Preface	xiii
List of Figures	xvii
List of Tables	xxi
1 Poverty Rate	1
1.1 Background	1
1.1.1 Median and Percentiles	3
1.1.2 Populations and Samples	4
1.2 Income Distribution	7
1.2.1 Poverty-Rate Curves	8
1.3 Comparisons	12
1.4 Sampling Weights	14
1.4.1 Trimming	19
1.A Appendix. Programming Notes	20
1.A.1 Data Input	20
1.A.2 Estimating a Quantile	23
1.A.3 Summarising the Weights	25
1.A.4 Some Auxiliary Functions	27
1.A.5 Plotting a Set of Curves	29
1.A.6 Final Touch in a Diagram	31
1.A.7 Countries in EU-SILC	35
2 Statistical Background	37
2.1 Replications. Fixed and Random	37
2.2 Estimation. Sample Quantities	38
2.2.1 Weighted Sample Median	39
2.3 Sampling Variation. Bootstrap	40
2.4 Horvitz–Thompson Estimator	45
2.5 Fragility of Unbiasedness and Efficiency	47
2.5.1 Lognormal Distribution	48
2.A Appendix	49
2.A.1 Bootstrap	49
2.A.2 Moments of the Lognormal Distribution	52

3	Poverty Indices	53
3.1	Poverty Index	53
3.1.1	Which Kernel?	56
3.2	Relative and Log-Poverty Gaps	60
3.3	Lorenz Curve and Gini Coefficient	63
3.4	Scaled Quantiles	73
3.4.1	Permutation Test	75
3.5	Income Inequality. Kernels, Scores and Scaling	75
3.A	Appendix	77
3.A.1	Negative Values of eHI	77
3.A.2	Newton Method in R	80
3.A.3	More on Poverty Indices	82
3.A.4	Lorenz Curve and Gini Coefficient	87
3.A.5	Scaled Quantiles	91
3.A.6	Permutation Test	93
4	Mixtures of Distributions	97
4.1	Introduction	97
4.2	Fitting Mixtures	100
4.3	Examples	102
4.3.1	Exploration of the Fitted Probabilities	104
4.3.2	Results for Several Countries	110
4.4	Improper Component	113
4.5	Components as Clusters	116
4.5.1	Confusion Matrix	120
4.A	Appendix. Programming Notes	121
4.A.1	EM Algorithm for Mixtures of Normal Distributions	121
4.A.2	Improper Component	131
4.A.3	Confusion Index	132
5	Regions	135
5.1	Introduction	135
5.2	Analysis of Regions	137
5.3	Small-Area Estimation	142
5.4	Using Auxiliary Information	146
5.5	Regions of Spain	148
5.5.1	Composite Estimation of the Poverty Rates	150
5.6	Regions of France	156
5.7	Simulations	158
5.A	Appendix	160
5.A.1	Estimation of Region-Level (Co-)Variances	160
5.A.2	Report Card for Austria and Its Regions	161
5.B	Programming Notes	161
5.B.1	Composite Estimation	168
5.B.2	Multivariate Composition	170

5.B.3	Graphics	173
6	Transitions	175
6.1	Panel Data	175
6.2	Absolute and Relative Rates of Transition	182
6.3	Substantial Transitions	186
6.4	Partial Scoring of Transitions	191
6.5	Transitions over Several Years	194
6.6	Imputed Patterns	197
6.A	Appendix. Programming Notes	203
6.A.1	National Panel Databases	203
6.A.2	Rates of Transition	207
7	Multivariate Mixtures	215
7.1	Multivariate Normal Distributions	215
7.1.1	Finite Mixtures of Normal Distributions	216
7.2	EM Algorithm	217
7.3	Example	218
7.4	Improper Component	227
7.5	Mixture Models for the Countries in EU-SILC	230
7.6	Stability of Income	232
7.7	Confusion and Separation	234
7.A	Appendix	236
7.A.1	What Can Go Wrong in Iterations of EM	236
7.B	Programming Notes	237
7.B.1	Improper Component	245
7.B.2	Stability of Income	247
7.B.3	Confusion Index	249
8	Social Transfers	251
8.1	Capacity of Social Transfers	251
8.2	Impact of Social Transfers	254
8.3	Potential and Effectiveness	261
8.4	Nonparametric Regression	264
8.4.1	Smoothing Sequences	270
8.5	Perils of Indices	272
8.A	Appendix. Programming Notes	274
8.A.1	Nonparametric Regression	277
8.A.2	Graphics for Nonparametric Regression	281
9	Causes and Effects. Education and Income	285
9.1	Background and Motivation	285
9.2	Definitions and Notation	287
9.2.1	Treatment-Assignment Mechanism	288
9.3	Missing-Data Perspective	290
9.4	Propensity and Matched Pairs	293

9.4.1	Regression as an Alternative	294
9.5	Application	296
9.5.1	Results for Other Countries	304
9.5.2	Regression of Outcome on Treatment and Background	305
9.5.3	Potential Versions of Variables	307
9.A	Appendix. Programming Notes	308
9.A.1	Second-Level Functions	313
9.A.2	Graphics for the Balance Diagnostics	322
	Epilogue	327
	Bibliography	331
	Subject Index	341
	Index of User-Defined R Functions	353
