Cha	pter 1: Introduction to Artificial Intelligence	7
66 66 66 72 72 78 78 82 82 89 82 98 98 98 98 98 99 99 100 100	What is Artificial Intelligence? Why do we need to study AI? Applications of AI Branches of AI Defining intelligence using Turing Test Making machines think like humans Building rational agents General Problem Solver Solving a problem with GPS Building an intelligent agent Types of models Installing Python 3 Installing on Ubuntu Installing on Mac OS X Installing on Windows Installing packages Loading data Summary	8 8 12 14 16 18 20 21 22 24 24 25 25 26 26 27 29
Cna	pter 2: Classification and Regression Using Supervised Learning	31
	Supervised versus unsupervised learning What is classification? Preprocessing data Binarization Mean removal Scaling Normalization Label encoding Logistic Regression classifier Naïve Bayes classifier Confusion matrix Support Vector Machines	31 32 33 33 34 35 36 37 38 43 47 50
	Classifying income data using Support Vector Machines	52

	What is Regression?	55
	Building a single variable regressor	56
	Building a multivariable regressor	59
	Estimating housing prices using a Support Vector Regressor	61
	Summary	63
Chap	oter 3: Predictive Analytics with Ensemble Learning	65
1	What is Ensemble Learning?	65
	Building learning models with Ensemble Learning	66
	What are Decision Trees?	66
	Building a Decision Tree classifier	67
	What are Random Forests and Extremely Random Forests?	72
	Building Random Forest and Extremely Random Forest classifiers	72
	Estimating the confidence measure of the predictions	78
	Dealing with class imbalance	82
	Finding optimal training parameters using grid search	89
	Computing relative feature importance	92
	Predicting traffic using Extremely Random Forest regressor	95
	Summary alebom to aequi	98
Chap	oter 4: Detecting Patterns with Unsupervised Learning	99
25	What is unsupervised learning?	99
	Clustering data with K-Means algorithm	100
	Estimating the number of clusters with Mean Shift algorithm	106
	Estimating the quality of clustering with silhouette scores	109
	What are Gaussian Mixture Models?	114
	Building a classifier based on Gaussian Mixture Models	115
	Finding subgroups in stock market using Affinity Propagation model	120
31	Segmenting the market based on shopping patterns	122
	Summary Summary	126
Chap	oter 5: Building Recommender Systems	127
34	Creating a training pipeline	127
	Extracting the nearest neighbors	130
	Building a K-Nearest Neighbors classifier	134
	Computing similarity scores	141
	Finding similar users using collaborative filtering	145
	Building a movie recommendation system	148
	Summary xhtem noisufno0	151
Chap	Support Vector Machines Support Vector Machines	153
03	Classification income date voine Crement Manter Machines	

[ii]

Understanding the building blocks of logic programming156Solving problems using logic programming156Installing Python packages157Matching mathematical expressions157Validating primes159Parsing a family tree161Analyzing geography167Building a puzzle solver170Summary174Chapter 7: Heuristic Search Techniques175What is heuristic search?175Uninformed versus Informed search176Constraint Satisfaction Problems177Local search techniques177Simulated Annealing178Constructing a string using greedy search179Solving a problem with constraints188Building a maze solver194Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Solving the region-coloring problem201Building a maze solver203Visualizing the evolution210Solving the symbol regression problem210Solving the symbol regression problem210Solving the symbol regression problem210Solving the symbol regression problem210Summary224Summary224Summary224		What is logic programming?	153

