Cascales</i>)	13
Mackey groups and Mackey topologies (<i>Dikran Dikranjan</i>)	15
Efimov's problem revisited (<i>Alan Dow</i>)	16
On Hilbert Dynamical Systems (<i>Eli Glasner</i>)	17
A non-chainable plane continuum with span zero (<i>Logan C. Hoehn</i>)	18
Variations on ω -boundedness (<i>I. Juhász</i>)	19
On typical properties of Hilbert space operators (<i>Tamás Mátrai</i>)	20
Topological Homogeneity (<i>Jan van Mill</i>)	21
Uniquely Universal Sets (<i>Arnold W. Miller</i>)	22
Selective separability of Pixley-Roy hyperspaces (<i>Masami Sakai</i>)	23
Metrizability of compact groups via conditions on their dense subgroups (<i>Dmitri B. Shakhmatov</i>)	24

Table of Contents

L_0 and its representations (<i>Slawomir Solecki</i>)	25
Feebly compact paratopological groups (<i>Mikhail G. Tkachenko</i>)	26
Clones of topological spaces (<i>Věra Trnková</i>)	28
Generic representations of abelian groups (<i>Todor Tsankov</i>)	30
Combinatorial properties of open covers of products (<i>Lyubomyr Zdomskyy</i>)	31
Contributed lectures	33
Small Whitney Blocks (<i>María Elena Aguilera</i>)	34
Trotter-Kato type results for second order differential inclusions (<i>Narcisa Apreutesei</i>)	35
The largest classes of closed sets for coincidence of hypertopologies (<i>Gabriela Apreutesei</i>)	36
The p -adic topologies on $\mathbb{Z}$ are not Mackey topologies (<i>Lydia Außenhofer</i>)	37
Measurability in $C(2^{\kappa})$ and Kunen cardinals (<i>Antonio Avilés</i>)	38
The Shape and Cohomology Exact Sequences of a Map (<i>Vladimer Baladze</i>)	39
A note on coclones of topological spaces (<i>Artur Barkhudaryan</i>)	41
The universal minimal flow in the language of near ultrafilters (<i>Dana Bartošová</i>)	42

On graph topologies and their counterparts in the realm of convenient topology (René Bartsch)	43
Weak extent, submetrizable and diagonal degrees (D. Basile)	44
Strong homology group of continuous map (A. Beridze)	45
Group theoretic properties of the automorphism groups of minimal T_D topologies (Jorge L. Bruno)	47
On representation space and mappings (Felix Capulin Perez)	48
Homogeneity in Non-regular Spaces (Nathan Carlson)	49
Results about representation spaces (Włodzimierz J. Charatonik)	50
Some aspects of topological dynamics on spaces with a free interval (Matúš Dirbák)	51
On normal functors (M. A. Dobrynina)	52
Productively sequential spaces (Szymon Dolecki)	53
Canonizing Borel equivalence relations for the Silver ideal (Michal Doucha)	54
On the Gurarii space (Joanna Garbulińska)	55
Topologies generated by weak selection topologies (S. García-Ferreira)	56
Whitney Levels on Hyperspaces of Non Metrizable Continua (Luis Miguel García-Velázquez)	57

Table of Contents

Base dimension-like functions of the type ind (<i>D.N. Georgiou</i>)	58
Entropy on abelian groups (<i>A. Giordano Bruno</i>)	59
Continuity of convolution of test functions on Lie groups (<i>Helge Glöckner</i>)	60
On Stone space of one boolean algebra (<i>R. Golovastov</i>)	61
On converging sequences and copies of βN in one compactification of N (<i>A. Gryzlov</i>)	62
Dense subspaces vs closure-preserving covers of function spaces (<i>D. Guerrero Sánchez</i>)	63
ω^* , ω_1^* and non-trivial autohomeomorphisms (<i>K. P. Hart</i>)	64
Classifying spaces of remote points for some metrizable spaces (<i>Rodrigo Hernández-Gutiérrez</i>)	65
A metrization theorem for small Frechet groups (<i>M. Hrušák</i>)	66
Sharkovskii's theorem for random dynamical systems (<i>Joanna Zofia Jaroszewska</i>)	67
Strong sequences in partially ordered sets (<i>Joanna Jureczko</i>)	68
Preservation of the Lindelöf property and infinite games on posets (<i>Masaru Kada</i>)	69
Approximate fixed point nets and sequences (<i>Ondřej F.K. Kalenda</i>)	70
The De Groot Dual Revisited (<i>Martin M. Kovár</i>)	71

