

Understanding Complex Systems

Eckehard Schöll · Sabine H.L. Klapp · Philipp Hövel *Editors*

## Control of Self-Organizing Nonlinear Systems

The book summarizes the state-of-the-art of research on control of self-organizing nonlinear systems with contributions from leading international experts in the field. The first focus concerns recent methodological developments including control of networks and of noisy and time-delayed systems. As a second focus, the book features emerging concepts of application including control of quantum systems, soft condensed matter, and biological systems. Special topics reflecting the active research in the field are the analysis and control of chimera states in classical networks and in quantum systems, the mathematical treatment of multiscale systems, the control of colloidal and quantum transport, the control of epidemics and of neural network dynamics.

## **Part I Theoretical Methods**

- 1 Controlling Chimera Patterns in Networks:  
Interplay of Structure, Noise, and Delay . . . . . 3**  
Anna Zakharova, Sarah A.M. Loos, Julien Siebert,  
Aleksandar Gjurchinovski, Jens Christian Claussen  
and Eckehard Schöll
- 2 Dynamics of Fully Coupled Rotators with Unimodal  
and Bimodal Frequency Distribution. . . . . 25**  
Simona Olmi and Alessandro Torcini
- 3 Adaptively Controlled Synchronization of Delay-Coupled  
Networks . . . . . 47**  
Philipp Hövel, Judith Lehnert, Anton Selivanov,  
Alexander Fradkov and Eckehard Schöll
- 4 Controlling Oscillations in Nonlinear Systems  
with Delayed Output Feedback. . . . . 65**  
Fatihcan M. Atay
- 5 Global Effects of Time-Delayed Feedback Control Applied  
to the Lorenz System . . . . . 81**  
Anup S. Purewal, Bernd Krauskopf and Claire M. Postlethwaite
- 6 Symmetry-Breaking Control of Rotating Waves . . . . . 105**  
Isabelle Schneider and Bernold Fiedler
- 7 On the Interplay of Noise and Delay in Coupled Oscillators. . . . . 127**  
Otti D’Huys, Thomas Jüngling and Wolfgang Kinzel
- 8 Noisy Dynamical Systems with Time Delay: Some Basic  
Analytical Perturbation Schemes with Applications . . . . . 147**  
Wolfram Just, Paul M. Geffert, Anna Zakharova and Eckehard Schöll
