Glossary of Abbreviations

<i>Introduction</i>	p. 7
PART I	
CATEGORIZATION: THE BRIDGE BETWEEN PERCEPTION, LANGUAGE AND THOUGHT	p. 10
CHAPTER 1: SOME USEFUL DISTINCTIONS	p. 18
1.1. Concept Intension and Extension	p. 18
1.2. Categories and Concepts	p. 20
1.3. Concepts, Words and the World	p. 23
1.4. Sense and Concept	p. 26
CHAPTER 2: A TYPOLOGY OF CATEGORIZATION	p. 31
2.1. Non-Linguistic Objects: Extralinguistic and Semilinguistic Categories	p. 34
a) <i>Cognitive Origin: Learned vs. Innate or Acquired Categories</i>	
b) <i>Types of Concepts</i>	
c) <i>Types of Objects</i>	
d) <i>Types of Features, Attributes or Properties</i>	
e) <i>External Organization: Hierarchies and Gradations</i>	
f) <i>Vagueness</i>	
g) <i>The Categorizer</i>	
2.2. Linguistic Objects: Metalinguistic Categories	p. 46
CHAPTER 3: GOALS, OBJECTS AND TOOLS	p. 53
PART II	
THEORIES AND MODELS	
OF CATEGORIZATION AND REPRESENTATION	p. 58
CHAPTER 4: DISCRETE CATEGORIZATION. THE CLASSICAL APPROACH	p. 60
4.1. Features and Development	p. 60
4.2. Illustrative Examples of Discrete Categorization	p. 72
4.3. Critical Review: Advantages and Limitations of Discrete Approaches	p. 77
CHAPTER 5: NON-DISCRETE CATEGORIZATION. NOTIONS, THEORIES AND CONSTRUCTS	p. 85
5.1. Features and Development	p. 85
a) <i>The Forerunners of Continuity</i>	
a.1.) The Philosophy of Language: Wittgenstein's "family resemblance"	
a.2.) Mathematics, Logic and Linguistics: Zadeh's Fuzzy Set Theory	
a.3.) Structural Linguistics: The Circle of Prague	

- b) *Interdisciplinary Development: Cognitive Science*
 - b.1.) **Anthropology and Linguistics:**
The Categorization of Colour
 - b.2.) **Cognitive Psychology: Rosch's Prototype Theory**
 - b.3.) **Artificial Intelligence: Network Theories**
- c) *Advances in Linguistics: Continua, Scales and Prototypes*
 - c.1.) **Generative Grammar**
 - c.2.) **Valency Grammar**
 - c.3.) **Functionalism and Linguistic Typology**
 - c.4.) **The Evolution of Prototype Theory**
- d) *The Consolidation: Cognitive Grammar*
 - d.1.) **Langacker's Schematic Networks**
 - d.2.) **Lakoff's Radial Networks**
 - d.3.) **Hawkins' Natural Model**

5.2. Illustrative Examples of Non-discrete Categorization

p. 179

- a) *Fuzzy Boundaries and Graded Membership*
- b) *Roshian Prototypes and Metalinguistic Adjustments*
- c) *Scales and Continua*
- d) *Radial and Schematic Networks*

5.3. Critical Review: Advantages and Limitations of Non-discrete Approaches

p. 234

EPILOGUE: CONCLUSIONS AND QUESTIONS

p. 238
