Chapter 1 - MQL5 Basics

MQL5 Programs

File Extensions

Other File Types

File Locations

MetaEditor

MQL5 Wizard

Compilation

Syntax

Identifiers

Comments

Chapter 2 - Variables & Data Types

Variables

Data Types

Integer Types

Real Types

String Type

Boolean Type

Color Type

Datetime Type

Constants

Arrays

Multi-Dimensional Arrays

Iterating Through Arrays

Enumerations

Structures

Typecasting

Input Variables

Local Variables

Global Variables

Static Variables	30
Predefined Variables	31
Chapter 3 - Operations	33
Operations	33
Addition & Multiplication	33
Subtraction & Negation	33
Division & Modulus	34
Assignment Operations	34
Relation Operations	35
Boolean Operations	36
Chapter 4 - Conditional & Loop Operators	39
Conditional Operators	39
The if Operator	39
The else Operator	40
Ternary Operator	41
Switch Operator	42
Loop Operators	44
The while Operator	44
The do-while Operators	45
The for Operator	46
The break Operator	47
The continue Operator	48
Chapter 5 - Functions	49
Functions	49
Default Values	50
The return Operator	52
The void Type	52
Passing Parameters by Reference	53
Overloading Functions	54
Chapter 6 - Object-oriented Programming	57
Classes	58
Access Modifiers	58
Constructors	60
Derived Classes	61
Virtual Functions	62

Objects	63
Chapter 7 - The Structure of an MQL5 Program	65
Preprocessor Directives	65
#property Directive	65
#define Directive	66
#include Directive	67
Input and Global Variables	68
Classes and Functions	68
Event Handlers	68
An Example Program	69
Chapter 8 - Expert Advisor Basics	71
Position Accounting Systems	71
Netting Position System	71
Hedging Position System	72
Market Orders	72
Expert Advisor Event Handlers	74
OnInit()	74
OnDeinit()	74
OnTick()	75
OnTrade()	75
OnTimer()	75
Creating An Expert Advisor in MetaEditor	75
Chapter 9 - Order Placement	79
OrderSend()	79
The MqlTradeRequest Structure	79
Open a Market Order	82
Add Stop Loss & Take Profit	83
Close a Market Order	84
Modifying and Closing Hedging Orders	85
Close By Operation	85
Open a Pending Order	86
Modify a Pending Order	86
Remove a Pending Order	87
The MqlTradeResult Structure	87
A Simple Expert Advisor	89
Hedging Version	93

Chapter 10 - Creating An Order Placement Class 97

CTrade Class 97

The OpenPosition() Function 98

Error Handling 101

Retry On Error 106

Setting the Deviation, Magic Number and Fill Type 109

Using the OpenPosition() Function 111

CTradeHedge Class 114

Using the CTradeHedge Class 117

Chapter 11 - Stop Loss & Take Profit 121

Calculating A Fixed Stop Loss and/or Take Profit Price 121

Stop Loss 121

Take Profit 124

Creating Stop Calculation Functions 125

Stop Level 127

Creating Stop Verification Functions 128

Using The Stop Calculation and Verification Functions 130

Using A Dynamic Stop Loss 132

Chapter 12 - Handling, Modifying & Closing Positions 135

Position Information Functions 135

Hedging Accounts 137

Retrieving A List of Open Positions 137

Position Information Functions for Hedging Accounts 143

Creating a Position Modification Function 143

Hedging Accounts 146

Closing Positions 148

Closing Positions on Hedging Accounts 151

Using the Position Information, Modification and Closing Functions 152

Hedging Accounts 154

Chapter 13 - Pending Orders 157

The OpenPending() Function 158

Using The OpenPending() Function 160

Handling Pending Orders 162

Order Information Functions 166

Modifying Pending Orders	168
The ModifyPending() Function	170
Deleting Pending Orders	173
Creating A Pending Order Expert Advisor	175
Using Pending Orders to Scale Out of a Position	179
Chapter 14 - Trailing Stops	181
What is a Trailing Stop?	181
Minimum Profit	183
Stepping A Trailing Stop	184
The CTrailing Class	185
Using a Dynamic Trailing Stop	187
Break Even Stop	189
The BreakEven() Function	191
Trailing Stops on Hedging Accounts	192
Further Examples	196
Chapter 15 - Money Management & Trade Sizing	197
Verifying Trade Volume	197
Money Management	198
Chapter 16 - Bar and Price Data	203
Accessing Current Prices	203
The MqlTick Structure	204
Bar Data	205
CopyRates() and the MqlRates Structure	205
Other Copy...() Functions	209
Highest and Lowest Prices	210
Price-Based Trading Signals	212
Candle Patterns	213
Chapter 17 - Using Indicators in Expert Advisors	215
Single Buffer Indicators	215
Multi-Buffer Indicators	218
The CIndicator Class	220
Derived Classes	222
Object Initialization	225
Custom Indicators	227
The iCustom() Function	228

A Custom Indicator Class?	230
Indicator-based Trading Signals	231
Turning Indicators On and Off	234
Chapter 18 - Working with Time and Date	237
Trading On New Bar Open	237
The CNewBar Class	237
The datetime Type	240
The MqlDateTime Structure	241
Creating A Trade Timer Class	244
The CreateDateTime() Function	244
The CTimer Class	245
The DailyTimer() Function	247
The PrintTimerMessage() Function	250
The BlockTimer() Function	251
Retrieving StartTime and EndTime	255
The OnTimer() Event Handler	256
Chapter 19 - Putting It All Together	259
Creating A Template	259
Hedging Accounts Template	265
Moving Average Cross	266
Moving Average Cross for Hedging Accounts	268
Bands/RSI Counter-trend System	268
Counter-trend System for Hedging Accounts	272
A Pending Order Template	272
Breakout Trading System	274
Chapter 20 - Tips & Tricks	279
User Information and Interaction	279
Alert() Function	279
MessageBox() Function	280
SendMail() Function	281
Sending Mobile Notifications	282
Playing Sound	282
Comment() Function	283
Chart Objects	283
Creating and Modifying Objects	283
Retrieving Time and Price From Line Objects	286

Label and Arrow Objects	287
Deleting Objects	288
File Functions	288
Writing to a CSV File	289
Reading From a CSV File	291
Global Variables	292
Stopping Execution	294
 Chapter 21 - Indicators, Scripts & Libraries	 295
Indicators	295
Drawing Styles	295
The OnCalculate() Event Handler	295
SQL Wizard	297
Calculating the Indicator	300
Scripts	302
Libraries	306
 Chapter 22 - Debugging and Testing	 309
Errors	309
Compilation Errors	309
Runtime Errors	310
Trade Server Errors	311
Debugging	311
Logging	312
Using the Strategy Tester	313
Optimization	317
Evaluating Testing Results	319
