SECTION I FOUNDATIONS OF VISION THERAPY, 1

- 1 The Evolution of Vision Therapy, 2
- 2 Principles of Vision Therapy, 9
 - What is VT?, 9
 - What Does VT Involve?, 10
 - What Does Efficient Visual Function Involve?, 10
 - Optometric Evaluation of Visual Abilities, 12
 - Understanding Skilled Performance, 13
 - Etiology of Visual Dysfunctions, 13
 - Programming VT, 14
 - Principles Guiding Successful VT Delivery, 14
 - Care Delivery Management Alternatives, 18
- 3 Models of Vision and Their Therapeutic Implications, 21
 - The Search for a Model of Vision, 21
 - The Road Less Traveled, 22
 - Constructing the Model, 23
 - Seeking the Middle Ground, 26
 - Therapeutic Implications, 27
 - Unification Theory, 28
- 4 Hierarchical Sequencing in Vision Therapy, 29
 - Clinical Guidelines and Sequencing, 30
 - Summary, 40
- 5 Consideration of Individual Characteristics and Learning Theory in Vision Therapy, 42
 - The Myth of the Perfect Patient, 42
 - Matthew Effect, 42
 - Vision Therapy as a Learning Process, 43
 - Patient Characteristics, 43

Automaticity, 51
Vision Therapy and Learning Theory, 52
Objectives in VT, 52
Cognitivism, 55
Which Learning Theory is Best for VT?, 60

- 6 Ocular and Neurologic Disease Masquerading as Functional Vision Disorders, 63
 - Ocular and Neurologic Disease Misdiagnosed as Amblyopia, 63
 - Bilateral Amblyopia as the Incorrect Diagnosis, 67
 - Occult Neurologic Disease Masquerading as a Binocular Vision Dysfunction, 69
 - Comprehensive Evaluation of the Patient With Reduced Vision, 70
 - Summary, 72

SECTION II DIAGNOSTIC AND THERAPEUTIC GUIDELINES, 75

- 7 Amblyopia: A Microcosm of Visual Disorders, 76
 - Developmental Timelines, 76
 - Visual Information Processing and Efficiency, 79
 - Definitions of Amblyopia and Their Implications, 80
 - Visual Acuity Assessment, 81
 - Developmental Approach to Amblyopia and a Redefinition, 82
 - Classification of Amblyopia, 83
 - Occlusion Therapy, 85
 - Formulating a Therapy Plan, 86

- 8 Strabismus: Challenging the Adaptation, 89
 - Classification of Strabismus, 90
 - Genetic Factors in Strabismus, 96
 - Visual Localization and Postural Control, 96
 - Criteria for Improvement, 97
 - An Approach to Therapy, 99
 - The Surgical Option, 102
- 9 Accommodative and Vergence Disorders: Restoring Balance to a Distressed System, 105
 - High-Yield Stress Tests, 106
 - Classifications of Accommodative-Vergence Disorders, 110
 - Data Sets of Plus Lens Acceptance, 111
 - Symptomatology and Efficiency, 114
 - Performance Tests, 115
- 10 Oculomotor Dysfunctions: Classification of Saccadic and Pursuit Deficiencies, 120
 - Symptoms of Oculomotor Dysfunction, 122
 - Testing for Oculomotor Function, 123
 - Diagnosis of Oculomotor Dysfunction, 130
- 11 Developmental Visual Information-Processing Disorders: Common Threads in Perception, 137
 - Motor Factors and the DVIP Model, 137
 - Common Threads in Perception, 139
 - A Clinical Approach to DVIP Testing, 140
 - Additional Factors, 150
 - Formulating a Management Plan, 150
- 12 Acquired Visual Information-Processing Disorders: Closed Head Trauma, 154
 - Overview of the Mechanism of Head Trauma, 154
 - Overview of Brain Mapping, 155
 - Overview of the Models of Information Processing, 156
 - Optometric Management of the Patient With Closed Head Trauma, 158
 - Assessment of Higher Cerebral Functioning, 162
 - Summary, 163
- 13 Sports Vision: Therapy in Motion, 168
 - Role of Vision in Sports Performance, 168
 - Relationship of Vision to Sports Performance, 169

