

Contents

| | | | |
|---|-----------|--|-----------|
| To the student | 5 | 6 Coasts | 48 |
| 1 Fieldwork investigations | 6 | 6.1 Wave energy | 48 |
| 1.1 Types of fieldwork | 6 | 6.2 Beach profiles | 49 |
| 1.2 How to choose a title | 6 | 6.3 Longshore drift | 50 |
| 1.3 Investigation method | 10 | 6.4 Beach sediment analysis | 51 |
| 1.4 How to carry out a fieldwork study | 11 | 6.5 Cliffs | 52 |
| 1.5 Fieldwork safety | 11 | 6.6 Sand dunes | 53 |
| Part A: Collecting the information | 13 | 6.7 Salt marshes | 55 |
| 2 Sampling | 13 | 6.8 Coastal protection | 56 |
| 2.1 Why do we sample? | 13 | 6.9 Sea-level change | 57 |
| 2.2 Avoiding bias | 13 | 6.10 Project suggestions | 58 |
| 2.3 Sampling methods | 14 | 7 Ecology and pollution | 59 |
| 2.4 Sample size | 16 | 7.1 Soils | 59 |
| 3 Geology, landforms and slopes | 17 | 7.2 Project suggestions: soils | 64 |
| 3.1 Geology | 17 | 7.3 Vegetation | 66 |
| 3.2 Weathering | 17 | 7.4 Project suggestions: vegetation | 70 |
| 3.3 Project suggestions | 21 | 7.5 Air pollution | 72 |
| 3.4 Slope surveying | 21 | 7.6 Project suggestions: air pollution | 76 |
| 3.5 Field sketching | 23 | 7.7 Water pollution | 77 |
| 3.6 Morphological mapping | 23 | 7.8 Project suggestions: water pollution | 80 |
| 3.7 Ordnance Survey maps | 24 | 7.9 Ecology and pollution data sources on the internet | 80 |
| 3.8 Photographs and postcards | 26 | 8 Local climate | 81 |
| 3.9 Sediment analysis of glacial and fluvio-glacial landforms | 26 | 8.1 Radiation and sunshine | 81 |
| 3.10 Project suggestions | 30 | 8.2 Temperature | 81 |
| 3.11 Geology data sources on the internet | 30 | 8.3 Humidity | 83 |
| 4 Hydrology | 31 | 8.4 Rain | 84 |
| 4.1 Inputs | 32 | 8.5 Atmospheric pressure | 85 |
| 4.2 Movement of water within the drainage basin | 32 | 8.6 Wind | 85 |
| 4.3 Outputs | 34 | 8.7 Cloud | 86 |
| 4.4 Secondary data sources | 40 | 8.8 Meteorological observations | 86 |
| 4.5 Project suggestions | 41 | 8.9 Project suggestions | 87 |
| 5 River channels | 42 | 8.10 Climate data sources on the internet | 88 |
| 5.1 River channel form | 42 | 9 Primary data sources in human geography | 89 |
| 5.2 River load | 44 | 9.1 Qualitative data | 89 |
| 5.3 Project suggestions | 47 | 9.2 Crowd sourcing | 89 |
| | | 9.3 Questionnaires | 89 |
| | | 9.4 Interviews, focus groups and oral histories | 91 |
| | | 9.5 Perception studies | 92 |
| | | 9.6 Space-time diaries | 98 |
| | | 9.7 Ethical considerations when collecting data about people | 99 |

4 CONTENTS

10 Secondary data sources in human geography 100

| | |
|---|-----|
| 10.1 Geographical Information Systems, geospatial mapping and GPS | 100 |
| 10.2 Maps | 101 |
| 10.3 Satellite images and aerial photographs | 102 |
| 10.4 The National Census | 102 |
| 10.5 Other central government population statistics | 104 |
| 10.6 Parish registers | 104 |
| 10.7 Electoral registers | 105 |
| 10.8 Rateable values and council tax bands | 105 |
| 10.9 Directories | 106 |
| 10.10 Local newspapers | 106 |
| 10.11 Planning data | 106 |
| 10.12 Big data | 106 |

11 Urban and rural studies 107

| | |
|--|-----|
| 11.1 Demographic change | 107 |
| 11.2 Social structure of urban areas | 108 |
| 11.3 Inner cities | 113 |
| 11.4 Gentrification | 114 |
| 11.5 Council housing: architecture and indices of social breakdown | 114 |
| 11.6 Retailing | 115 |
| 11.7 The impact of the closure of services in rural areas | 118 |
| 11.8 Settlement spacing and settlement hierarchies | 119 |
| 11.9 What is the impact of recreation and tourist pressure? | 121 |
| 11.10 How do cities influence the rural areas around them? | 127 |
| 11.11 The geography of fear and crime | 128 |
| 11.12 The geography of ill health | 129 |
| 11.13 What are the goals and values of farmers? | 130 |

Part B: Processing the information 131

12 Cartography 131

| | |
|---------------------------|-----|
| 12.1 Graphs | 131 |
| 12.2 Isoline maps | 135 |
| 12.3 Dot maps | 135 |
| 12.4 Proportional symbols | 137 |
| 12.5 Choropleth maps | 138 |
| 12.6 Flow-line maps | 139 |
| 12.7 Ray diagrams | 140 |
| 12.8 Topological maps | 140 |

13 Statistical methods 141

| | |
|--|-----|
| 13.1 Mean, mode and median | 141 |
| 13.2 Spread around the median and mean | 142 |
| 13.3 Correlation | 144 |
| 13.4 Confidence limits | 146 |
| 13.5 Tests of significance | 147 |

14 Spatial analysis 151

| | |
|--|-----|
| 14.1 Analysis of point distributions | 151 |
| 14.2 Index of dissimilarity | 155 |
| 14.3 The Lorenz curve and Gini coefficient | 156 |
| 14.4 Location quotient | 157 |

Part C: Presenting the information 158

15 Presentation and layout 158

| | |
|--------------------------------|-----|
| 15.1 Project structure | 158 |
| 15.2 General points to observe | 159 |

Appendices 160

| | |
|---|-----|
| A1 Random sampling numbers | 160 |
| A2 Table of z-scores | 161 |
| A3 Student's <i>t</i> -tables | 161 |
| A4 Critical values of Mann-Whitney <i>U</i> | 162 |
| A5 Critical values of chi-squared | 164 |
| A6 Useful contact details | 165 |
| A7 Sources and further reading | 167 |

Index 168
