

Contents

List of Abbreviations	XVII
------------------------------------	-------------

Part A Fundamentals

1 The Fundamental Constants	
<i>Werner Martienssen</i>	3
1.1 What are the Fundamental Constants and Who Takes Care of Them?	3
1.2 The CODATA Recommended Values of the Fundamental Constants ..	5
References	9
2 The International System of Units (SI), Physical Quantities, and Their Dimensions	
<i>Werner Martienssen</i>	11
2.1 The International System of Units (SI)	11
2.2 Physical Quantities	12
2.3 The SI Base Units	13
2.4 The SI Derived Units	16
2.5 Decimal Multiples and Submultiples of SI Units	18
2.6 Units Outside the SI	19
2.7 Some Energy Equivalents	23
References	24
3 Rudiments of Crystallography	
<i>Wolf Assmus</i>	25
3.1 Crystalline Matter	26
3.2 Disorder	35
3.3 Amorphous Matter	36
3.4 Methods for Investigating Crystallographic Structure	36
3.5 Recent Novel Topics in Crystallography	38
References	39
4 The Elements	
<i>Werner Martienssen</i>	41
4.1 How to Use this Chapter	42
4.2 Description of Properties Tabulated	42
4.3 Sources	45
4.4 Tables of the Elements in Different Orders	46
4.5 Data	51
References	143

Part B Metals

5 Magnesium and Magnesium Alloys

<i>Hajo Dieringa, Karl Ulrich Kainer</i>	147
5.1 Magnesium	148
5.2 Magnesium Alloys	150
5.3 Melting and Casting Practices, Heat Treatment	153
5.4 Joining	153
5.5 Corrosion Behavior	154
5.6 Recent Developments	154
References	155

6 Aluminum and Aluminum Alloys

<i>Catrin Kammer</i>	157
6.1 Production of Aluminum	158
6.2 Properties of Pure Al	158
6.3 Aluminum Alloy Phase Diagrams	161
6.4 Classification of Aluminum Alloys	166
6.5 Structure and Basic Mechanical Properties of Wrought Work-Hardenable Aluminum Alloys	167
6.6 Structure and Basic Mechanical Properties of Wrought Age-Hardenable Aluminum Alloys	168
6.7 Structure and Basic Mechanical Properties of Aluminum Casting Alloys	171
6.8 Technical Properties of Aluminum Alloys	173
6.9 Thermal and Mechanical Treatment	181
6.10 Corrosion Behavior of Aluminum	191
References	192

7 Titanium and Titanium Alloys

<i>Hans Warlimont</i>	195
7.1 Titanium	195
7.2 Ti-Based Alloys	199
7.3 Intermetallic Ti-Al Materials	200
7.4 TiNi Shape-Memory Alloys	205
References	206

8 Zirconium and Zirconium Alloys

<i>Hans Warlimont</i>	207
8.1 Zirconium	207
8.2 Technically-Pure and Low-Alloy Zirconium Materials	208
8.3 Zirconium Alloys in Nuclear Applications	209
8.4 Zirconium-Based Bulk Glassy Alloys	210
References	212

9 Iron and Steels

<i>Alfred Koethe, Hans Warlimont</i>	213
9.1 Phase Relations and Phase Transformations	214
9.2 Carbon and Low-Alloy Steels	220
9.3 High-Strength Low-Alloy Steels	231
9.4 Stainless Steels	237

9.5	Heat-Resistant Steels	250
9.6	Tool Steels	254
9.7	Cast Irons	260
	References	265
10	Cobalt and Cobalt Alloys	
	<i>Hans Warlimont</i>	267
10.1	Co-Based Alloys	268
10.2	Co-Based Hard-Facing Alloys and Related Materials	269
10.3	Co-Based Heat-Resistant Alloys, Superalloys	270
10.4	Co-Based Corrosion-Resistant Alloys	271
10.5	Co-Based Surgical Implant Alloys	272
10.6	Cemented Carbides	272
	References	274
11	Nickel and Nickel Alloys	
	<i>Hans Warlimont</i>	275
11.1	Commercially Pure and Low-Alloy Nickels	275
11.2	Highly Alloyed Ni-Based Materials	277
11.3	Ni-Based Superalloys	280
11.4	Ni Plating	292
	References	292
12	Copper and Copper Alloys	
	<i>Jens Freudenberger, Hans Warlimont</i>	293
12.1	Unalloyed Coppers	294
12.2	High-Copper Alloys	295
12.3	Brasses	296
12.4	Bronzes	298
12.5	Copper-Nickel Alloys	300
	References	301
13	Refractory Metals and Refractory Metal Alloys	
	<i>Wolfram Knabl, Gerhard Leichtfried, Roland Stickler</i>	303
13.1	Physical Properties	306
13.2	Chemical Properties	308
13.3	Recrystallization Behavior	311
13.4	Mechanical Properties	314
	References	329
14	Noble Metals and Noble Metal Alloys	
	<i>Günther Schlamp</i>	335
14.1	Silver and Silver Alloys	337
14.2	Gold and Gold Alloys	352
14.3	Platinum Group Metals and Their Alloys	367
	References	407
15	Lead and Lead Alloys	
	<i>Frank E. Goodwin, Sivaraman Guruswamy, Hans Warlimont</i>	409
15.1	Pure Grades of Lead	410
15.2	Pb-Sb Alloys	414
15.3	Pb-Sn Alloys	416

