

Brief Contents

UNIT I: Protein Structure and Function

- Chapter 1: Amino Acids **1**
- Chapter 2: Structure of Proteins **13**
- Chapter 3: Globular and Fibrous Proteins **25**
- Chapter 4: Enzymes **47**

UNIT II: Intermediary Metabolism

- Chapter 5: Bioenergetics and Oxidative Phosphorylation **61**
- Chapter 6: Basic Concepts of Metabolism **75**
- Chapter 7: Glycolysis **87**
- Chapter 8: Gluconeogenesis **99**
- Chapter 9: Citric Acid Cycle **105**
- Chapter 10: Hexose Monophosphate Pathway **111**

UNIT III: Carbohydrate Metabolism

- Chapter 11: Structure of Carbohydrates **119**
- Chapter 12: Metabolism of Monosaccharides and Disaccharides **127**
- Chapter 13: Glycogen Metabolism **135**
- Chapter 14: Glycosaminoglycans **147**
- Chapter 15: Glycoproteins **157**

UNIT IV: Lipid Metabolism

- Chapter 16: Metabolism of Dietary Lipids **163**
- Chapter 17: Fatty Acid and Triacylglycerol Metabolism **171**
- Chapter 18: Phospholipid Metabolism **191**
- Chapter 19: Glycolipid Metabolism **199**
- Chapter 20: Cholesterol and Steroid Metabolism **205**

UNIT V: Nitrogen Metabolism

- Chapter 21: Amino Acids: Disposal of Nitrogen **229**
- Chapter 22: Amino Acids: Metabolism of Carbon Skeletons **243**
- Chapter 23: Conversion of Amino Acids to Specialized Products **257**

UNIT VI: Integration of Metabolism

- Chapter 24: Metabolic Effects of Insulin and Glucagon **269**
- Chapter 25: Metabolism in the Well-Fed State **281**
- Chapter 26: Metabolism in Starvation, Diabetes Mellitus, and Injury **291**
- Chapter 27: Nutrition **303**
- Chapter 28: Vitamins **319**

UNIT VII: Storage and Expression of Genetic Information

- Chapter 29: Nucleotide Metabolism **343**
- Chapter 30: DNA Structure and Replication **357**
- Chapter 31: RNA Structure and Synthesis **377**
- Chapter 32: Protein Synthesis **389**
- Chapter 33: Molecular Basis of Inherited Disease **401**
