

# CONTENTS

Foreword by Allan N. Schore ix

Preface xvii

## PART I

### Foundational Neuroscience Concepts

Chapter 1: Affect Regulation and the Autonomic Nervous  
System: Illustrations from a Case History 3

Chapter 2: Defense Mechanisms and the Limbic System 28

Chapter 3: Threat Management and the Amygdala 65

Chapter 4: Therapeutic Engagement Issues and the Vagal System 90

Chapter 5: Personality Disorders as Affect Management  
Strategies 114

## PART II

### Special Populations and Topics

Chapter 6: The Adolescent Brain: Selected Functions  
That Differ from the Adult Brain 193

Chapter 7: Working with Groups: How Selected Principles of Regulation Theory Can be Applied to Group Work	217
Chapter 8: Integrating Selected Neurobiological Concepts into the Supervisory Process	244
Epilogue	278
Appendix A: Identifying Defense Mechanisms Worksheet	281
Appendix B: Diagnostic Criteria	285
References	292
Index	319