A dichotomy for the convex spaces of probability measures (<i>Mikołaj Krupski</i>)	72
On inductive dimension modulo a simplicial complex (<i>Jerzy Krzempek</i>)	73
Retracts of universal homogeneous structures (<i>Wiesław Kubiś</i>)	74
Some applications of tiny sequences (<i>Andrzej Kucharski</i>)	75
The Katětov construction revisited (<i>Hans-Peter A. Künzi</i>)	77
Improved nearness research IV (<i>D. Leseberg</i>)	78
Vilenkin duality revisited: A unifying duality for abelian groups (<i>Gábor Lukács</i>)	79
On freely decomposable maps (<i>Sergio Macias</i>)	80
Epireflective subcategories of T_2Unif , $Unif$, and $CompT_2Ab$, closed under epimorphic images (<i>E. Makai, Jr.</i>)	81
Trees, ultrametric spaces, and their automorphism groups (<i>Maciej Malicki</i>)	82
Buried Points in Julia Sets (<i>John C. Mayer</i>)	83
On topologies on X as points within $2^{\mathcal{P}(X)}$ (<i>Aisling E. McCluskey</i>)	84
Base dimension-like functions of the type ind (<i>A.C. Megaritis</i>)	85
Hausdorff ultrafilters and Katětov order (<i>David Meza-Alcántara</i>)	86
On the complexity of compact 3-manifolds (<i>Michele Mulazzani</i>)	87

Table of Contents

Diagonality in spaces of open sets (<i>Frédéric Mynard</i>)	88
Universal valued Abelian groups (<i>Piotr Niemiec</i>)	89
On supercovering spaces (<i>Dr. S. B. Nimsé</i>)	91
A convergent sequence which is not an IFS-attractor. (<i>Magdalena Nowak</i>)	92
On weak mixing and multi-transitivity (<i>P. Oprocha</i>)	93
The Hyperspace of Meager Subcontinua (<i>Norberto Ordoñez</i>)	94
The C-compact-open topology on $C(X)$ (<i>Alexander V. Osipov</i>)	95
Separability in Bitopological spaces and selection principles (<i>Selma Ozcag</i>)	96
Braid Groups in Complex Projective Spaces (<i>S. Parveen</i>)	97
On the concept of Σ_2^1 -completeness (<i>Janusz Pawlikowski</i>)	98
On Todorćević orderings (<i>Bohuslav Balcar</i>)	99
Coronas of metric spaces (<i>I.V. Protasov</i>)	100
Topologies on the group of invertible transformations (<i>Robert Ralowski</i>)	101
Neighbourhood operators on categories (<i>Ando Razafindrakoto</i>)	102
Reflection spaces (<i>Matthew J. Samuel</i>)	103

On the unicoherence of quotient spaces of symmetrics products of continua (<i>Javier Sánchez Martínez</i>)	104
On Topologies Generated by κ -Suslin Sets (<i>Denis I. Saveliev</i>)	105
Intrinsic shape of sets in Morse decomposition (<i>Nikita Shekutkovski</i>)	106
Equations in Groups and the Existence of Nontrivial Group Topologies (<i>O. V. Sipacheva</i>)	107
Cardinal sequences of scattered spaces (<i>Lajos Soukup</i>)	108
Descriptive properties of elements of biduals of Banach spaces (<i>Jiří Spurný</i>)	109
Covering Properties of Symmetrizable Spaces (<i>D. Stavrova</i>)	110
Some consistent counterexamples in the theory of D-spaces (<i>Paul J. Szeptycki</i>)	111
Sequence Selection Properties for Quasi-normal Convergence (<i>Jaroslav Šupina</i>)	112
Productively Lindelof Spaces and Selection Principles (<i>Franklin D. Tall</i>)	113
Markov's problems through the looking glass of Zariski and Markov topologies (<i>Daniele Toller</i>)	114
Buried points of Peano Continua in the Plane (<i>M. Tuncali</i>)	115
On continua on which generic maps have 0-dim. sets of chain-recurrent points. (<i>Konrad Ungeheuer</i>)	116

Table of Contents

Ordinal remainders of classical ψ -spaces (<i>Jerry E. Vaughan</i>)	117
Completion in supernear spaces (<i>Zohreh Vaziry</i>)	118
Waraszkiewicz spirals revisited (<i>Benjamin Vejnar</i>)	119
Embedding cones in hyperspaces (<i>Hugo Villanueva Mendez</i>)	120
Box Products of non-Metrizable compacta (<i>Scott W. Williams</i>)	121
The σ -ideal generated by zero-dimensional Z-sets in the Hilbert cube (<i>Szymon Żeberski</i>)	122
On β -favorability of the strong Choquet game (<i>László Zsilinszky</i>)	123
