

Contents

1 Introduction, pre-modern crop protection	11
1.1 Why this book?	11
1.2 The period of interest	14
1.3 Crop protection – a special issue?	14
1.4 The approach	16
2 Books and authors	19
2.1 A body of literature	19
2.2 Traditions in agronomy	20
2.2.1 The Graeco-Roman tradition	20
2.2.2 The Near-Eastern tradition	20
2.2.3 Cross-links between East and West	20
2.2.4 A medieval tradition	21
2.3 Three medieval authors	22
2.3.1 Selected authors	22
2.3.2 Anonymus – c.950 CE – ‘Geoponika’	22
2.3.3 Ibn al-‘Awwām – c.1200 – ‘Book on Agriculture’	23
2.3.4 Pietro Crescenzi – c.1306 – ‘On common agriculture’	24
2.4 Predecessors	27
2.4.1 Selected authors	27
2.4.2 Hesiod – c.750 BCE – ‘Days and works’	27
2.4.3 Theophrastus – c.300 BCE – ‘Enquiry into plants’ and ‘On the causes of plants’	28
2.4.4 The Roman agronomists – c.100 BCE - c.400 CE – ‘On agriculture’	28
2.4.5 Vindonius Anatolius and Cassius Bassus – 4 th to 6 th century CE	29
2.4.6 Ibn Waḥshiyya – c.900 CE – ‘Nabatean agriculture’	30
2.5 Contemporaries	31
2.5.1 Selected authors	31
2.5.2 Three Andalusian authors	31
2.5.3 Walter of Henley – c.1286 – ‘Husbandry’	32
2.5.4 Albertus Magnus – c.1200-1280 – ‘On plants’	32
2.5.5 Ibn Luyūn – 1348 – ‘Book on agriculture’	33
2.6 Successors	33
2.6.1 Selected authors	33
2.6.2 Gabriel de Herrera – 1513 – ‘Treatise on agriculture’	34
2.6.3 Olivier de Serres – 1600 – ‘Theatre of agriculture’	34
2.6.4 Miguel Agustín – 1617 – the ‘Book of the Prior’	35
2.7 Fantasy and reality	35
2.8 The audience	36

3 Pre-modern agriculture	39
3.1 Geography and climate	39
3.1.1 Geography, two scenes	39
3.1.2 Climates	40
3.1.3 Landscapes	41
3.2 Farms and farming systems	42
3.2.1 Pre-modern farming	42
3.2.2 Farm and field sizes	43
3.3 Crops and cropping systems	44
3.3.1 Crops	44
3.3.2 Planted crops	45
3.3.3 Sown crops - Cereals	48
3.3.4 Sown crops - Legumes	51
3.3.5 Sown crops - Vegetables, herbs, ornamentals	53
3.4 Crop selection and plant improvement	53
3.4.1 Crop selection	53
3.4.2 Varieties	54
3.4.3 Seed selection	54
3.4.4 Exchange of seeds and planting stock	55
3.4.5 Genetics	55
3.4.6 Transmutation	56
3.5 Environment	57
3.5.1 The abiotic environment – weather	57
3.5.2 The abiotic environment – soils	58
3.5.3 The biotic environment – ecosystem services	59
3.5.4 The phases of the moon	61
3.6 Crop management	63
3.6.1 Soil tillage - Digging	63
3.6.2 Soil tillage - Ploughing and harrowing	64
3.6.3 Fallowing and crop rotation	68
3.6.4 Sowing and planting	69
3.6.5 Irrigation and drainage	70
3.7 Harvesting, storing, processing	72
3.7.1 The harvest	72
3.7.2 The threshing floor	74
3.7.3 Storage	75
3.7.4 Yields	78
4 Harmful agents	81
4.1 Production constraints	81
4.1.1 Human constraints	81
4.1.2 Abiotic constraints	83
4.1.3 Biotic constraints	84