- Indications of Vision Problems
 - Affecting Sports Performance, 170
 - Compensation for Deficient Visual Skills and Effect on Sports Performance, 170
 - Visual Demands of Individual Sports, 170
 - Assessment of Visual Skills, 172
 - Provision of Sports Vision Therapy, 172
 - Hierarchy of SVT, 173
 - Attributes of Sports Vision Therapy Activities, 173
 - Therapy of Visual Abilities, 175
- 14 Myopia Control: Taming the Refractive Beast, 180
 - Clinical Classification, 181
 - Causes of Functional Myopia, 181
 - Behavioral Philosophy, 182
 - Studies on Myopia Control, 183
 - Nutrition and Myopia, 184
 - A Refractive State of Mind, 184
 - A Clinical Approach, 186

SECTION III PROCEDURES IN VISION THERAPY, 189

- 15 Amblyopia Therapy, 190
 - Differences in Refractive and Strabismic Amblyopia, 190
 - Sequencing Amblyopia Therapy, 191
- 16 Strabismus Therapy, 202
 - Sequencing Strabismus Therapy, 203
 - Transfer of New Skills to the Environment, 203
 - Procedures for Anomalous Correspondence, 214
 - Strabismic Therapy for Young Children, 218
 - Willing the Eyes to be Straight, 221
- 17 Accommodative and Vergence Therapy, 222
 - Degrees of Freedom, 222
 - Initial Lens Prescription, 223
 - Spatial Characteristics of Lenses and Prisms, 224
 - A Philosophy of Accommodative and Vergence Therapy, 224
 - Sequencing Accommodative and Vergence Therapy, 224
 - Accommodative Therapy Procedures, 225
 - Vergence Therapy Procedures, 230
- 18 Ocular Motility Therapy, 246
 - General Principles of Therapy, 246
 - Lighting, 246
 - Principles of DOMD Therapy (Infants and Preschoolers), 250
 - Principles of FOMD Therapy (School-Aged Children and Adults), 253

- 19 Visual Information-Processing Therapy, 263
 - Bilateral Integration, 264
 - Visuospatial Skills, 266
 - Visual Analysis, 272
 - Visuomotor Skills, 273
 - Auditory-Visual Skills, 275
- 20 Optometric Rehabilitative Therapy, 278
 - Neuroplasticity and its Relationship to the Functional Vision Model, 278
 - Treatment Strategies, 280
- 21 Sports Vision Therapy, 287
 - Program Design, 287
 - Vision Therapy Goals, 289
 - Home Vision Therapy, 289
 - Sports Vision Therapy Activities, 289
- 22 Myopia Control Therapy, 298
 - Contact Lenses and Myopia Containment, 298
 - Probes of the Potential for Myopia Control, 299
 - The Eclectic Approach to Myopia Control, 299
 - Evaluating Therapies for Myopia Control, 300
 - Stress-Reduction Techniques, 300
 - Uniquely Optometric Vision Therapy, 306

SECTION IV PRACTICE MANAGEMENT AND ADMINISTRATION, 311

- 23 Guidelines for Case Summary and Presentation, 312
 - Vision Therapy Evaluation, 312
 - Preliminary Management Considerations, 312
 - Fluid Concepts and Creative Analogies, 314
 - Treatment Options and Prognoses, 317
 - Addressing Conceptual Concerns, 319
 - Presentation of the Therapy Program, 321
 - Ethical Considerations, 323

- 24 Protocols of Vision Therapy, 325
 - Arranging a Therapy Schedule, 325
 - Role of the Assistant in Vision Therapy, 326
 - Role of the Patient in Vision Therapy, 329
 - Balance Between Office and Home Therapy, 330
 - Individual Versus Group or Multiple Therapy, 330
 - Flow of Multiple or Group Therapy, 331
 - Progress Evaluations, 333
 - Posttherapy Evaluation and Follow-up Schedule, 333
 - Alternate Schedules of Therapy, 334
- 25 Administration and Correspondence, 336
 - Self-Generated External Referral, 336
 - Intraprofessional Referral, 337
 - Interprofessional Referral, 341
 - Internal Referral, 342
 - Third-Party Coverage of VT, 343
 - Correspondence, 344

APPENDICES, 346

- A Reprint of *The Efficacy of Optometric Vision Therapy*, 346
- B Asthenopia Questionnaire, 358
- C Pre-Vision Therapy Survey, 358
- D Post-Vision Therapy Survey, 359
- E Vision Therapy Evaluation, 359
- F Vision Therapy Financial Agreement, 360
- G Getting a Second Opinion About Vision Therapy, 361
- H Referral Protocol—Ethics, 362
- I Ophthalmology and Vision Therapy: Issues in Health Care Reform, 362
- J Paul is Alive, but is he Well?, 366
