Introduction	3
Material and methods	5
Results	10
Qualitative characteristics of the avian population of the forest shelter-belts . .	10
Quantitative characteristics of the avian population of the forest shelter-belts . .	14
Evaluation of differences in the qualitative and quantitative composition of the avian synusia of various types of forest shelter-belts studied	16
Qualitative characteristics of the avian population in the <i>Medicago sativa</i> biotope	17
Quantitative characteristics of the avian population of the <i>Medicago sativa</i> bio- tope	18
Correlation of numerical characteristics of the avian population of the forest shelter-belts and field biotopes	18
Qualitative characteristics of the avian population of the floodplain forest . . .	20
Quantitative characteristics of the avian population of the floodplain forest . . .	25
Quantitative characteristics of the avian population of scree forest of the <i>Tilieto- -Aceretum</i> type	27
Qualitative characteristics of the avian population of the scree forest of the <i>Ti- lieto-Aceretum</i> type	31
Discussion	32