4.2 Mammals	85
4.2.1 Cattle	85
4.2.2 Wild boars and domestic swine	86
4.2.3 Foxes	86
4.2.4 Rabbits and hares	86
4.2.5 Voles (field mice)	87
4.2.6 Mice	88
4.2.7 Rats	88
4.2.8 Moles and mole rats	89
4.2.9 Large red mice (?)	89
4.3 Birds and reptiles	90
4.3.1 Which birds?	90
4.3.2 Bird damage at sowing time	90
4.3.3 Bird damage at harvest time	91
4.3.4 Reptiles	92
4.4 Insects	92
4.4.1 Locusts	92
4.4.2 Grasshoppers	95
4.4.3 Mole-cricket	95
4.4.4 Ants	96
4.4.5 'Fleas'	99
4.4.6 Grain weevils	99
4.4.7 Other insects	100
4.4.8 Other invertebrates	104
4.5 Plants	104
4.5.1 Weeds	104
4.5.2 Parasitic plants	109
4.6 Deficiencies and excesses	112
4.6.1 Deficiencies	112
4.6.2 Excesses	112
4.6.3 Patchiness	114
4.7 Pathogens	114
4.8 Adverse effects of weather	117
5 Pre-modern crop protection methods	121
5.1 What is to be expected?	121
5.2 Irrational and metaphysical methods	123
5.2.1 Fantastication	123
5.2.2 Magic, contract, intimidation	123
5.2.3 Anathema	125
5.2.4 Prayer	126

5.3 Cultural methods	126
5.3.1 Risk management	126
5.3.2 Prevention	127
5.3.3 Abiotic damaging agents	128
5.3.4 Weed control	131
5.3.5 Mixed cropping	135
5.3.6 Antagonism and mutualism	138
5.3.7 Soil fatigue	140
5.3.8 Biological control	141
5.4 Traps and baits	142
5.4.1 Trap crops (companion plants)	142
5.4.2 Traps	142
5.4.3 Plasters and grease bands	142
5.4.4 Baits	143
5.5 Treatments	144
5.5.1 Kinds of treatments	144
5.5.2 Hand picking	144
5.5.3 Seed treatment	145
5.5.4 Disinfection	147
5.5.5 Sprays	148
5.5.6 Repellents	149
5.5.7 Dusts	149
5.5.8 Fumigation	150
5.5.9 Fire and heat treatment	151
5.6 Curative action	152
5.6.1 Scarification	152
5.6.2 Cures	153
5.7 The 'House-leek' riddle	155
6 Natural products for pre-modern crop protection	157
6.1 Natural products	157
6.2 Non-plant substances	158
6.3 Botanicals - generalities	164
6.4 Botanicals - specifics	166
6.4.1 Sources of information	166
6.4.2 Botanicals by species	166
6.4.3 Botanicals disregarded	187
6.4.4 Some classes of bio-active molecules	187
6.5 Other plant substances	188
6.6 A personal evaluation	190

7 Pre-modern crop protection lore	193
7.1 Pre-modern agriculture and crop protection	193
7.1.1 Plant health	193
7.1.2 Crop protection singled out	194
7.1.3 The Crop Portfolio	197
7.1.4 The Pest Portfolio	197
7.1.5 The Control Portfolio	198
7.2 Revelation, experience, experiment	199
7.2.1 Revelation	199
7.2.2 Experience	199
7.2.3 Experiment	201
7.2.4 Scientific writing	202
7.2.5 Herb knowledge	203
7.2.6 The rationality of pre-modern crop protection	203
7.2.7 Agriculture, craft or science?	205
7.2.8 The scientific status of pre-modern knowledge	206
7.3 Behaviour	206
7.3.1 Money, the bottom line	206
7.3.2 Mulier menstrualis - The power of women	207
7.3.3 Religion	208
7.3.4 'Thou shalt not kill'	208
7.3.5 Good conduct	209
7.4 Developments	210
7.4.1 The Greek heritage	210
7.4.2 The Roman heritage	211
7.4.3 The Muslim heritage	212
7.4.4 Evolution or revolution?	213
7.4.5 The North-West European development	214
7.5 Change and continuity	214
7.5.1 Change	214
7.5.2 Continuity	215
8 Once upon a time - organic agriculture	217
8.1 'All that we need'	217
8.2 Crop protection at a distance	218
8.2.1 The pest tetrahedron	218
8.2.2 Matters of scale	219
8.2.3 Man and his interactions	219
8.3 Theoretical considerations	220
8.3.1 A 'theory of yield'	220
8.3.2 A 'theory of loss'	222

8.3.3 Pre-modern farming reconstructed?	222
8.3.4 Old and modern organic agriculture – a comparison	223
8.4 Real-life experiences	224
8.4.1 Reality of abiotic hazards	224
8.4.2 Reality of pest outbreaks in pre-modern times	226
8.4.3 Reality of pest control in pre-modern times	228
8.4.4 Precautionary approaches	229
8.4.5 Effectiveness of pest control in pre-modern times	232
8.4.6 Did we miss the clue?	233
8.4.7 Invisible pest control?	234
8.5 Lavish abundance? - Food security and food safety	235
8.5.1 Food security	235
8.5.2 Food safety	236
8.6 Modern times	237
9 Final comments	239
References	243
Notes	265
