

TABLE OF CONTENTS

PREFACE

PART 1. MODELING

Vectorial Methods for the Kinematics and Dynamics of Robotic Manipulators J. Schliesing and B. McInnis	3
A New Methods for Dynamic Analysis of Robot Manipulators C.-J. Li	9
Identification of Time Varying Parameters for a Robotic Manipulator in the Presence of Measurement Noise F. Abrishamkar and A. Chassiakos	19
A Comparison of Two Adaptive Methods for Robotic Manipulators S. X. Xing, W.-S. Chang and M.-H. Liu	29
Application of Kalman Filtering to Robot Manipulators P. H. G. Coelho and L. F. A. Nunes	35
Inverse Kinematic Solution for Near-Simple Robots and Its Applications to Robot Calibration S. A. Hayati and G. P. Roston	41
A New Manipulator Arm : A Tentacle Model M. Ivanescu	51
A Run Time Interpreter for a Telerobot System A. Lokshin, J. Balaram, J. Beahan, and K. Kreutz	57
Simulation of a SCARA Robot R. G. Calleja, J. C. F. Marinero, and R. D. O. Martinez	63
Nonlinear Modeling of Robot Arms B. Pourbabai	69
Solvability of Practical 6R Manipulator Y.-C. Tian and W.-H. Qian	75
Recursive Forward Dynamics for Two Robot Arms in a Closed Chain Based on Kalman Filtering and Bryson-Frazier Smoothing G. Rodriguez	85
Extension of the Method of Partially Computed-Torques to the Operational Spaces of Robots M.-Z. Chen and Q.-X. Zhang	95
Estimation of Human Joint Dynamics Optimally Controlled by Interconnected Robots D. Khalili and M. R. Zomlefer	101

PART 2. CONTROL

Piecewise Linear Robot Control F. B. Sperling	109
Robust Control of Robot Manipulators Using Linearized Dynamic Models P. Misra, R. V. Patel, and C. A. Balafoutis	117
Modified Hybrid Control for an Electro-Hydraulic Robot Leg C.-K. Tsai and D. E. Orin	125
End-Point Control of a Two-Link Compliant Manipulator G. M. Dick, K. Tomiyama, and H. J. Sommer III	137
Control System Design of Robots with Flexible Joints G. R. Widmann and S. Ahmad	145
A Distributed Control System for a Robotic Arm A. Ghanem and H. Martens	151
Concept and Algorithm for the Coordinated Path Control of Two Robots G. Duelen, J. Held, U. Kirchhoff, and H. Munch.....	157
A Testbed for the Development of Intelligent Robot Control R. W. Harrigan	163
Run-Time Control Research for Autonomous Robots J. Balaram, J. Beahan, K. Kreutz, and A. Lokshin	169
A New Adaptive Control Method of Robots C.-J. Li	179
Robust Compliant Motion: Impedance Control K. Kazerooni	185
A Knowledge-Based Autonomous Robot Manipulation System H. Hirukawa and S. Kitamura	189
On Nonlinear Control for Decoupled Exact External Linearization of Robot Manipulators K. Kreutz	199
Direct Model Reference Adaptive Control of a Flexible Robotic Manipulator Using a Reaction Wheel D. Meldrum and M. Balas	213
Further Results on a New Robust Robot Controller J. K. Mills and A. A. Goldenberg	221
Decentralized Control of Robot Arms M. Mohadjer	231

Control of Robot Manipulator Compliance C. C. Nguyen, F. J. Pooran, and T. Premack	237
Robot Arm Control Using Stereoscopic Vision Feedback J. R. Rasure	243
Design of Adaptive Joint Controllers for Robots H. Seraji	251
Control of Tool-Workpiece Interaction Forces: Contour-Following With a PUMA 560 Manipulator G. P. Starr	261
Control and Simulation of a Three Jointed Finger J. Johnson, C. S. Loucks, G. P. Starr and J. P. H. Steele ..	267
Hybrid Control of an Intelligent Mobile Robot J. P. H. Steele	277
On Minimum Time Control for Robotic Manipulators J. Wen	283
Nonlinear Feedback Control of Redundant Robot Manipulators Y.-D. Pan, L.-W. Zhang, and W.-S. Chang	293
Errors Correcting Methods for Control of Robot Manipulators S.-X. Zheng and Y.-Q. Lin	303
Convergence, Stability and Robustness of Learning Control Schemes for Robot Manipulators S. Arimoto, S. Kawamura, and F. Miyazaki	307
A Simple Robust Nonlinear Robotic Controller Z.-S. Xia and S. S. L. Chang	317
On Adaptive Control of Robotic Systems A. Katbab	329

PART 3. EDUCATION

A Robot Design for Teaching and Research P. Durand and F. Viète	335
Education in Robotics: Guidelines for a Curriculum A. Steiger-Garcia, L. M. Camarinha-Matos, and F. j. Moura-Pires	345
An Overview of Robot Engineering Education at the University of New Mexico M. Shahinpoor and M. Jamshidi	351
University Robotics Education: Theory and Practice R. M. Inigo and J. M. Angulo	355

A Graduate Course in Industrial Robotics E. J. Muth	365
Trends in Robotics Education M. Eslami	373
On the Development of the Electrical Engineering Robotics Laboratory G. K. F. Lee, J. Antosh, R. Beckert and T. Yooyativang	391
A Laboratory Oriented Robotics Course for Educating Future Researchers and Engineers S. Ahmad	401
On Development of Robotics Laboratory for Instruction T. C. Hsia	409
Robotics Teaching and Research Activities at State University of New York at Stony Brook M. Eslami	415
Robotics and Its Influence on Engineering Education R. W. Cliffe, J. J. Hill, and S. Andrews	425
Computer Integrated Manufacturing and Robotics and Automation Curriculum at the University of Toronto A. A. Goldenberg, B. Benhabib, and R. G. Fenton	435
Robotics Research Reflecting Practical Education A. W. Bennett and J. Y. S. Luh	441

PART 4. APPLICATIONS

Introduction of Industrial Robots on Surface Protection Jobs in Shipyards I. Mandic, D. Stipanicev, and Z. Domazet	447
An Approach to Planning and Scheduling for Multi-Robot Assembly Systems X.-D. Xia and G. A. Bekey	457
Optimal Trajectory Tracking A. K. El-Sakkary	465
Determining the 3-D Geometry from Shadow Information H.-L. Guo	475
Scanning and Evaluation System of Object Surface Using Cross Light Beams with the CCD Camera M. Kvasnica and V. Hrdlicka	481
Dynamics and Control of a Robotic System With Elastic Arms U. Kleemann	487

Hierarchical Algorithm for Suboptimum Trajectory Planning and Control	
A. Meystel	493
Control System Architecture for Telemanipulator Operation	
D. R. Myers, S. A. Leake, and M. Juberts	505
The DC Servomotor Simulation in Robotics Applications	
J.C.F. Marinero, V.M.G. Dize, R.G. Calleja and A.P. Mendez..	511
On Magnetically Activated Robotic Tensor Arms	
M. Shahinpoor, H. A. Kalhour, and M. Jamshidi	517
Optical Reflectance Sensors and Their Application in Automatic Grasping	
E. Balaure	523

PART 5. NSF ENGINEERING RESEARCH CENTERS

The CTR from the First Year to the Future	
P. V. Christianson	531
The Systems Research Center: Creating the Design Tools for the Systems of Tomorrow	
J. S. Baras	537
