Contributors to Volume 1	v
Preface to First Edition	vii
Preface to Second Edition	ix
Contents of Volumes 2, 3 and 4	xiii
1 The Organization of Quality Control	1
J. HAWTHORNE	
1 Introduction	1
2 The principles of quality control	5
3 The application and organization of quality control	9
4 Quality control problems and techniques	27
5 The future of quality control	32
2 Health Problems in Food: Chemical Aspects	33
A. E. BENDER	
1 Introduction	33
2 Harmful substances	35
3 Conclusions	53
References	53
3 Food Processing and Nutritional Values	57
A. E. BENDER	
1 Introduction	57
2 Nutritional changes in food processing	59
3 Nutritional gains in food processing	71
4 Problems in analysis	73
5 Reliability of laboratory determination	75
6 Availability to man	76
References	77
4 Microbiological Quality Control	79
D. A. A. MOSSEL, H. VAN DER ZEE, JANET E. L. and P. VAN NETTEN	
1 Principles and pitfalls	79
2 The mechanisms of loss of microbiological integrity of foods and essentials of control	80
3 The philosophy of the Wilson approach to microbiological quality control	109
4 Fundamentals of microbiological quality control	111
5 Monitoring to assess compliance with good practices	131
References	154

5	Statistical Methods in Quality Control E. H. STEINER	169
	1 General methods of statistics	169
	2 Sampling	221
	3 Control charts	258
	4 The estimation of ingredients	278
	5 Precision of methods of analysis	286
	References	292
	Appendix	294
6	Tasting Panels: Sensory Assessment in Quality Control N. T. GRIDGEMAN	299
	1 Introduction	300
	2 Aims	302
	3 Facilities	303
	4 Organization of tests	308
	5 Some common test designs	316
	6 Special techniques	334
	7 Open appraisal	335
	8 Conclusion	339
	Glossary	340
	A bibliographic note	344
	References	346
7	National and International Standards R. H. MURRAY	351
	1 Introduction	351
	2 Why food standards?	355
	3 Types of standard	360
	4 The problems of meaning and language	363
	5 Elaboration of a food standard: a consultation	371
	6 Food standards in the EEC	376
	7 The Codex Alimentarius	381
	8 "Food additives"	388
	9 Microbiological aspects, hygiene	401
	10 Pesticide standards	405
	11 Labelling standards	406
	12 Nutritional aspects	409
	13 Implementation and enforcement	410
	References	413
	Appendices	414
8	Quality Standards and Specifications in the Food Industry N. GOLDENBERG	415
	1 Quality control	419
	2 Specifications	421
	3 "Non-acid" canned foods	441
	4 Manufactured food products	442
	5 Fresh fruits and vegetables	453
	6 The training of food technologists for quality control	458
	7 Implementation of standards and specifications	459
	References	460
	Subject Index	463