Simulated Annealing178Constructing a string using greedy search179Solving a problem with constraints183Solving the region-coloring problem186Building an 8-puzzle solver189Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summary214			
Constructing a string using greedy search179Solving a problem with constraints183Solving the region-coloring problem186Building an 8-puzzle solver189Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summary214			
Solving a problem with constraints183Solving the region-coloring problem186Building an 8-puzzle solver189Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summary204			
Solving the region-coloring problem186Building an 8-puzzle solver189Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224			
Building an 8-puzzle solver189Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224		STED 1611092 D0100872390011	
Building a maze solver194Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224		Ruilding an 8-nuzzle colver	
Summary199Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summary201		Building a maze solver	
Chapter 8: Genetic Algorithms201Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summany201		Summary	
Understanding evolutionary and genetic algorithms201Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Output210Solving the symbol regression problem219Building an intelligent robot controller224	Cha	Extracting statistics from time-series data	
Fundamental concepts in genetic algorithms202Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summary201			
Generating a bit pattern with predefined parameters203Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224			
Visualizing the evolution210Solving the symbol regression problem219Building an intelligent robot controller224Summary201			
Solving the symbol regression problem219Building an intelligent robot controller224Summary224			
306 Visualizing audio signals		Solving the symbol regression problem	
306 Visualizing audio signals		Building an intelligent robot controller	
		Summary	
	Cha	Fransforming audic signals to the requency gomain	
Using search algorithms in games 234			
Combinatorial search 234 Minimax algorithm 235			
Negamax algorithm236Installing easyAl library236		Installing easyAl library	
Installing easyAl library236Building a bot to play Last Coin Standing237		Building a bot to play Last Coin Standing	

	Building a bot to play Tic-Tac-Toe	241
	Building two bots to play Connect Four™ against each other	244
	Building two bots to play Hexapawn against each other	248
157	Summary	252
Cha	pter 10: Natural Language Processing	253
	Introduction and installation of packages	253
	l okenizing text data	255
	Converting words to their base forms using stemming	256
	Converting words to their base forms using lemmatization	258
	Dividing text data into chunks	260
	Extracting the frequency of terms using a Bag of Words model	262
	Building a category predictor	265
	Constructing a gender identifier cases betrack as a second and a secon	268
	Building a sentiment analyzer ameldor9 noitosteits2 tristeno0	271
	Topic modeling using Latent Dirichlet Allocation	275
178	Summary relative teature importance philsennA betslumi2	278
Cha	pter 11: Probabilistic Reasoning for Sequential Data	279
	Understanding sequential data	279
	Handling time-series data with Pandas	280
	Slicing time-series data	283
	Operating on time-series data	285
	Extracting statistics from time-series data	288
	Generating data using Hidden Markov Models	292
	Identifying alphabet sequences with Conditional Random Fields	295
	Stock market analysis	300
	Summary	303
Cha	pter 12: Building A Speech Recognizer	305
	Working with speech signals	305
	Visualizing audio signals	306
	Transforming audio signals to the frequency domain	309
	Generating audio signals	311
	Synthesizing tones to generate music and inclusion of the second se	314
	Extracting speech features	316
	Recognizing spoken words	320
	Summary movie recommendation system gaining ste8-sigiA	326
Cha	pter 13: Object Detection and Tracking	327
(385)	Installing OpenCV	328
	Building a bot to play Last Coin Standing	020

Frame differencing	328
Tracking objects using colorspaces	331
Object tracking using background subtraction	335
Building an interactive object tracker using the CAMShift algorithm	339
Optical flow based tracking	347
Face detection and tracking	354
Using Haar cascades for object detection	354
Using integral images for feature extraction	355
Eye detection and tracking	358
Summary	361
Chapter 14: Artificial Neural Networks	363
Introduction to artificial neural networks	363
Building a neural network	364
Training a neural network	364
Building a Perceptron based classifier	365
Constructing a single layer neural network	369
Constructing a multilayer neural network	373
Building a vector quantizer	378
Analyzing sequential data using recurrent neural networks	381
Visualizing characters in an Optical Character Recognition database	385
Building an Optical Character Recognition engine	388
Summary	391
Chapter 15: Reinforcement Learning	393
Understanding the premise	393
Reinforcement learning versus supervised learning	394
Real world examples of reinforcement learning	395
Building blocks of reinforcement learning	396
Creating an environment	397
Building a learning agent	402
Summary Summary	406
Chapter 16: Deep Learning with Convolutional Neural Networks	407
What are Convolutional Neural Networks?	407
Architecture of CNNs	408
Types of layers in a CNN	409
Building a perceptron-based linear regressor	410
Building an image classifier using a single layer neural network	416
Building an image classifier using a Convolutional Neural Network	418
Summary	424

Index	Frame differencing Prame differencing	425
168	Tracking objects using colorspaces which yok of aloo ow pribled	244
	Object tracking using background subtraction of stod own gniblius	
	Training a neural network methods and the service and the serv	
	Visualizing eutro alginate	
	Recognizing spoken words MNO s ni eneysi to sequT	
	Building a perceptron-based linear regressor	
	Summary .
