

"Simon Springer's brilliant vision of an emancipatory spatiality is a thoughtful retort to the orthodoxies of radical geography, a welcome challenge to the territorial imperatives of the neoliberal state, and a thrilling invitation to consider how another world may be possible."

—**Audrey Kobayashi, Queen's University**

"Highly persuasive, robust, and original, *The Anarchist Roots of Geography* is impossible to ignore. It will provoke and agitate those who need it because it fundamentally changes the assumptions about what it is to be truly radical in a time of crisis."

—**Richard J. White, Sheffield Hallam University**

"Simon Springer's guide to what an anarchist geography might mean is spirited, lucid, and historically deep. It is also, to his great credit, insistent on the creative role of strife and conflict."

—**James C. Scott, Yale University**

The *Anarchist Roots of Geography* sets the stage for a radical politics of possibility and freedom through a discussion of the insurrectionary geographies that suffuse our daily experiences. By embracing anarchist geographies as kaleidoscopic spatialities that allow for nonhierarchical connections between autonomous entities, Simon Springer configures a new political imagination. We can no longer accept the decaying, archaic geographies of hierarchy that chain us to statism, capitalism, gender domination, racial oppression, and imperialism. Geography must become beautiful, wherein the entirety of its embrace is aligned to emancipation.

SIMON SPRINGER is associate professor of geography at the University of Victoria, Canada. He is author of *Violent Neoliberalism: Development, Discourse, and Dispossession in Cambodia*, *Cambodia's Neoliberal Order: Violence, Authoritarianism, and the Contestation of Public Space*, and *The Discourse of Neoliberalism: An Anatomy of a Powerful Idea*.