15.4	Pb-Ca Alloys	418
15.5	Pb-Bi Alloys	420
15.6	Pb-Ag Alloys	422
15.7	Pb-Cu, Pb-Te, and Pb-Cu-Te Alloys	422
15.8	Pb-As Alloys	422
15.9	Lead Cable-Sheathing Alloys	422
15.10	Other Lead Alloys	423
15.11	Composite Lead-Battery Grids	423
	References	425
16	Zinc and Zinc Alloys	
	<i>Frank E. Goodwin</i>	427
16.1	Naturally Occurring Zinc	428
16.2	Zinc Metal Grades And Standards	428
16.3	Properties of Zinc	429
16.4	Uses of Zinc	432
	References	438
Part C	Nonmetallic Materials	
17	Ceramics	
	<i>Hans Warlimont</i>	441
17.1	Traditional Ceramics and Cements	441
17.2	Silicate Ceramics	443
17.3	Refractory Ceramics	446
17.4	Oxide Ceramics	446
17.5	Nonoxide Ceramics	457
	References	484
18	Polymers	
	<i>Manfred Dieter Lechner</i>	485
18.1	Definitions and Selected Polymers	485
18.2	Structural Units of Polymers	488
18.3	Abbreviations	491
18.4	Tables and Figures	492
	References	536
19	Glasses	
	<i>Dieter Krause</i>	537
19.1	Properties of Glasses – General Comments	540
19.2	Composition and Properties of Glasses	541
19.3	Flat Glass and Hollowware	542
19.4	Technical Specialty Glasses	544
19.5	Optical Glasses	556
19.6	Vitreous Silica	570
19.7	Glass-Ceramics	571
19.8	Glasses for Miscellaneous Applications	572
	References	584

Part D Functional Materials

20 Semiconductors

<i>Werner Martienssen</i>	587
20.1 Group IV Semiconductors and IV–IV Compounds	590
20.2 III–V Compounds	615
20.3 II–VI Compounds	661
References	697

21 Superconductors

<i>Günter Fuchs, Claus Fischer, Bernhard Holzapfel, Barbara Schüpp-Niewa, Hans Warlimont</i>	701
21.1 Metallic Superconductors	702
21.2 Non–Metallic Superconductors	715
References	747

22 Magnetic Materials

<i>Manfred Müller, Hideki Harada, Hans Warlimont</i>	753
22.1 Basic Magnetic Properties	753
22.2 Soft Magnetic Alloys	756
22.3 Hard Magnetic Alloys	788
22.4 Magnetic Oxides	803
References	806

23 Dielectrics and Electrooptics

<i>Gagik G. Gurzadyan, Pancho Tzankov</i>	809
23.1 Dielectric Materials: Low–Frequency Properties	813
23.2 Optical Materials: High–Frequency Properties	814
23.3 Guidelines for Use of Tables	816
23.4 Tables of Numerical Data for Dielectrics and Electrooptics	818
References	884

24 Ferroelectrics and Antiferroelectrics

<i>Toshio Mitsui</i>	897
24.1 Definition of Ferroelectrics and Antiferroelectrics	898
24.2 Survey of Research on Ferroelectrics	898
24.3 Classification of Ferroelectrics	900
24.4 Physical Properties of 43 Representative Ferroelectrics	905
References	929

25 Materials for Solid Catalysts

<i>Karsten Ruth, Peter Albers</i>	931
25.1 Catalysts as Functional Material	931
25.2 Catalytically Active Materials	938
25.3 Components of a Catalyst	943
25.4 Deactivation	945
25.5 Characterization	948
References	950

Part E Special Structures

26 Liquid Crystals

<i>Sergei Pestov, Volkmar Vill</i>	955
26.1 Liquid Crystalline State	955
26.2 Physical Properties of the Most Common Liquid Crystalline Substances	959
26.3 Physical Properties of Some Liquid Crystalline Mixtures	985
References	987

27 The Physics of Solid Surfaces

<i>Gianfranco Chiarotti</i>	989
27.1 The Structure of Ideal Surfaces	990
27.2 Surface Reconstruction and Relaxation	996
27.3 Electronic Structure of Surfaces	1005
27.4 Surface Phonons	1020
27.5 The Space Charge Layer at the Surface of a Semiconductor	1028
References	1033

28 Nanostructured Materials

<i>Fabrice Charra, Susana Gota-Goldmann, Hans Warlimont</i>	1037
28.1 Introduction	1038
28.2 Electronic Structure and Spectroscopy	1040
28.3 Electromagnetic Confinement	1050
28.4 Magnetic Nanostructures	1054
28.5 Preparation Techniques	1068
References	1071

29 Low-Dimensional Semiconductors

<i>Udo W. Pohl</i>	1077
29.1 Electronic Confinement	1077
29.2 Optical Confinement	1090
References	1098
